RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, May 16, 1874.

Stock Exchange and Money Market.

Money has been remarkably easy through the week, with call loans quoted at from 3@5, quite generally at 3½@4; and best discounts at 6@7 per cent per annum. The comparative dullness in the commercial line lessens the demand for accommodation from mercantile sources. And the Stock Exchange dealings having been on a reduced scale, in most instances, the speculative inquiry has been comparatively moderate at the current quotations. The City banks, in their last weekly statement, were $1,835,200 higher on their deposits, and $40,700 lower on their loans and discounts, than the week before. The legal tender notes were reduced $35,000, and the specie reserve increased $2,665,900. The circulation was enlarged $32,600. The U. S. Sub-Treasury at this port has gained handsomely in the line of its currency reserve, while further reducing its coin hoard mainly through May interest disbursements. The U. S. Sub-Treasury in this city closed the week with a currency balance of $39,991,528 against $38,288,820 the preceding week; and a coin hoard of $54,952,953, against $56,650,938 on the previous return. The City bank exchanges, during the week, were $478,458,984, or a daily average of $79,743,156. The customs revenue of the port, during the week, was $2,111,486, of which $1,988,487 were in coin certificates. The City banks reported their average of gold last week at $27,305,500, and their greenback average at $55,798,600. Their deposits stood at $236,236,700. The loan item was about 286½ millions. The circulation was $26,922,200.

The cash balances of the Treasury Department on Wednesday were: Currency, $7,977,097; special deposits of legal tender for redemption of certificates of deposit, $58,745,000; coin, $89,031,885; including coin certificates, $35,255,600.

The outstanding amount of legal tender notes is yet 382 millions; and of National bank circulation 348⅞ millions.

Government has received about 87 millions from internal revenue, thus far in the current fiscal year.

Gold has been further depressed in price, partly by the free coin disbursements of the Treasury Department. The speculation has been less confident, and hesitating. The export drain has been heavier. The customs inquiry moderate. The extremes of the price have been 112@112¾, closing at 112⅛, as against 112⅛ on Wednesday of the preceding week. The specie outflow, last week, was $2,528,063. The imports of specie at this port since Jan. 1, have been $1,559,673, against $1,653,682 same time last year. The customs demand for Gold last week averaged $363,833 a day. Foreign Exchange has been in moderate demand, opening stronger but closing weak. Bankers' sixty day bills on London closed on Wednesday at $4 88½@4 89½; sight bills on London, at $4 91@$4 91½. The week's exports of Domestic Produce have been to the currency value of $4,454,867.

Government securities have been more active, and at the close stronger in price. The investment demand has improved. U. S. sixes of 1881 closed on Wednesday of this week at 121½@121¾; U. S. Five-Twenties of 1862, 115¼@115½; U. S. Five-Twenties of 1864 at 117@117¼; U. S. Five-Twenties of 1865, 117⅞@118⅛; U. S. Five-Twenties of 1865 consolidated, 119⅜@119⅝; U. S. Five-Twenties of 1867, 120⅜@120½; U. S. Five-Twenties of 1868, 120⅜@120½; U. S. Ten-forties at 114⅞@115¼; U. S. Fives of 1881, (Funding Loan) 115½@115¼; Six per cent. currency Sixes from 116⅜; @116⅝.

State and Railway bonds have been attracting more attention since our last, at rather firmer prices, in the leading instances. Central Pacific first mortgage six per cents have been in demand, closing at 94¾@95; Western Pacific sixes, 87¼@87¾. Chesapeake and Ohio First Mortgage Bonds, Six per cents, have been inactive, and quoted at from 51½@52½. Railway and miscellaneous share property has been less active, and generally less firm, closing rather heavily.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,514,037, against $6,384,442 same week last year. The exports of domestic produce are $4,454,067, as against $5,998,718, last year. The exports of Gold and Silver, $2,528,063, as against $551,246 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $2,183,000, as against $2,118,000, same week last year.

General business has shown less animation, apart from the movements in Breadstuffs, Cotton and Provisions, in which the dealings have been to a fair extent. The first arrivals from the canals added considerably to the available supplies of Breadstuffs, prices of which ruled lower. Provisions, firm; Cotton higher; Metals comparatively tame. Eglinton Pig Iron quoted at $34 50@$36. Glengarnock, $37 50@$38; Coltness, $39@$39 50; No. 1 American Pig at $35; No. 2 do. at $31@$33; Forge, $29@$31; English Rails at $55@$60, gold; American Rails at works, $60@$65; Old Rails, $40@$41. Wrought Scrap, $41@42 50. Sales of 1,000 tons Wrought Scrap, yet to be shipped, were made at $42 50. The Ocean freight market has been fairly active, opening at stronger rates on grain, shipments, but closing weaker, and irregular. Groceries have been in less demand, and quoted easier in price. Hides and Leather in less request. Wool, more sought after, and held with firmness. The overflow in the lower Mississippi Valley has again affected the Cotton receipts, which aggregate for the week only, 24,000 bales, against 43,700 last year, and 46,800 bales the great crop year of 1870-71. The exports of the week from all the ports amount to 69,500 bales. The crop receipts to date are now, 3,577,000 bales, against 3,801,000 last year, and 3,669,000 bales in 1871.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ At a meeting of the stockholders of the New York and New England (late Boston, Hartford and Erie) Railroad Company in Boston on the 12th inst., the following gentlemen were elected directors: James C. Ayer of Lowell; George W. Baldwin of Boston; LeGrand B. Cannon of New York; William Butler Duncan of New York; Gustavus V. Fox of Boston; R. Suydam Grant of New York; William T. Hart of Boston; Edward W. Kinsley of Boston; Frederick J. Kingsbury of Waterbury, Conn.; Frederick W. Rhinelander of New York; George M. Rice of Worcester; John F. Slater of Norwich, Conn., James Y. Smith of Providence; James Sturgis of Boston; Royal C. Taft of Providence.

☞ George B. Roberts, of Philadelphia, Henry G. Stebbins, of New York, and Silas F. Miller, of Louisville, have been appointed a committee to receive subscriptions to the stock of the Texas and Pacific Railway.

☞ The grading of the Texas and Pacific Railway is completed ten miles out from San Diego, California.

Southern Pacific Railroad.

We give on another page the Report of the President and Directors of this company for the fiscal year ending June 30, 1873. Since the date of that report the work of construction has been finished on an additional section, and the company now has 251 miles of completed road. For the six months ending December 31, 1873, the earnings were $645,552 25, the expenses $252,748 39, and the net earnings $392,803 86. The assets of the company at that date were as follows:

251 miles of railroad and telegraph, with all necessary sidings, turnouts, switches, turn-tables, depots, depot-buildings, & round-houses, valued at	$15,390,973 14
Equipments for same—locomotives, cars, etc	674,985 79
Real estate—depot grounds, etc., on line of constructed road, including an undivided half-interest in 60 acres Mission Bay lands, upon which there has been expended $482,981 74	7,559,925 00
Telegraph instruments, furniture, safes, etc., at stations and offices	24,308 50
Material on hand—for construction and repairs, in shops, on the road, and in store of supply department, as per invoices	73,281 98
Fuel on hand—per inventory	4,908 92
Balance of accounts outstanding, after deducting obligations	155,618 00
Cash in hands of treasurer	173.668 25
Right of way	885,000 00
Land grant from U. S. Government, of 12,800 acres per mile, valued at	41,527,500 00
Lands for depots, etc., on line of unconstructed road, valued at	5,468 75
Total	$66,475,683 33

Illinois Central Railroad.

The statement of this Company for the month of April, 1874, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	2,471.03 for	$16,737 40
Acres Free Lands Sold	for	
Total sales during the m'th of April, 1874	2,471.03 for	$16,737 40
Total of all	2,471.03 for	$16,737 40
Cash collected in April, 1874		$31,358 06

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$290,210 00	$72,610 00	$362,820 00
Passengers	98,071 75	37,884 00	135 455 75
Mails	6,375 00	3,059 24	9,434 24
Other sources	70,625 00	2,585 76	73,210 76
Tot'l Apr. '74	$465,281 75	$115,639 00	$580,920 75
Total actual earn'gs, Apr., 1873	$437,005 80	$116 906 41	$553,912 21

☞ The reduction of the public debt for the month of April, ($2,965,451 48,) as shown by the public debt statement, in another column, is considered by the Treasury Department a very gratifying exhibit of the condition of the national finances, especially so in view of the fact that during that period the Treasury was called upon for a large amount, (about $3,000,000,) for other purposes than ordinary expenses of the Government—nearly $1,500,000 having been paid for cotton seized during the war under judgments rendered by the Court of Claims, and about the same

amount for deficiencies in the postal revenues, mail steamship service, quarterly postage, &c. The revenues for the month came fully up to the estimates made last November.

St. Louis, Iron Mountain and Southern Railway Co.

PRESIDENT'S OFFICE,
ST. LOUIS, May 6th, 1874.

EDITOR AM. RAILROAD JOURNAL:

Sir:—I have the honor to inform you that the St. Louis and Iron Mountain Railroad Company and its Arkansas Branch, and the Cairo, Arkansas and Texas Railroad Company, all of Missouri, have been merged and consolidated with the Cairo and Fulton Railroad Company of Arkansas, under the name of the "St. Louis, Iron Mountain and Southern Railway Co.," and in that name the business of the consolidated corporation will hereafter be conducted.

The lines composing the consolidated Company, and now operated by it, consist of

	Miles.
St. Louis and Iron Mountain Railroad:—St. Louis to Columbus	196
St. Louis and Iron Mountain Railroad:—Bismarck to State Line	110
Mineral Point to Potosi	4
Cairo, Arkansas and Texas Railroad:—Cairo to Poplar Bluff	72
Cairo and Fulton Railroad, of Arkansas, State Line to Texarkana	304
Total	686

At Columbus, Ky., the line connects with the Mobile and Ohio Railroad; and at Texarkana, with the Texas and Pacific Railroad, and is ready for business throughout the entire line with ample complement of rolling stock.

Very respectfully,
THOS. ALLEN, Pres't.

☞ A letter to the Baltimore *Sun*, dated Towsontown, Baltimore Co., Md., says: "The Maryland and Pennsylvania Railroad Company has sent an additional corps of engineers to commence operations on the road in charge of Mr. Warrell Marks. They will resume work where it was left off last winter at Cromwell's bridge, about four miles from this place, and move towards the Pennsylvania line. The old corps is now engaged near the Northern Central Railroad. From a point in this vicinity to Cromwell's bridge the grading has been nearly finished, though there is some work to be done in the way of culverts, &c."

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending May 2, at 897,135 tons, and for the coal year 5,109,149 tons, against 5,389,077 tons to corresponding time last year, being a decrease of 279,928 tons. The bituminous tonnage for the week is 76,728 tons, and for the year 849,352 tons, giving a total of all kinds for the week of 473,858 tons, and for the year of 5,968,501 tons, against 6,249,300 tons to same time last year, being a decrease of 280,818 tons.

☞ E. B. Stoddard has been chosen President, Joseph E. Davis Treasurer, and Richard Barker Superintendent of the Worcester and Shrewsbury Railroad Company.

☞ Professor F. A. H. Barnard, President of Columbia College, has been elected Foreign Secretary of the National Academy of Science, vice Professor Agassiz, deceased.

The Grangers.

A reflective Illinois farmer has been proposing to himself the conundrum: Does it pay to belong to the Grangers? and the result of his cogitations is that it does not. It strikes him in the first place that the grangers were not instituted by the farmers, but by a few interested men who wanted to benefit their own pockets. Next, he is mildly solicitous as to what has become of all the money that has been paid into the organization. Taking the statement of Master Adams that there are one hundred and twenty thousand granges in existence, with an average of fifty members to each, and figuring up the entrance fees and dues of all, he estimates that over two and a half millions of dollars have been paid into the treasury of the Order. The writer continues by asking, What is the object? who is benefited? and where does this enormous sum of money go to? Probably many other Grangers have asked themselves questions very similar.—*Balt. Am.*

☞ The *Democratic Messenger*, Snowhill, Worcester county, states that ground will be broken this week for the extension of the Wicomico and Pocomoke Railroad, from Berlin to the Atlantic ocean. Dr. H. R. Pitts and Lemuel Showell, Esq., returned from Baltimore last week, having been entirely successful in negotiating enough bonds of the railroad to defray the expenses of the enterprise. The bonds were sold at seventy cents on the dollar.

☞ The stockholders of the California and Texas Railway Construction Co. have agreed to furnish upon the Company's securities, at a low rate of interest, the funds necessary to complete the road from Dallas to Fort Worth, and from Texarkana to Brookton, the construction to be finished within the present year, and the money to be used for the specific purpose mentioned.

☞ By an agreement between the representatives of the Lake Ontario Shore Railroad and the Rome, Watertown & Ogdensburg Co., on the 12th inst., the latter organization assumes full control and management of the affairs of the former, and is expected to effect an early completion of the road through to the Niagara river.

☞ The Bennett's Branch, or Eastern Extension of the Allegheny Valley Railroad, which will in future be known as the Low Grade Division, was on Monday May 4th, opened for general business between Red Bank on the main line of the A. V. R. R., and Driftwood, on the Philadelphia and Erie Railroad, a distance of 110 miles.

NEW YORK, May 1, 1874.

MR. SAMUEL A. STRANG, OF THE LATE firm of M. K JESUP & CO., becomes a member of our firm from this day.

The business will hereafter be conducted at No. 59 Liberty st., under the name of PERKINS, LIVINGSTON, POST & CO.

PERKINS, LIVINGSTON & POST.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

TRUSTEES.

Foreign Loans and American Railroad Interests.

There are those who entertain grave doubts of the wisdom of the policy of borrowing money abroad for works of improvement. They contend that the practice affects a whole people, much as it does an individual; that is to say, instead of looking to their own savings as the true source of capital they are led to rely too much upon the ability and earnings of others. One of the benefits of these international dealings in money and credit, undoubtedly, is to give to the creditor nation a deeper interest in the welfare of the debtor nation; but it is accompanied with the disadvantage that it leaves the affairs of the borrowing party subject to the caprices, disabilities and prejudices of the lenders. If borrowing of foreigners could be stopped, we should undoubtedly make less progress with the spread and convenience of our civilization over our immense domain; but it would not be so liable to the jerks and checks which we are now subjected to at intervals. Without discussing the policy, we may say that, at any rate, if we do borrow of Europe, we shall have to repay, certainly the interest, and are liable to be called on to pay a large part of the principal also. If we are to continue borrowing it is obvious, therefore, that we should be able to get money at rates no higher than the money can be made to earn. The questions naturally arise: what is the average return of capital invested in our industrial pursuits? and what can we afford to pay for the use of more capital, to compete with that we already have invested?

The average annual ratio of increase of wealth (actual visible products) when reckoned over long periods, is believed to fall within three per cent in the older nations of Europe. In Holland, for instance, two and a half per cent, over and above the consumption and waste; and in England about 3¼ per cent, per annum have been estimated as the average for a hundred years; and in this increase must be reckoned the vast accessions from conquest and tribute from dependent States. For the last fifty years, covering the period of steam machinery, and the general use of mineral fuel, it may be doubted if the average ratio has much exceeded five per cent. Single branches or sub-divisions of trade and industry and skill may have greatly exceeded this ratio; but the returns of assessable property show that the accumulations of goods and chattels is very much less than is commonly supposed, both in the financial nations of Europe and in America.

The rate in the United States is probably somewhat higher than either of the foregoing, in consequence of a virgin soil, eminent ingenuity and intelligence and of immigration; but the returns of the assessors, are liable to mislead, for they continually take in more and more of the landed domain, and the values are hopelessly faulty by reason of the inflation of the currency, and of concealments and evasions; moreover, a large part of the wealth is made up of paper securities, entries of credit, and other representative forms of value. We cannot afford to pay to foreigners, for any very large proportion of our working capital, higher rates of interest than we are realizing from its use. To do so is to encroach on our own savings.

Take the railroad system of the United States as a favorable example of a large industry, and one which is largely indebted to foreign money. We have published statistics, which in the mass very closely represent the actual operation, showing that the gross earnings of the railroads, do not exceed fifteen per cent of their cost, while the net earnings slightly exceeded five per cent of their cost. There are groups of them which fall below five per cent; while the average dividends paid (of those which do pay) is about 6⅔ per cent. And this is already vastly better than the English roads do; while a large part of our roads are new ones, and all are steadily increasing in receipts. How, then, can they afford to pay ten or twelve per cent per annum to Europeans for the use of money to be employed in dividing the business now enjoyed? Yet this is precisely what some of them have been doing of late years; and as we showed in our last issue, holders of the railroad bonds in Europe have come to grief, by their own eagerness to accept extravagant rates of interest, and by the willingness of our railroad projectors to borrow on such unreasonable terms. Seven per cent is the average rate at which money is loaned on bond and mortgage in the Eastern States, and our best railroads can usually borrow at about those rates. It is true that, here and there, are nearly-completed enterprises, well-placed, and forming parts of much-needed transportation lines, which might afford the higher rates for so much capital as is needed to make the whole investment productive; and the representatives of German bondholders now in this country, could render no greater service to the capitalists of both nations, than to examine into the needs and opportunities of our railroad system, and concentrate their recommendations of investments on a few of the prominent gaps in our trunk lines, as proper and profitable channels for new investments.

There is a danger that by reason of the injudicious selections made by the Germans of late years, (some fifteen or sixteen of the thirty classes of United States bonds dealt in on the Frankfort Bourse, having failed to meet the expectations of the holders) they may, with equal want of discrimination, cast discredit upon them all as alike bad. Nothing could be more unjust to American industry and American honor—nor more injurious to themselves. As we have explained there are good and bad among our ventures; as among our men. In this respect we are not peculiar. One of the most serious difficulties in regard to foreign

loans is a lack of the proper perspective view of the importance and function of our several links of railroad. This cannot be derived from a study of the maps, if they are ever so accurate. It requires an intimate knowledge of the topography, settlement, minerals, vested-interests, and local information, which is not open to even the English, and still less to the Germans. There are at this moment two or three noticeable opportunities for the employment of twenty to fifty millions additional capital, where it would not only be itself reasonably productive, but where the guarantees for its safety would be enormously multiplied by conferring new earning power on large sums of capital already invested. The unreasoning distrust of new bonds has temporarily arrested the growth of a few very eligible roads. One such occurs to us in the filling up of a short link in a great through transportation line, having a territory lined with minerals and fuel, all its own, and connecting the heart of the great agricultural basin, with the best harbor on our Eastern coast. Others hardly less meritorious may be found further west, and on the Pacific Shore.

Some accurate and trustworthy information of this kind would be of the greatest service to Europeans, whose knowledge of our continent must, at best, be inadequate. We doubt if any body analogous to the Frankfort council of Bondholders, or the London Protection Committee, could properly fill this important mission. There would be a continued pressure brought to bear upon its members, and the tendency would be to drift into the hands of a clique or small body of men whose interests would be first served. Perhaps some unity of action on the part of the most eminent German Bankers themselves, or in connection with our reputable American Houses, might do somethink toward preventing unscrupulous speculators from selling their worthless bonds to foreigners. The field for the profitable use of capital is here, and the money would doubtless flow here, if the degrading competition of reckless and dishonest borrowers could be put under some wholesome restraint.

Ithaca, Athens and Geneva Railroad.

At a meeting of the stockholders of the Ithaca and Athens and Geneva and Ithaca Railroad Companies, held at Ithaca, on the 14th inst., a consolidation of the two roads into one corporation was effected, and the following Directors and officers elected: Directors—Ezra Cornell, Alonzo B. Cornell, New York; F. C. Cornell, Charles H. Blair, Francis M. Finch, Rufus Bates, C. M. Titus, John Ramsey, and George McChain, Ithaca; Wm. W. Wright, Wm. Hall, and F. W. Prince, Geneva; and John A. Nichols, Spencer Springs, New York. The following officers were elected for the ensuing year: Hon. Ezra Cornell, President; Chas. M. Titus, Vice President; Charles H. Blair, Secretary; George McChain, Treasurer. The road makes direct connection in the south with the Lehigh Valley Railroad at Sayre, Penn., and with the Erie at Waverley, and in the north with the New York Central Railroad and Sodus Point and Southern to Lake Ontario. The coal tonnage of the road for the year 1873 was very large, the road being unable to carry the amount offered. But the consolidation of the two roads under one management, however, has obviated this, and the coal tonnage thus far for the year 1874 is double that of last year.

Lake Shore and Michigan Southern Railway.

The earnings of this road for the years ending December 31, 1872 and 1873, were as follows:

	1872.	1873.
From freight	$12,824,862 20	$14,192,398 77

HISTORY OF ORGANIZATION.

The company is a consolidation of the following roads:

The Cleveland, Painesville and Ashtabula Railroad—extending from the city of Erie, in the State of Pennsylvania, to the city of Cleveland, in the State of Ohio — 95 miles.

The Cleveland and Toledo Railroad—extending from the city of Cleveland, in the State of Ohio, to the city of Toledo, in the State of Ohio — 113 miles.

With a branch, (or Northern Division,) extending from Elyria, (26 miles west of Cleveland,) *via* the city of Sandusky, in the State of Ohio, to Millbury, (Junction with Main Line near Toledo) — 76¼ miles.

These two roads last mentioned were consolidated, under the name of the Lake Shore Railway Company, in March, 1869.

The Michigan Southern and Northern Indiana Railroad—extending from the city of Toledo, in the State of Ohio, to the city of Chicago, in the State of Illinois — 244 miles.

This road was consolidated with the Lake Shore Railway Company, under the name of the Lake Shore and Michigan Southern Railway Company, in May, 1869.

In August, 1869, the Buffalo and Erie Railroad Company, (88 miles,) was consolidated with the Lake Shore and Michigan Southern Railway Company, under the name of the Lake Shore and Michigan Southern Railway Company, thus forming a continuous line of Railway, 540 miles in length, between the cities of Buffalo, in the State of New York, and Chicago, in the State of Illinois.

This company owns branches as follows:

Ashtabula, Ohio, to Jamestown, Pa	36 miles.
Elyria, Ohio, *via* Sandusky, to Millbury, (Junction with Main Line)	76¼ miles.
Toledo, Ohio, to Elkhart, Indiana, (Air Line)	131 miles.
Adrian, Michigan, to Jackson, Mich	46 miles.
Adrian, Michigan, to Monroe, Michigan	33 miles.

The following roads are under separate organizations, but the capital stock thereof is owned wholly by this company:

The Detroit, Monroe and Toledo Railroad—extending from Toledo, in the State of Ohio, to the city of Detroit, in the State of Michigan	65 miles.
The Kalamazoo and White Pigeon Railroad—extending from White Pigeon, Michigan, to Kalamazoo, Michigan	37 miles.
The Northern Central Michigan Railroad—extending from Jonesville, Michigan, to Lansing, Michigan	60 miles.

The following roads are operated by this company under leases:

The Jamestown and Franklin Railroad—extending from Jamestown, Pennsylvania, (where it connects with the Ashtabula Branch,) to Oil City, Pennsylvania.... .... 51 miles.

This company has a large proprietary interest in this road, and operates it under a lease for sixty per cent of the earnings.

The Kalamazoo, Allegan and Grand Rapids Railroad—extending from Kalamazoo, Michigan, to Grand Rapids, Michigan.... .... 58 miles.

The terms of this lease are, the payment of interest on bonds and stock amounting to $103,800 per annum.

That portion of the Main Line, from Toledo, Ohio, to Adrian, Mich., 33 miles, was acquired by a perpetual lease from the Erie and Kalamazoo Railroad Company, by the terms of which this company pays the sum of $30,000 per annum.

Under a contract with the Cleveland, Columbus, Cincinnati and Indianapolis Railroad Company, this Company has the right to use their track between Cleveland and Berea, (twelve miles,) for all passenger trains, at an annual rental of $42,000 for sixty trains per week; for any trains beyond that number, $8 per train.

The aggregate length of the system of roads operated by this company, including 109 miles of leased road, was by last report 1,186¼ miles.

On the first day of August the Mahoning Coal Railroad, extending from Andover, on the Ashtabula Branch, (24 miles from Ashtabula,) to the large and flourishing city of Youngstown, Ohio, a distance of 38 miles—with two short branches into coal mines, since built—was opened for business. This company operates the Mahoning Coal Railroad, under the lease printed in the last annual report, for sixty per cent of its gross earnings. This company assumed no liability whatever beyond this division of the earnings.

As the business of the Mahoning Coal Railroad is almost wholly the transportation of coal and iron, it was found necessary to reach Lake Erie at the harbor of Ashtabula, hence the Ashtabula Branch was extended from Ashtabula to the harbor, a distance of 2¼ miles, at a cost of $123,723 69.

The panic of September, following immediately upon the opening of the Mahoning Coal Railroad, was especially depressing in its effects upon the iron and coal interests. This, together with the lack of dock facilities at the harbor, has rendered it impossible to judge, as yet, what the road will earn under more favorable circumstances. We believe, however, that it will take care of itself, and give this road a large and fairly remunerative business.

The average number of miles operated by this company was:

In 1873, 1,154 miles, earning per mile	....	$16,924
In 1872, 1,061 " " "	....	16,682

The whole number of miles of railroad owned and leased by this company is 1,181.

EQUIPMENT.

During the year 1873, the equipment was increased to the extent of 44 new engines and 830 cars of various classes, at a cost of $1,196,502 13.

The equipment at the close of the year 1873 stood as follows:

Locomotives....	462
Passenger Cars—all classes....	253
Freight Cars—all classes	9,843

We are now supplied with an abundance of motive power, of which 45 per cent (208 locomotives,) is new, and the rest in good working condition.

Of the 10,096 cars on the road, 4,298 (43 per cent,) are new, having been added to the equipment since the consolidation in 1869, while large numbers have been built to replace cars worn out or destroyed. It is, therefore, safe to say that nearly one-half of our entire rolling stock is but two years old.

CAPITAL STOCK.

The capital stock of the company is $50,000,000. Of this sum $538,500 is the ten per cent guaranteed stock of the late The Michigan Southern and Northern Indiana Railroad Company. Of this guaranteed stock $350,600 is "assented," (claim for dividends between 1857 and 1863 settled,) and $182,900 is "unassented."

BONDED DEBT.

The bonded debt of the company stood—

At the close of the year 1873....	$30,195,000
December 31, 1872....	24,971,000
Increase	$5,224,000

in the bonds of 1882, ($6,000,000 issue.)

This increase yielded to the company $4,325,235 28.

The discount, $898,764 72, was charged to "Income Account," as heretofore, and in accordance with the uniform and conservative policy of the company in this respect.

The funded debt of this company, and the annual charge for interest thereon, is as follows:

	Debt.	Interest.
Lake Shore and Michigan Southern	$30,195,000	$2,118,650
Detroit, Monroe and Toledo	924,000	64,680
White Pigeon & Kalamazoo	600,000	44,000
	$31,719,000	$2,222,330

It being soon ascertained that the issue of $6,000,000, bonds of 1882, was wholly inadequate to meet the pressing necessities of the road for construction and equipment and also for the extinguishment of the large floating debt, your Board of Directors resolved upon providing for these purposes, and for the retirement of the $6,000,000, bonds of 1882, by a second general mortgage of $25,000,000.

None of these bonds were issued in 1873; they are seven per cent bonds, both registered and coupon, interest payable June 1st and December 1st. Bonds mature December 1, 1903.

The security is a second mortgage (first mortgage being $25,000,000,) upon a road and equipment which earned, in 1873, more than $19,000,000.

It is expected that the issue of $12,000,000 of these bonds will retire the $6,000,000, "Bonds of 1882," and extinguish the floating debt. The balance of the $25,000,000 will be held in reserve for purposes of construction and equipment that will increase the earning capacity of the road, and will not be used except in case of the most urgent necessity.

EARNINGS—1873.

From freight....	$14,192,398	77
From passengers....	4,569,729	74
From all other sources	652,380	75
Total....	$19,414,509	26
Operating expenses and taxes, 70.9 per cent....	13,746,598	54
Net earnings....	$5,667,910	72
Deduct int. and leases.	$2,601,210	57
Dividend, ten per cent, on guaranteed st'ck	52,250	00
	2,654,502	57
Leaving for the stock, 6.1 per cent.	$3,013,350	15
Paid dividend August 1st, four per cent.	1,978,040	00
	$1,035,310	15

Gross earnings, 1870....	$13,509,235 53
Gross earnings, 1871....	14,906,260 89
Gross earnings, 1872....	17,809,935 29
Gross earnings, 1873	19,414,509 26

These earnings include the entire amount of the earnings of the Jamestown and Franklin Railroad, instead of our sixty per cent, as heretofore stated; forty per cent is afterward deducted as rental of that road. This corrected basis of comparison is adopted in all the statistics given in this report.

Increase in gross earnings, 1873 over 1872, $1,714,673 98, which is 9¼ per cent.

Of this increase $1,867,536 57 is from freight, an increase of 10.7 per cent, and $351,186 45 from passengers, 8.5 per cent.

Earnings from other sources show a decrease of $4,049 04.

The average rate per ton per mile on East bound freight, (which is 73 per cent of our entire freight movement,) was 1.297 cents in 1873, against 1.272 in 1872, a slight improvement; but the rate per ton per mile on West bound freight, (which this company cannot control,) was but 1.437 cents in in 1873, against 1.638 in 1872, a reduction of 0.201 of one cent, equal to 10 per cent on the entire movement of freight westward; resulting in a loss of net earnings of $411,000, and accounting for 1½ of the 4 per cent increase in operating expenses, (the other 2½ per cent is wholly in the excess of steel rail laid in 1873 over the amount put down in 1872, which will be shown under its proper head,) as we are compelled to move 17 per cent more tonnage to secure 10.7 per cent more earnings.

We continue the record of the steady downward movement in the rate per ton per mile of the entire freight movement of this road for the past six years.

1868....	2.43 cents per ton per mile.
1869....	2.34 cents per ton per mile.
1870....	1.50 cents per ton per mile.
1871....	1.39 cents per ton per mile.
1872....	1.37 cents per ton per mile.
1873....	1.33 cents per ton per mile.

Had we been able to obtain even the low rate of 1870, 1½ cents per ton per mile, the net earnings from freight would have been larger by $1,739,497, and we should have earned the usual February dividend of four per cent, with a handsome surplus besides.

Earnings from passengers show an increase of $351,186 45, which is 8¼ per cent.

This increase is derived mainly from local business.

CONSTRUCTION.

This account, in 1873, amounted to $2,348,959 84. The following detail will best explain this expenditure:

Harbor extension of Ashtabula Branch 2¼ miles....	$123,723 69
Second track, from Elkhart west, 6¼ miles	111,519 05
Additional side tracks, 79¼ miles....	960,993 78
Stone and iron bridges....	327,045 97
Real estate purchased....	187,542 41
New buildings and machinery....	553,282 19
Completion Chicago passenger depot, (our half)....	85,752 80

Upon the death of our late President, Hon. HORACE F. CLARK, which occurred June 19, 1873, and the reluctant acceptance of the presidency by the present incumbent, July 1st, it was deemed prudent, in view of the financial condition of the company, to stop all construction work that could be postponed without actual loss.

Hence the work of building the second track from Elkhart to Chicago, 100 miles, which had just been entered upon, was stopped at Osceola, 6¼ miles west of Elkhart.

A contract for twenty thousand tons of steel rail, of which about half was intended for this hundred miles, could not, however, be cancelled, and we received and paid for, in 1873, about fourteen thousand tons of steel rail on this contract. The balance, six thousand tons, we are taking in 1874. This rail was put down in the main track as fast as iron rails needed to be taken out, and amounted to 141¼ miles, the entire cost of which has been charged to operating expenses; although the cost over iron rail amounted to $674,-000. This large excess of steel rail laid in 1873 over the amount laid in 1872, (79 miles,) accounts for 2¼ of the four per cent increase in operating expenses.

We now have in the main track between Buffalo and Chicago 413 miles of steel rails, equal to 44 per cent of both tracks. Of the road between

loans is a lack of the proper perspective view of the importance and function of our several links of railroad. This cannot be derived from a study of the maps, if they are ever so accurate. It requires an intimate knowledge of the topography, settlement, minerals, vested-interests, and local information, which is not open to even the English, and still less to the Germans. There are at this moment two or three noticeable opportunities for the employment of twenty to fifty millions additional capital, where it would not only be itself reasonably productive, but where the guarantees for its safety would be enormously multiplied by conferring new earning power on large sums of capital already invested. The unreasoning distrust of new bonds has temporarily arrested the growth of a few very eligible roads. One such occurs to us in the filling up of a short link in a great through transportation line, having a territory lined with minerals and fuel, all its own, and connecting the heart of the great agricultural basin, with the best harbor on our Eastern coast. Others hardly less meritorious may be found further west, and on the Pacific Shore.

Some accurate and trustworthy information of this kind would be of the greatest service to Europeans, whose knowledge of our continent must, at best, be inadequate. We doubt if any body analogous to the Frankfort council of Bondholders, or the London Protection Committee, could properly fill this important mission. There would be a continued pressure brought to bear upon its members, and the tendency would be to drift into the hands of a clique or small body of men whose interests would be first served. Perhaps some unity of action on the part of the most eminent German Bankers themselves, or in connection with our reputable American Houses, might do somethink toward preventing unscrupulous speculators from selling their worthless bonds to foreigners. The field for the profitable use of capital is here, and the money would doubtless flow here, if the degrading competition of reckless and dishonest borrowers could be put under some wholesome restraint.

Ithaca, Athens and Geneva Railroad.

At a meeting of the stockholders of the Ithaca and Athens and Geneva and Ithaca Railroad Companies, held at Ithaca, on the 14th inst., a consolidation of the two roads into one corporation was effected, and the following Directors and officers elected: Directors—Ezra Cornell, Alonzo B. Cornell, New York; F. C. Cornell, Charles H. Blair, Francis M. Finch, Rufus Bates, C. M. Titus, John Runsey, and George McChain, Ithaca; Wm. W. Wright, Wm. Hall, and F. W. Prince, Geneva; and John A. Nichols, Spencer Springs, New York. The following officers were elected for the ensuing year: Hon. Ezra Cornell, President; Chas. M. Titus, Vice President; Charles H. Blair, Secretary; George McChain, Treasurer. The road makes direct connection in the south with the Lehigh Valley Railroad at Sayre, Penn., and with the Erie at Waverley, and in the north with the New York Central Railroad and Sodus Point and Southern to Lake Ontario. The coal tonnage of the road for the year 1873 was very large, the road being unable to carry the amount offered. But the consolidation of the two roads under one management, however, has obviated this, and the coal tonnage thus far for the year 1874 is double that of last year.

Lake Shore and Michigan Southern Railway.

The earnings of this road for the years ending December 31, 1872 and 1873, were as follows:

	1872.	1873.
From freight	$12,824,862 20	$14,192,398 77

HISTORY OF ORGANIZATION.

The company is a consolidation of the following roads:

The Cleveland, Painesville and Ashtabula Railroad—extending from the city of Erie, in the State of Pennsylvania, to the city of Cleveland, in the State of Ohio	95 miles.
The Cleveland and Toledo Railroad—extending from the city of Cleveland, in the State of Ohio, to the city of Toledo, in the State of Ohio	118 miles.
With a branch, (or Northern Division,) extending from Elyria, (26 miles west of Cleveland,) *via* the city of Sandusky, in the State of Ohio, to Millbury, (Junction with Main Line near Toledo)	76¼ miles.

These two roads last mentioned were consolidated, under the name of the Lake Shore Railway Company, in March, 1869.

The Michigan Southern and Northern Indiana Railroad—extending from the city of Toledo, in the State of Ohio, to the city of Chicago, in the State of Illinois	244 miles.

This road was consolidated with the Lake Shore Railway Company, under the name of the Lake Shore and Michigan Southern Railway Company, in May, 1869.

In August, 1869, the Buffalo and Erie Railroad Company, (88 miles,) was consolidated with the Lake Shore and Michigan Southern Railway Company, under the name of the Lake Shore and Michigan Southern Railway Company, thus forming a continuous line of Railway, 540 miles in length, between the cities of Buffalo, in the State of New York, and Chicago, in the State of Illinois.

This company owns branches as follows:

Ashtabula, Ohio, to Jamestown, Pa	36 miles.
Elyria, Ohio, *via* Sandusky, to Millbury, (Junction with Main Line)	76¼ miles.
Toledo, Ohio, to Elkhart, Indiana, (Air Line)	131 miles.
Adrian, Michigan, to Jackson, Mich	46 miles.
Adrian, Michigan, to Monroe, Michigan	33 miles.

The following roads are under separate organizations, but the capital stock thereof is owned wholly by this company:

The Detroit, Monroe and Toledo Railroad—extending from Toledo, in the State of Ohio, to the city of Detroit, in the State of Michigan	65 miles.
The Kalamazoo and White Pigeon Railroad—extending from White Pigeon, Michigan, to Kalamazoo, Michigan	37 miles.
The Northern Central Michigan Railroad—extending from Jonesville, Michigan, to Lansing, Michigan	60 miles.

The following roads are operated by this company under leases:

The Jamestown and Franklin Railroad—extending from Jamestown, Pennsylvania, (where it connects with the Ashtabula Branch,) to Oil City, Pennsylvania	51 miles.
The Kalamazoo, Allegan and Grand Rapids Railroad—extending from Kalamazoo, Michigan, to Grand Rapids, Michigan	58 miles.

This company has a large proprietary interest in this road, and operates it under a lease for sixty per cent of the earnings.

The terms of this lease are, the payment of interest on bonds and stock amounting to $103,800 per annum.

That portion of the Main Line, from Toledo, Ohio, to Adrian, Mich., 33 miles, was acquired by a perpetual lease from the Erie and Kalamazoo Railroad Company, by the terms of which this company pays the sum of $30,000 per annum.

Under a contract with the Cleveland, Columbus, Cincinnati and Indianapolis Railroad Company, this Company has the right to use their track between Cleveland and Berea, (twelve miles,) for all passenger trains, at an annual rental of $42,000 for sixty trains per week; for any trains beyond that number, $8 per train.

The aggregate length of the system of roads operated by this company, including 109 miles of leased road, was by last report 1,136¼ miles.

On the first day of August the Mahoning Coal Railroad, extending from Andover, on the Ashtabula Branch, (24 miles from Ashtabula,) to the large and flourishing city of Youngstown, Ohio, a distance of 38 miles—with two short branches into coal mines, since built—was opened for business. This company operates the Mahoning Coal Railroad, under the lease printed in the last annual report, for sixty per cent of its gross earnings. This company assumed no liability whatever beyond this division of the earnings.

As the business of the Mahoning Coal Railroad is almost wholly the transportation of coal and iron, it was found necessary to reach Lake Erie at the harbor of Ashtabula, hence the Ashtabula Branch was extended from Ashtabula to the harbor, a distance of 2¼ miles, at a cost of $123,723 69.

The panic of September, following immediately upon the opening of the Mahoning Coal Railroad, was especially depressing in its effects upon the iron and coal interests. This, together with the lack of dock facilities at the harbor, has rendered it impossible to judge, as yet, what the road will earn under more favorable circumstances. We believe, however, that it will take care of itself, and give this road a large and fairly remunerative business.

The average number of miles operated by this company was:

In 1873, 1,154 miles, earning per mile	$16,824
In 1872, 1,061 " " "	16,682

The whole number of miles of railroad owned and leased by this company is 1,181.

EQUIPMENT.

During the year 1873, the equipment was increased to the extent of 44 new engines and 830 cars of various classes, at a cost of $1,196,502 13.

The equipment at the close of the year 1873 stood as follows:

Locomotives	462
Passenger Cars—all classes	253
Freight Cars—all classes	9,843

We are now supplied with an abundance of motive power, of which 45 per cent (208 locomotives,) is new, and the rest in good working condition.

Of the 10,096 cars on the road, 4,298 (43 per cent,) are new, having been added to the equipment since the consolidation in 1869, while large numbers have been built to replace cars worn out or destroyed. It is, therefore, safe to say that nearly one-half of our entire rolling stock is but two years old.

CAPITAL STOCK.

The capital stock of the company is $50,000,000. Of this sum $538,500 is the ten per cent guaranteed stock of the late The Michigan Southern and Northern Indiana Railroad Company. Of this guaranteed stock $350,600 is "assented," (claim for dividends between 1857 and 1863 settled,) and $182,900 is "unassented."

BONDED DEBT.

The bonded debt of the company stood—

At the close of the year 1873	$30,195,000
December 31, 1872	24,971,000
Increase	$5,224,000

in the bonds of 1882, ($6,000,000 issue.)

This increase yielded to the company $4,325,295 28.

The discount, $898,764 72, was charged to "Income Account," as heretofore, and in accordance with the uniform and conservative policy of the company in this respect.

The funded debt of this company, and the annual charge for interest thereon, is as follows:

	Debt.	Interest.
Lake Shore and Michigan Southern	$20,195,000	$2,113,650
Detroit, Monroe and Toledo	924,000	64,680
White Pigeon & Kalamazoo	600,000	44,000
	$31,719,000	$2,222,330

It being soon ascertained that the issue of $6,000,000, bonds of 1882, was wholly inadequate to meet the pressing necessities of the road for construction and equipment and also for the extinguishment of the large floating debt, your Board of Directors resolved upon providing for these purposes, and for the retirement of the $6,000,000, bonds of 1882, by a second general mortgage of $25,000,000.

None of these bonds were issued in 1873; they are seven per cent bonds, both registered and coupon, interest payable June 1st and December 1st. Bonds mature December 1, 1903.

The security is a second mortgage (first mortgage being $25,000,000,) upon a road and equipment which earned, in 1873, more than $19,000,000.

It is expected that the issue of $12,000,000 of these bonds will retire the $6,000,000, "Bonds of 1882," and extinguish the floating debt. The balance of the $25,000,000 will be held in reserve for purposes of construction and equipment that will increase the earning capacity of the road, and will not be used except in case of the most urgent necessity.

EARNINGS—1873.

From freight	$14,192,398 77
From passengers	4,569,729 74
From all other sources	652,380 75
Total	$19,414,509 26
Operating expenses and taxes, 70.9 per cent.	13,746,598 54
Net earnings	$5,667,910 72
Deduct int. and leases	$2,601,210 57
Dividend, ten per cent, on guaranteed st'ck	53,350 00
	2,654,560 57
Leaving for the stock, 6.1 per cent.	$3,013,350 15
Paid dividend August 1st, four per cent.	1,978,040 00
	$1,035,310 15

Gross earnings, 1870	$13,509,235 53
Gross earnings, 1871	14,906,280 89
Gross earnings, 1872	17,699,935 28
Gross earnings, 1873	19,414,509 26

These earnings include the entire amount of the earnings of the Jamestown and Franklin Railroad, instead of our sixty per cent, as heretofore stated; forty per cent is afterward deducted as rental of that road. This corrected basis of comparison is adopted in all the statistics given in this report.

Increase in gross earnings, 1873 over 1872, $1,714,678 98, which is 9¼ per cent.

Of this increase $1,867,536 57 is from freight, an increase of 10.7 per cent, and $351,186 45 from passengers, 8.5 per cent.

Earnings from other sources show a decrease of $4,049 04.

The average rate per ton per mile on East bound freight, (which is 73 per cent of our entire freight movement,) was 1.297 cents in 1873, against 1.272 in 1872, a slight improvement; but the rate per ton per mile on West bound freight, (which this company cannot control,) was but 1.437 cents in in 1873, against 1.688 in 1872, a reduction of 0.201 of one cent, equal to 10 per cent on the entire movement of freight westward; resulting in a loss of net earnings of $411,000, and accounting for 1¼ of the 4 per cent increase in operating expenses, (the other 2¼ per cent is wholly in the excess of steel rail laid in 1873 over the amount put down in 1872, which will be shown under its proper head,) as we are compelled to move 17 per cent more tonnage to secure 10.7 per cent more earnings.

We continue the record of the steady downward movement in the rate per ton per mile of the entire freight movement of this road for the past six years.

1868	2.43 cents per ton per mile.
1869	2.34 cents per ton per mile.
1870	1.50 cents per ton per mile.
1871	1.39 cents per ton per mile.
1872	1.37 cents per ton per mile.
1873	1.33 cents per ton per mile.

Had we been able to obtain even the low rate of 1870, 1¼ cents per ton per mile, the net earnings from freight would have been larger by $1,739,497, and we should have earned the usual February dividend of four per cent, with a handsome surplus besides.

Earnings from passengers show an increase of $351,186 45, which is 8¼ per cent.

This increase is derived mainly from local business.

CONSTRUCTION.

This account, in 1873, amounted to $2,348,959 84. The following detail will best explain this expenditure:

Harbor extension of Ashtabula Branch 2¼ miles	$123,723 69
Second track, from Elkhart west, 6¼ miles	111,519 05
Additional side tracks, 79¼ miles	960,993 78
Stone and iron bridges	327,045 97
Real estate purchased	187,542 41
New buildings and machinery	553,382 19
Completion Chicago passenger depot, (our half)	85,752 80

Upon the death of our late President, Hon. HORACE F. CLARK, which occurred June 19, 1873, and the reluctant acceptance of the presidency by the present incumbent, July 1st, it was deemed prudent, in view of the financial condition of the company, to stop all construction work that could be postponed without actual loss.

Hence the work of building the second track from Elkhart to Chicago, 100 miles, which had just been entered upon, was stopped at Osceola, 6¼ miles west of Elkhart.

A contract for twenty thousand tons of steel rail, of which about half was intended for this hundred miles, could not, however, be canceled, and we received and paid for, in 1873, about fourteen thousand tons of steel rail on this contract. The balance, six thousand tons, we are taking in 1874. This rail was put down in the main track as fast as iron rails needed to be taken out, and amounted to 141¼ miles, the entire cost of which has been charged to operating expenses; although the cost over iron rail amounted to $578,909. This large excess of steel rail laid in 1873 over the amount laid in 1872, (79 miles,) accounts for 2¼ of the four per cent increase in operating expenses.

We now have in the main track between Buffalo and Chicago 413 miles of steel rails, equal to 44 per cent of both tracks. Of the road between

Buffalo and Cleveland, 183 miles of double track, equal to 366 miles of single track, all is steel except 88 miles of single track. On the Cleveland and Toledo Division the steel rail amounts to 43 miles, and between Toledo and Chicago, 92 miles.

Experience has abundantly shown that one steel rail will last as long, at least, as ten iron rails laid opposite to it; hence the policy of renewing track with steel, where the traffic is heavy, needs no defence. Under the present low rates of transportation no trunk line can afford to put down iron rails.

It was found necessary to relieve the crowded narrow passage through Cleveland, where the business required the passing of twelve hundred cars per day, to purchase land outside the city for distributing yards, engine house, repair shop, etc., similar to the improvement at Air Line Junction, outside of Toledo, described in our last report. After long negotiations, our Chief Engineer secured several different tracts, aggregating 160 acres, lying in a body on both sides of our track at Collamer, seven miles east of Cleveland, at $650 per acre. This land has been graded, several miles of tracks put down, an engine house with 21 stalls, and office, is nearly completed. Through freight trains in either direction are now run directly through Cleveland, without stopping to switch, all distributing and switching being done in this yard at Collamer. This improvement, when completed, will enable us to pass through Cleveland fifty per cent more cars than formerly. Without it we could not have increased the business passing through Cleveland. The maximum had been reached.

The expenditure for construction in 1874 will be limited to the completion of this improvement and other unfinished work, and will be small in the aggregate.

The entire outlay for construction was—

In 1873	$2,349,959 84
In 1872	5,504,217 99
In 1871	3,343,383 70
In 1870	1,113,560 90
Total, four years	$12,311,122 43

For additional equipment—

	Engines.	Cars.	
1873	44	828	$1,196,502 13
1872	72	1,718	1,953,852 90
1871	47	1,151	1,301,402 50
1870	25	601	654,309 45
Total	188	4,298	5,106,066 98

Total outlay for construction and equipment, four years $17,417,189 41

GENERAL REMARKS.

Immediately upon the acceptance of the position of President by the present incumbent, and of Managing Director on the line by Mr. Amasa Stone, Jr., a conservative and economical policy was inaugurated. Construction work to the amount of $1,500,000, already ordered, was stopped; a reduction of pay-roll, both by discharge of men and reduction of wages, as far as practicable, was carried out after the panic.

Although the balance sheet printed herewith shows an increase of about $5,500,000 of debt in 1873, it is proper to say that but $400,000 of this amount was incurred in the last half of the year, and that was for construction and equipment contracted for prior to July 1st.

With the recent extraordinary open winter in our favor, we enter upon the spring with the road and equipment in first-class condition, and with fair rates for even the present diminished volume of business, the percentage of operating expenses should be considerably less, and we hope to show a more favorable result in 1874 than for the past year.

When I accepted the position of President of the company, July 1, 1873, I found its financial affairs in an embarrassed condition by reason of a large floating debt which had been incurred for construction and equipment. This embarrassment was greatly increased be the panic which followed immediately.

When, therefore, the time arrived for the declaration of the usual February dividend, it was deemed sound policy and for the best interest of the stockholders to pass it.

At this time a more encouraging state of affairs exist. The floating debt has been largely reduced, and it is expected that it will be entirely extinguished within a short time.

Your property possesses great value and resources, and with economical management and a fair degree of prosperity in the business of the country, we think its owners may expect hereafter a regular and fair return upon their capital.

The number of engines on the road December 31, 1873, was 462. Miles run by engines, 15,421,103. Cost of repairs per mile run, 5.02. The cars are classified as follows: first class passenger 133, second class and smoking 11, emigrant 27, railroad postal 12, baggage 57, paymasters' 2, express freight 11, box 4,916, stock 1,323, oil 200, platform 1,789, coal 1,210, caboose 248, derrick 9 and dumper 148.

Tons of through and way east bound freight, 3,546,009; do., west bound, 1,965,909—total freight movement, 5,511,918. Tons carried one mile east, 770,423,785; do., west, 283,503,404—total, 1,053,927,189.

Number of through passengers carried: 1st class, 65,577; 2d class, 9,687; emigrant, 7,031—total, 82,295. Way passengers: 1st class, 2,713,512; 2d class, 22,238; emigrant, 27,118—total, 2,762,868. Total through and way, 2,845,163. Passengers carried westward, 1,464,288; do., eastward, 1,380,875. Miles traveled by through passengers, 44,439,300; do., way passengers, 134,923,873—total mileage of passengers 179,363,173.

Sec'y & Ass't Treasurer.—GEORGE B. ELY.

Auditor.—C. P. LELAND.

Managing Director.—AMASA STONE, JR.

Gen. Superintendent.—CHARLES PAINE.

☞ The surveys for a new gravity railroad from Cumberland to the George's Creek coal fields have been completed. The line as located from Lonaconing to Cumberland will not exceed twenty-three miles in length. The return line has also been located, and by a judicious placing of inclined planes a favorable descending grade for the empty cars from Cumberland to the mines has been obtained. The inclined planes will be worked by stationary engines placed at the summits A gauge of three and a-half feet has been adopted, and five-ton cars will be used for the transportation of coal. It will be observed from the above that it is designed to construct two distinct tracks, one for the descending loaded trains and one for the return of the empty cars to the mines, and that it is proposed to overcome the difficulties of elevation by the use of stationary engines on the summit of inclined planes.

☞ The Union Pacific Railroad Company has bored six artesian wells in the arid districts to obtain water supplies for their locomotives. All of them were successful, and from several the water rises above the surface. At Rock Springs the water rises from a depth of 1145 feet, 26 feet above the surface, and discharges 571 gallons per hour, and at the surface, 960 gallons. The wells have more than paid for themselves.

What the Locomotive has done for California.

The centuries of the past divide themselves into eras made illustrious by special things. In the sepulcher of history we find recorded the bloody deeds and military conquests, that marked the days of chivalry. The classic ages—the age of oratory, poetry and song—of art and science, follow each, or repeat themselves. This is the age of iron. The true chivalryman of to day is the red-shirted engineer. The railroad builder is the modern revolutionist. He is constantly making a new geography, and changing or reversing the currents of the commerce and the population of the world. When the Duke of Wellington saw the first locomotive of the first English railway roll out of her depot at Manchester, he exclaimed: "There goes the aristocracy of England." And he was right. For since that eventful day the locomotive has so enriched the men who manufacture and trade and control the commerce of England, and at the same time so vastly broken through the barriers that so long divided them from the hereditary families and born rulers until to day a majority of the seats in Parliament are held by men who commenced life without rank or title. It has been but a few years since the first locomotive engine in this State rolled out of Sacramento; and at the sight of it the remark might have truthfully been made: There goes old California; a new and better condition of things has commenced." These reflections are suggested from reading the exhaustive testimony of Leland Stanford before the Senate Committee on corporations, a few evenings ago. Among other striking remarks, he made the following:

"Why, there is not a locomotive which runs a mile in this State of California but has brought a blessing—a blessing substantial and real, upon some portion of the State. The influence of every mile an engine travels is for the good and prosperity of the State and the people. Only the other day I was looking at the first engine we ever had, here in the freight yard. She is in good order still, and doing hard work every day. Why, the benefits that locomotive has conferred upon the people of this State are incalculable, moving as it has, nearly every passenger car, and almost every ton of freight which has entered this State, or gone from it, in her work of making up trains and expediting their forwarding. Talk about gains and benefits; such benefits rise above everything these men who are misrepresenting us as can say or do."

The President of the Central Pacific might have gone further and said, with perfect truth, that the people of the whole United States have been benefited by this pioneer engine, for this, if for no other reason. It has assisted to transport millions worth of machinery and supplies to the mines, and also assisted to bring back a great many millions of gold and silver. This bullion has so materially influenced our foreign exchanges, and at the same time enhanced the purchasing power of the national paper currency, as to thereby indirectly benefit every man, woman and child in the United States. But for the increased products of the Nevada mines, largely caused by railroad facilities, the Eastern States would probably have been to-day, nearly as far removed from specie payments as they were ten years ago, when gold commanded over one hundred per cent. premium instead of twelve per cent. premium as now.

It is a fact that more than 200 mines have been developed and worked in Nevada, Utah, Idaho, and Montana, that would have remained untouched and unproductive, had not the Pacific Railroad been built. Whole mining districts that have since acquired a world-wide fame, have been opened up by the locomotive. Further than this, it is very doubtful if the great Comstock lode would have produced anything like what it actually has during the past few years, if no railroad had been built over the Sierras. More than $15,000,000 was paid for hauling freight by wagons to Virginia City from this side of the mountains in 1862. Since the railroad was completed, a larger amount of freight was transported by it to the same destination for $1,250,000, it costing about thirteen times as much by teams as by the railroad. This saving of nearly $14,000,000 per annum to mine owners, and to workmen and artisans of Virginia City, has undoubtedly given them the means to explore and excavate, through long years of disappointment and failure, some of the mines that have at last yielded such enormous returns.

Indeed, had the high price of supplies and material, and as a consequence the high price of labor, remained as they were before the railroad came to cheapen them, it is more than probable that the great mines of Crown Point and Belcher would have been finally abandoned during the years when they had nothing to give but assessments. The same increase of facilities and cheapening of supplies has rendered vast amounts of low grade ores available for milling that were worthless before. Take away these, together with the dividend paying mines on the Comstock, and the yield of that famous lode would not be one-fourth what it is with or without them. And the State of Nevada, instead of giving us now $35,000,000 a year, would probably have sent less than $10,000,000. The loss of $25,000,000 in silver per annum, during the past few years, to California (where these mines are mostly owned) and to the nation at large, would have been almost incalculable. Not so much on account of the intrinsic value of the dollars as for the effect the loss of so much hard money would have on all kinds of property, and in the disturbing of business affairs. When, in the early part of this century, the great mines of South America suddenly gave out, the whole commercial world was thrown into a panic. Its increasing business had become so accustomed to absorbing the regular amounts these mines supplied that their stoppage caused the greatest paralysis of trade, the utmost stringency in the money markets, and the failure of many banking and mercantile firms, both in Europe and America. And it is thought by reading and intelligent men that the giving out of the Comstock mines and a sudden falling off in the yield of those in California and Pacific Territories, any time during the past ten years, would have caused a hurricane in the commercial world unequaled in scope and extent by all the panics that ever preceded it. Previous to 1848 the annual product of all the gold and silver mines in the world did not exceed $20,000,000. The Pacific States and Territories alone last year yielded $75,000,000.

A large annual amount of gold and silver from this coast is now a necessity. The equilibrum of business, increased values and the growing commerce of the world requires it. A serious falling off would carry ruin and bankruptcy into every business circle. How far the building of the railroads has prevented this, and thereby benefited everybody, the above facts show.

But, in a narrower sense, what a change this pioneer locomotive, of which Governor Stanford speaks, and those that have been brought or built here since have wrought in this State. These engines have become, in fact, the lungs of California. They daily and hourly draw in and send out the life blood of this commonwealth. They throb in every business artery of the State. They have created more wealth, developed our country and multiplied our privileges more than every other agency combined. For several years before the commencement of the Pacific Railroad California had been almost at a standstill. Her assessed wealth had increased (see Controller's report) less than $50,000,000 in six years. Her entire average of wheat fields was in 1863 but 263,208 acres—less than it was in 1859, when 270,000 acres were sown. Her population of able-bodied men was decreasing on account of the partial failure of her gold mines, and the better prospects for mining in the adjacent Territories. There were 25,000 less votes cast in this State in 1863 than there were in 1861. There was but little money in the banks. Business was dull, and the State was certainly not advancing in prosperity. And when we consider the number of dry years that have occurred in our history since then, and when we consider the stoppage of the war in 1865, whereby our gold lost so much of its premium that it made business with the Atlantic States far less profitable than it was during the rebellion, and when also we consider that immigration to this State had been slowly but constantly diminishing for several years prior to 1863—when all these things are considered, who can doubt that the California of 1873 would have been at least but little ahead of the California of 1863, in point of wealth and population, if some new factor had not entered into her prosperity, some new and immense works projected within her domains, some revolution that should stop the decay and break the dead-lock that was so apparent in the business of California at that time! That revolution came. In 1863 the building of the Central Pacific was commenced, and a change for the better in the prosperity of California began, and it has been going on ever since, as the following statistics conclusively show: In 1863, the total agricultural product of California was in round numbers $15,000,000; in 1873 it was valued at $75,000,000— an advance of 500 per cent. In 1863 the number of bushels of wheat produced was 4,147,469; in 1873, according to the Surveyor General's report, 26,689,664 bushels were grown.

In 1860 the agricultural product of California averaged $350 to each inhabitant; in 1870, the year after the railroad was finished, it averaged $1,250 to each inhabitant. In 1862 the total assessed value of property in this State amounted to $160,369,071 81; in 1872 it footed up $637,232,823 31. Taking off one-third from the figures of 1872 on account of the recent rules governing assessors, and there still remains an increase of over $250,000,000 to the property-holders of the State during the ten years the Pacific Railroad and its branches were being built. The history of the whole world shows nothing to equal this. Especially is it so when we take into consideration the fact that our population between 1860 and 1870 had increased but 180,000, or only 46½ per cent. What else could have caused the astonishing increase in the wealth of California during these years but the building of a system of railroads of which the Central Pacific is the back-bone? We have seen that before the railroad era commenced here, wheat growing was confined to a fringe of country adjoining the Sacramento and San Joaquin rivers, and a few little spots along the ocean and around the bay of San Francisco. The locomotive has since widened this area, and made available millions of acres, for not alone wheat, but all kinds of diversified agriculture.

In 1863 there were but $8,000,000 deposited in all our savings banks. After ten years of railroading in California the deposits have increased to $47,000,000. And the statistics furnished by the State Board of Equalization show the further wonderful fact that in 1873 the amount of money owned and loaned out by the many small and few large capitalists in this State amounted to $98,118,058—a sum greater than the entire assessed property of the State in 1856—a sum equal to about one-fourth the entire greenback currency of this nation. That California is the richest region of country in the world by several hundred per cent, in proportion to her population, there can be no doubt. Let us briefly see how much of this unparalleled prosperity is due to the pioneer locomotive, of which Governor Stanford so affectionately speaks, and to the railroad system generally. More than $60,000,000 has been drawn from abroad into California to build these roads. It has been mostly expended here and remains here; and outside of the vast benefits the railroad itself has conferred, this money itself is a gigantic power which has been added to the permanent wealth of the State. The railroad company no longer owns it, but the people of California do.

Besides this, the operating expenses of the Central Pacific (which are entirely outside of its con-

(Continued on Page 647.)

RAILROAD EARNINGS—MONTHLY.

(Continued from Page 645.)

struction expenses) have amounted to over $20,000,000 during the past nine years. This has mostly been paid out in wages to men who live here, and for supplies furnished by our merchants, manufacturers and farmers. And thus another large addition has been made by the railroad to our circulating capital. Seventy-five thousand Eastern visitors have come here since the overland railroad was completed to see our Yosemite and other wonders, and who never would have come had they been compelled to endure the hardships, loss of time and inconveniences of an ocean voyage to get here. It is a low estimate to say that these tourists expend an average of $300 each in this State. But at this figure these Eastern visitors have added over $22,000,000 to the finances of our people. More than this, at least, 50,000 Californians have visited the Eastern States during the past four years. Had there been no transcontinental railroad, according to former steamer rates they would have been charged $300 each way, and the time consumed in making the journey to and from, forty-eight days. Now, a ticket to New York by rail is but $140 in greenbacks, the time seven days. The saving of thirty-ty-four days in time, at $2 per day, together with the amount saved in fares, amounts in the aggregate to another $20,000,000 retained in this State by reason of a Pacific Railroad. The saving in freight charges, both to consumers and producers, has not been less than $25,000,000 since the railroad was first opened, from what they would have been by former modes of transportation.

Forty new villages have sprung up along the lines of these roads, the direct creation of the locomotive. Five hundred million feet of lumber has been cut and transported from the Sierras alone, during the past seven years, that would have remained untouched but for the railroad. The whole wealth of the State of Nevada has been brought to our doors by the same agency, and a good proportion of that of Utah and Montana also. Real estate in San Francisco alone, during the building of the Pacific Railroad, advanced $50,000,000 in value in anticipation of the benefits it would confer when completed; while the opening of branch lines and the completion of the trunk road has advanced the price of agricultural and timber lands, in some instances, from $2 50 to $75 an acre, and upon nearly all lands situated within a few miles of these roads the increase in value has been from 300 to 500 per cent. Putting the above facts together, and we see at a glance that the locomotive has been the main cause of the almost miraculous prosperity of the State during the past ten years—the cause, in fact, of our now being two hundred and fifty million dollars richer, as a State, than we were in 1862. And yet, in the face of such facts and figures as these, it is seriously proposed by the Freeman bill to break down or cripple the very agency that has produced such grand results, and which has made California one of the foremost States in the Union. Could madness further go? Governor Stanford tells us that in the making up of freight trains in the Sacramento yard, Engine No. 1 has moved nearly every pound of freight that has ever passed over the Central Pacific. The enormous work done by this one locomotive can scarcely be imagined. Take only last year's business, and we find by the Freight Agent's report, 1,142,780,000 pounds were transported over the Central Pacific or 571,365 tons. Giving ten tons to the car, we have 57,136 cars. As these cars each measure about 40 feet, the total length of freight trains hauled by this one locomotive in a single year would, if standing together on a single track, reach a distance of 418 miles, a train as long as the State of New York. And what is more astonishing still, about all the commerce these cars and this engine have been, and still are, transporting, has been created, so to speak, by the railroad.

The annual tonnage of the Sacramento and San Joaquin rivers, taken together, and the tonnage that passes through Golden Gate, is larger now than it was before the Central Pacific was built, just as more business was done over the Erie canal and Hudson river after the completion of railroads alongside of them. So our California system of railroads, while taking to themselves and building up a vast trade and commerce of their own, they have, at the same time, diminished in no way the aggregate of the freight transported by other channels. It was said of the Erie Railroad that in five years after its completion it was transporting more local produce than was ever grown in the country through which it passed before that road was built. And this will be said with equal truth of every one of our California railroads—that in five years after they were completed, the local freight annually shipped over them is more than double all that was produced or required for the country through which they run any year before the road was built. That this extensive interior commerce, built up entirely by our railroads, and which enriches or benefits in one way or another every industrious and honest inhabitant in the State, will continue to increase in the future as in the past, no one can doubt who examines the statistics of the older States that commenced building railways twenty or thirty years ago. The wealth, population and property of these States has advanced in exact ratio to the increase of their railroad facilities.

Here in California we have yet to build three and four times the number of iron highways that we already have, before our largest prosperity is assured. Out of 40,000,000 acres of tillable land within our borders, less than 3,000,000 have ever been cultivated; and out of the 100,000,000 acres in the whole State, less than 5,000,000 are inclosed. When the locomotive shall have penetrated into every fertile valley of her rich domain, California will have become not only the Empire State of the Pacific, but the Imperial Empire State of the Union.—*Daily Alta.*

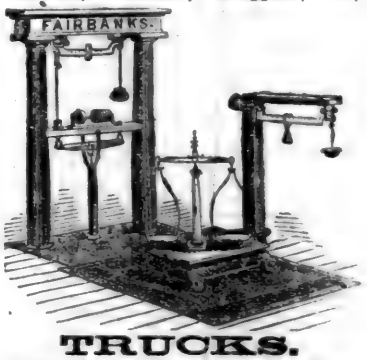
☞ The Chicago and North Pacific Air Line Railroad Company signified its intention, on the 9th inst., of accepting the portion of the St. Croix land grant conferred upon it by the law of last winter, and filed bonds with the Secretary of State to fulfill the terms of the grant.

ENVELOPES.

SAMUEL RAYNOR & CO.
115 & 117 William Street, N Y.

Manufacture every style of Envelope, from the smallest drug size to the largest Official Size, and of any pattern, shape, or quality, including White or Blue Cloth Lined, Parchment and Manilla paper. Railroads, Express Companies, Banks Insurance Companies, Brokers, Merchants and others supplied with every style that may be wanted. Samples given when requested.

THE ILLINOIS CENTRAL RAILROAD COMpany offers par and a premium of one per cent. (101 per cent.), with accrued interest, for any of its construction mortgage bonds presented for prepayment prior to July 1, 1874, at its office in New York.



The outstanding balance of its Construction Mortgage Debt is about $3,000,000. These Bonds mature April 1, 1875.

L V. F. RANDOLPH,
Assistant Treasurer.

Commerce of New York.

The foreign imports at New York for the month of April, 1873 and 1874, are officially stated as follows:

	1873.	1874.
Entered for consumpt'n.	$14,768,289	$15,264,417
Do. for warehousing	14,189,071	13,156,559
Free goods	7,639,863	12,148,979
Specie and bullion	582,253	194,972
Total entered at port...	$37,179,426	$40,764,927
Withdrawn fr. wareh'use	11,241,194	10,216,151

The foreign imports at New York for four months from January 1, were:

	1873.	1874.
Entered for consumpt'n.	$71,375,103	$63,815,578
Do. for warehousing...	48,105,657	41,968,991
Free goods	36,158,662	42,062,457
Specie and bullion.....	1,644,833	1,267,664
Total entered at port....	$157,284,255	$149,114,690
Withdrawn fr. wareh'se.	44,083,091	41,080,191

The foreign imports at New York for ten months ending April 30, were:

	1873.	1874.
Six months.....	$199,826,050	$177,517,854
January.....	37,803,691	30,310,679
February	38,860,517	35,439,638
March....	43,440,621	42,599,446
April....	37,179,426	40,764,927
Total for 10 months...	$356,610,305	$326,632,544
Deduct specie....	6,461,463	17,081,570
Total mdse.	$350,148,842	$309,550,974

The duties received at New York for ten months from July 1, were:

	1873.	1874.
Six months.....	$64,393,092 93	$53,535,419 05
January.....	10,763,626 44	10,042,084 05
February..... ...	12,893,637 89	10,186,365 08
March..	12,101,274 64	10,793,792 81
April....	9,826,491 32	9,596,770 71
Ten months.....	$109,978,123 22	$94,154,431 70

The exports from New York to foreign ports in the month of April, were:

	1873.	1874.
Domestic produce	$24,622,926	$22,272,739
Foreign free goods	197,907	193,200
Do. dutiable.....	898,935	835,357
Specie and bullion	3,850,840	2,467,005
Total exports	$29,470,608	$25,768,301
Do. exclusive of specie.	25,619,768	23,301,296

The exports from New York to foreign ports for four months from January 1, were:

	1873.	1874.
Domestic produce	$85,428,164	$87,108,401
Foreign free goods	926,751	701,913
Do. dutiable	2,441,614	2,581,449
Specie and bullion	18,219,705	10,646,197
Total exports	$107,011,234	$101,037,960
Do. exclusive of specie..	88,791,529	90,391,763

The exports (exclusive of specie) from New York to foreign ports for ten months ending with April, were:

	1873.	1874.
Six months	$130,400,814	$160,757,524
January.....	20,050,550	23,455,638
February.....	21,189,002	20,725,611
March....	21,982 209	22,909,218
April....	25,619,768	23,301,296
Total produce....	$219,192,343	$251,149,287
Add specie.	53,063,848	31,486,574
Total exports.....	$272,256,191	$282,635,861

☞ The surveyors on the Wisconsin Valley Railroad have completed their second survey between Wausau and Knowlton.

Protracted Litigation.

The Troy *Times* gives the following in relation to the celebrated suit brought in the name of T. W. Park against the Troy and Boston Railroad Company:

About the year 1857 the Trustees of the Western Vermont Railroad leased their road to the Troy and Boston Company for ten years, the agreement being that the road was to be returned in as good condition as when leased. At the expiration of the lease the road was turned over to the original Trustees represented by Messrs. Knapp & Briggs. They alleged then that the stock had depreciated in value under the management of the Troy and Boston Company, and an action was commenced in their behalf by T. W. Park for damages. The case was taken to the Supreme Court of the State of Vermont, and was then transferred to the United States District Court. It was tried two years ago, when a verdict of no cause of action was rendered. This was a victory for the Troy and Boston Company, and the case was considered ended. It was appealed, however, by the plaintiffs to the United States Supreme Court, and we learn by telegraph that on Tuesday the court decided to reverse the judgment of the district court, and send the case back for a new trial. This revives the case again, and years may pass before it is finally settled. On the first trial A. P. Gordon, of Bennington, Vt., and Davenport, of Brattleboro, Vt., appeared for the railroad company, and E. G. Phelps, of Burlington, for the plaintiffs. This case is the one that caused so much trouble between the Troy and Boston Company and T. W. Park in 1857, when the former were not allowed to cross the Vermont line, and when Park seized a quantity of their rolling stock. At that time an extra session of the Vermont State Legislature was called to settle the difficulty, and some special legislation was had for the benefit of the Park faction. The case is looked upon with a great deal of interest by railroad men and residents of Vermont generally. Great excitement was occasioned in Bennington and near the State line by the seizures in 1867.

Car Ventilation.

The Boston *Post* thus describes a new system of car ventilation, which was recently tested on the Boston and Albany Railroad in the presence of a party of scientific gentlemen:

Upon the centre of the axletree of one of the trucks is securely fastened a driving pulley 22½ inches in diameter; from the driving pulley runs a small triangular belt 1½ inches wide over another pulley 4½ inches in diameter attached to a fan made of galvanized sheet iron upon a steel shaft. This constitutes the entire mechanical adjustment for putting in motion the required supply of air. Ordinary car wheels are 33 inches in diameter, or 8.64 feet in circumference; hence in passing over a mile of track the wheels will make 611 revolutions, and the size of the pulleys being as 1 to 5, the fan will revolve 3,055 times; that is, when the train moves at, say one-third of a mile per minute, or 20 miles per hour, the fan revolves at about 1,000 per minute, or 1,500 at 30 miles per hour. To conduct the air, which has been excited and put in motion by the centrifugal force of the fan, to the top of the car, and to distribute the same evenly, the fan is surrounded by an elongated sheathing of wood, which may be seen under the car, and which is continued by a tin conducting tube through the closet to the distributing pipes, which in turn emit the air into the car. This sheathing being air-tight, the fan is, so to speak, hermetically sealed, and none of the outside air can get to it or feed it except that which passes through the air chamber. Since all the air which finds its way into the air chamber must pass through the fine screens, which are inserted in place of the window glass, the dust and cinders must be left outside the car.

The Committee on Observations reported the following results: Cascarilla bark was burned in the air-chamber and diffused throughout the car. A small quantity of cologne was placed in the air-chamber, and the odor was immediately perceived in every part of the car. The same effect was observed when smoke was made in the air-chamber, which found its way at once in a uniform diffusion in the car. The air was then shut off, and the car was filled with a dense lot of smoke; upon admitting air, the smoke was principally removed in three minutes, and in six minutes and thirty-six seconds the car was entirely clear. Notwithstanding the large amount of air taken into the car, there was no dust from the roadbed nor cinders from the engine.

Removal of Railroad Suits.

The suit of the people against the Chicago and Alton Railroad Company has been carried up by certiorari, from the Circuit Court of Sangammon county, Ill., to the United States Circuit Court. The petition of the railroad company alleges that the railroad law of Illinois is contrary to the Constitution of the United States, and that if the suit pending is tried in the State Court, the company will be deprived of the rights, privileges, and immunities secured to it by the Constitution of the United States. The Chicago *Tribune* adds:

It is understood that all the cases brought by the Railroad Commissioners will on like process be removed into the United States Courts, and incidentally it is stated that such will be the course taken in Wisconsin and other States where railroad legislation has been had. The attorneys will doubtless plead to the jurisdiction of the Federal Courts, but an opinion prevails that the plea will be unavailing.

☞ At a meeting of the directors of the Martha's Vineyard Railroad Company, in New Bedford, Mass., on the 12th inst., it was voted to put the building of the road under contract as soon as possible. It is to extend from Vineyard Grove through Edgartown to Katatama, near the south shore of the island. The stock is nearly all subscribed. The road is to be narrow gauge and operated by steam. Mr. S. L. Minot, the engineer of the company, was instructed to advertise for proposals for constructing the road from Oak Bluffs to Edgartown, a distance of nine miles.

☞ The Hanging Rock (Narrow Gauge) Railroad company, with a capital stock of $2,000,000, has been incorporated. The proposed line of the road is from Columbus, Ohio, through Franklin county, Pickaway, Hocking, Vinton, Meigs and Jackson.

RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh Rails**, and of any required weight and pattern.

PERKINS, LIVINGSTON, POST & Co.,
59 Liberty Street,
NEW YORK.

PHILIP G. SCHOFIELD,

(Successor to PETER SCHOFIELD,)
MANUFACTURER OF
STEAM VACUUM & HYDRAULIC
GAUGES,
AND
LOCOMOTIVE SPRING BALANCES,
Frankford Road & Seargeant St.
PHILADELPHIA.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, May 23, 1874.

Stock Exchange and Money Market.

The Money market has been unusually easy for responsible borrowers on call, the prevailing rates to the best class of Stock Exchange firms having been 3@4, and to the leading dealers in the public funds 2@3 per cent. At these very low figures, the offerings of Money have been in excess of the requirements of prominent street houses. The discount market has also been working more comfortably for the mercantile borrowers, and the best grades of business paper have been in demand within the modified range of 5@7 per cent per annum. The City banks, in their last weekly statement, were $158,300 higher on their deposits, and $1,916,100 lower on their loans and discounts, than the week before. The legal tender notes were augmented $1,302,300, and the specie reserve reduced $3,900. The circulation was enlarged $1,700. The U. S. Sub-Treasury at this port has again gained handsomely in the line of its currency reserve, while further reducing its coin hoard mainly through May interest disbursements. The U. S. Sub Treasury in this city closed the week with a currency balance of $41,622,834, against $39,991,528 the preceding week; and a coin hoard of $58,280,819, against $54,952,953 on the previous return. The City bank exchanges, during the week, were $430,272,447, or a daily average of $71,212,075. The customs revenue of the port, during the week, was $2,071,000, of which $1,869,894 were in coin certificates. The City banks reported their average of gold last week at $27,301,600, and their greenback average at $57,100,800. Their deposits stood at $236,395,000. The loan item was about 284½ millions. The circulation was $26,928,900.

The cash balances of the Treasury Department on Wednesday were: Currency, $10,651,482; special deposits of legal tender for redemption of certificates of deposit, $55,390,000; coin, $87,875,078; including coin certificates, $35,908,400.

The outstanding amount of legal tender notes is yet 382 millions; and of National bank circulation 348⅞ millions.

Government has received about 89 millions from internal revenue, thus far in the current fiscal year.

Gold has been moving comparatively slowly. The speculative demand has been much tamer. The export drain has been the most important feature of the week's operations. The customs call has been moderate. The extremes of the price have been 111¾@112⅝ closing at 112⅛, as against 112⅛ on Wednesday of the preceding week. The specie outflow, last week, was $2,665,837. The imports of specie at this port since Jan. 1, have been $1,622,784, against $1,716,510 same time last year. The customs demand for Gold last week averaged $334,512 a day. Foreign Exchange has been comparatively dull, most of the week, closing steady as to rates. Bankers' sixty day bills on London closed on Wednesday at $4 88@$4 88⅛; sight bills on London, at $4 91@$4 91⅛. The week's exports of Domestic Produce have been to the currency value of $6,604,654.

Government securities have been more sought after toward the close, especially for investment purposes, and prices have been quoted firm, notwithstanding the depression in Gold. U. S. sixes of 1881 closed on Wednesday of this week at 121⅜@121⅝; U. S. Five-Twenties of 1862, 115¼@115¾; U. S. Five-Twenties of 1864 at 117⅞@118; U. S. Five-Twenties of 1865, 117⅞@118; U. S. Five-Twenties of 1865 consolidated, 119⅜@119⅝; U. S. Five-Twenties of 1867, 120⅜@120½; U. S. Five-Twenties of 1868, 120⅜@120⅝; U. S. Ten-forties at 114¾@115; U. S. Fives of 1881, (Funding Loan) 115@115¼; Six per cent. currency Sixes from 116⅝; @116⅞.

State and Railway bonds have been less sought after and quoted easier in price. Central Pacific first mortgage six per cents have been quoted lower closing at 91½@92; Western Pacific sixes, 86½@87. Chesapeake and Ohio First Mortgage Bonds, Six per cents, have been inactive, and quoted at from 51@52½. Railway and miscellaneous share property has been less freely dealt in, and quoted easier and irregular in price.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $7,528,869, against $7,878,263 same week last year. The exports of domestic produce are $6,604,654, as against $5,482,894, last year. The exports of Gold and Silver, $2,665,836, as against $881,000 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $2,072,000, as against $2,338,299, same week last year.

General business has been fairly active in the line of domestic produce, with Breadstuffs, Cotton, and Provisions, quoted firmer in price. The dealings in foreign merchandise have been on a limited scale, and values have shown much irregularity. The Metal trade has been devoid of life in all branches, and quotations in many instances have been more or less nominal. Eglinton Pig Iron quoted at $34 50@$36. Glengarnock, $37 50@$38; Coltness, $39@$39 50; No. 1 American Pig at $35; No. 2 do. at $31@$33; Forge, $29@$31; English Rails at $55@$60, gold; American Rails at works, $60@$65; Old Rails, $40@$41. Wrought Scrap, $41@42 50. The Ocean freight market has shown more activity toward the close, with the main inquiry for accommodation from grain and Petroleum shippers. The Cotton receipts, of the week were only 26,000 bales, against 41,000 same week last year. For the crop year, to date, the total is 3,604,000 against 3,342,000 last year, and 3,715,000 in 1871, when the whole crop reached 4,347,000. The Cotton market is firm under the strong impression that the crop will fall 200,000 or 300,000 bales below the estimates current a few months ago.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Atlantic and Pacific R. R. pref., 14; St. Louis, Kansas City and Northern pref., 27; New Jersey Southern R. R., 7; St. Louis and Iron Mt. R. R., 16@16⅞; George's Creek Coal, 134@149⅞.

Union Pacific Railroad.

The earnings of the Union Pacific Railroad for March, 1874, were $687,026 15, the expenses $339,080 50, and the net earnings $347,945 65. In March, 1873, the earnings were $708,256 53, the expenses, $330,800 10, and the net earnings $377,456 43—showing a decrease in earnings of $21,230 38, with an increase in expenses of $8,280 40, making a decrease in net earnings of $29,510 78. For the two months ending March 31, 1874, the earnings were $1,915,731 64, the expenses $1,023,995 31, and the net earnings $891,736 33—showing an increase in earnings, as compared with the corresponding period of the previous year, of $191,716 70, in expenses of $52,599 59, and in net earnings of $139,117 11.

☞ The earnings of the leading railroads of the country are increasing, which affords a pretty good evidence that trade and industry are reviving. The railroads collect the crops and other products of the regions they traverse, and distribute them for domestic consumption or foreign use. They also show the distribution of imported merchandise and the current of travel. They, therefore, represent average business and progress. Though the panic found them very much expanded, they have stood up well under it, and shown great recuperative energy. Enough of the year has now elapsed to indicate the whole, and the result is proof that 1874 will close with a good account of our vast and widely extended system.

Cheshire Railroad.

At the annual meeting of this company, held at Keene, N. H., on the 13th inst., the following gentlemen were unanimously elected directors: E. Murdock, Jr., T. M. Edwards, Wm. A. Brigham, Jno. Hy Elliot, Samuel Gould, Isaac M. Murdock, George F. Williams.

The report of the directors shows the road to be in a very prosperous condition. The net earnings for the year have been $142,544 36. The indebtedness of the road has been reduced about $29,000 during this year in addition to the payment of a five per cent. dividend. The construction account of the road was closed fifteen years ago, and all new work is carried to expense account.

The gross receipts have fallen off about $20,000, caused by reduction of rates, the tonnage carried having been equal to former years. The road and all its equipments are in thorough repair. All renewals of rails have been of steel.

It is proposed during the coming year to substitute iron bridges for the wooden structures and to add other permanent improvements. E. Murdock, Jr., remains President, and J. Hy. Elliot, Clerk.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending May 9, at 457,961 tons, and for the coal year 5,449,354 tons, against 5,656,752 tons to corresponding time last year, being a decrease of 207,218 tons. The bituminous tonnage for the week is 78,981 tons, and for the year 989,944 tons, against 931,658 tons to same time last year, giving a total of all kinds for the week of 536,842 tons, and for the year of 6,439,478 tons, against 6,588,410 tons to same time last year, being a decrease of 148,932 tons.

☞ At the annual meeting of the St. Louis, Jerseyville and Springfield Railroad Company, held at Jerseyville, Ills., on the 6th inst., Hugh N. Cross of Jerseyville was chosen President, Robt. H. Parks of St. Charles, Mo., Vice President, Morris R. Lock of Jerseyville Secretary and Treasurer, and Col. J. B. Moulton of St. Louis, Mo., Chief Engineer. At an adjourned meeting, to be held on the 27th inst., the immediate construction of the road is made the special order of business.

☞ Gerard B. Allen has been elected President, Robert T. Kennedy Vice President, J. H. Britton Treasurer, Jas. B. Eads Chief Engineer, and Geo. C. Fabian, Secretary and Auditor of the St. Louis and Illinois Bridge Company. The Executive committee are: Wm. Taussig, J. H. Britton and J. R. Lionberger. Construction committee: Geo. Knapp, John Jackson and Lewis B. Parsons.

☞ The directors of the Brooklyn Steam Transit Company have elected the following officers: S. B. Chittendon, President; William H. Taylor, Vice President; William R. Sheldon, Secretary; Henry W. Sage, Treasurer. Executive Committee—S. B. Chittendon, Henry W. Sage, Alfred S. Barnes, Robert Turner, Nathan G. Morgan.

St. Louis, Iron Mt. and Southern Railway.

The directors of the consolidated company are: Thomas Allen, Gerard B. Allen, S. D. Barlow, S. H. Laflin, Samuel Copp, W. R. Allen, St. Louis; Wm. H. Swift, H. G. Marquand, W. J. Blodgett, George Cabot Ward, John Bigelow, New York; N. M. Rose, J. M. Loughborough, Little Rock. The officers are: Thomas Allen, President; H. G. Marquand, Vice President; D. W. McWilliams, Treasurer; S. D. Barlow, Secretary; Thomas McKissock, General Superintendent; James H. Morley, Chief Engineer; James M. Loughborough, Land Commissioner. The directors have decided to call in and cancel the old stock and old bonds, and new ones will take their place. Arrangements have been made with the International road of Texas by which trains will be run through to Austin via Houston. The road now has a total length of 686 miles. The office of the Treasurer of the late Cairo and Fulton road and of the Arkansas branch of the Iron Mountain are abolished.

Erie Railway.

Executive Order No. 23, bearing date of May 9, 1874, states that the third and fourth Vice Presidents (offices heretofore filled by Mr. Henry Tyson and Mr. James C. Clarke), having resigned, their offices are discontinued. Hereafter the railway of the company will be under the charge of a General Manager, assisted by a Superintendent of Transportation, a Chief Engineer and a Superintendent of Rolling Stock, all these officers to be appointed or dismissed by the General Manager, with the approval of the President. Mr. James C. Clarke, late third Vice President, is appointed General Manager.

☞ The exports from Philadelphia for the month of April amounted to $2,126,901, of which $837,602 were in American and $1,289,299 in foreign vessels. The value of the principal articles exported was: Petroleum, $647,872; Indian Corn, $288,344; Wheat, $294,407; Flour, $98,583; Cotton, $135,530; Hides, $60,488; Iron Manufactures, $59,075; Provisions, $186,589; Tallow, $48,387; Cooperage, $110,336.

☞ The directors of the Central Vermont Railway Company, recently elected, are: B. P. Cheney, Boston; Jacob Edwards, Boston; G. M. Rice, Worcester, Mass; John H. Kimball, Bath, Me.; John Q. Hoyt, New-York; John S. Schultz, New York; James A. Langdon, Montpelier; John B. Page, Rutland; J. Gregory Smith, St. Albans; James W. Hicock, Burlington; W. C. Smith, St. Albans; Joseph, Clark, Milton; Jacob Estey, Brattleboro.

☞ The coupon due July, 1859, on the Preferred Construction Bonds of the Chesapeake and Ohio Canal Company, will be paid at the Banking House of Alexander Brown & Sons, Baltimore, on and after the 26th inst.

☞ It is reported that the North Wisconsin Railroad Company has already begun preparations for an early commencement and vigorous prosecution of work on its road north from Hudson.

☞ Work on the Chicago and Illinois River Railroad is rapidly pushing forward. The contractors are at work between Braidwood and Streator.

Rome, Watertown and Ogdensburgh Railroad.

The Rome, Watertown and Ogdensburgh Railroad Company have recently acquired the control of the Syracuse Northern and the Lake Ontario Shore railroads, thereby obtaining, when the latter road is completed, a through line from Niagara Falls to Ogdensburgh, where it will connect with the Portland and Ogdensburgh Railroad, with branches to Syracuse, Rome and Cape Vincent. This arrangement gives the Rome, Watertown and Ogdensburgh Railroad company the control of the business of Northern New York. The net earnings of this road during the first quarter of the year show an increase of $34,000 over last year, which is equivalent to more than one per cent on the capital stock.

☞ The charter of the Joliet and Northwestern Railway Company was recorded at the Circuit Clerk's office in Joliet, Ills, on the 2d inst. The new line will extend from Joliet to Elgin via Aurora. The amount of capital stock of the corporation will be $500,000, divided into 5,000 shares of $100 each. The office of the company will be at Joliet.

COMMERCIAL WAREHOUSE CO.—CASH CAPITAL, $2,000,000—Office, 29 William street, corner Exchange place; warehouses, Atlantic Dock, Brooklyn. Cash advances made on first class securities on demand and time. Cash advances made on all kinds of merchandise stored in our own warehouses or consigned to us on favorable terms.

PAUL J. ARMOUR, President.
JOSE F. NAVARRO, Vice President.
JOHN BAIRD, Second Vice President.
FELICIANO LATASA, Third Vice President.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

American Railroad Journal.

New York, Saturday, May 30, 1874.

Union Pacific Railroad.

The Land Department of the Union Pacific Railroad Company reports the sales of land for the month of April, 1874, at 30,278.38 acres for $140,636 30, or an average price per acre of $4 64. The total sales to April 30, 1874, have been 936,638.29 acres, for $4,260,939 13, or an average price per acre of $4 55. The lands belonging to the company remaining unsold, now amount to 11,143,361.71 acres.

Land grant bonds issued		$10,400,000
Less bonds cancelled by land department	$1,503,000	
Less bonds cancelled by trustees	552,000	
		2,055,000
Leaving bonds outstanding April 30, 1874		$8,345,000 00
Land notes on hand, April 30, 1874 —principal (interest not included)		$2,369,785 04
Cash in hands of trustees for the purchase of land grant bonds, April 30, 1874		$80,000 00

Junction and Breakwater Railroad.

We stated some weeks' since that Mr. Hinckley, president of the Philadelphia, Wilmington and Baltimore Railroad Company, had purchased of Mr. Baumgardner for $93,000 a controlling interest in the Junction and Breakwater Railroad, subject to the approval of the directors of the company named. According to the Wilmington (Del.) *Commercial:*

The facts are that the matter is still unsettled. The Boston capitalists, who hold the greater part of the stock in the Philadelphia, Wilmington and Baltimore Company, believe that the best policy of the corporation is to stick to business closely on the main stem road, avoiding the purchase or lease of feeders or branches whenever possible. They point to the fact that during some part of the time that the Delaware Railroad has been leased by them it fell short of earning the six per cent guaranteed to its stockholders, and they are opposed to further acquisition of lines unremunerative in themselves.

In deference, therefore, to the strong opposition of the Boston stockholders, the directors have not approved the negotiations, and there is no certainty that they will. Other arrangements are mooted, but so far as the Philadelphia, Wilmington and Baltimore directors are concerned, there will have to be a decided change in the minds of some of them before their corporation will become the purchaser of the Junction and Breakwater.

The Coal Fields of Alabama.

Mr. ABRAM S. HEWITT, in his report as United States Commissioner to the Paris Exposition of 1867, upon the production of iron and steel in its economic and social relations, said that in the United States, the cheapest region for the manufacture of pig iron as yet extensively developed, is on the Lehigh river, in Pennsylvania. He predicted, however, that when the iron business should be established along the great valley which extends from Virginia to Alabama, the labor of bringing the coal and the ore together would be considerably less than on the Lehigh river; and that it would be possible to manufacture iron there to any required quantity, with as little labor—a most important element of cost—as is required for the production of iron in the Cleveland district in Great Britain. The coal fields and iron ores of Alabama are beginning to attract the attention of capitalists, and a writer in the *Courier Journal* gives some interesting information relating to the former. There are two distinct, well-defined coal fields in the State differing alike in quantity and quality, known as the Black Warrior and Cahaba fields. The first embraces about 5000 square miles, yields a bituminous coal which burns freely, cokes well, and makes good gas. The Cahaba coal field for the most part lies between the Selma, Rome and Dalton railroad and the Cahaba river, and yields a better coal for general use than the other, though it is more expensive to mine on account of troublesome bands of shale. About three-fourths of the Alabama coal used in the State come from two mines in the Cahaba field. The day is not far distant when the coal fields of Alabama, besides supplying the home consumption, which will be enormously increased by the development of iron mines, will provide all the Gulf ports with the greater portion of their fuel, it being only a little more than two hundred miles from the coal regions to the sea-board at Pensacola. Already shipments have been made to the West Indies.

Interest on Virginia Bonds.

The following is an extract from a circular recently issued from the office of the Second Auditor of the State of Virginia:

Where stock has not been funded under the acts of 30th March, 1871, and March 7, 1872, it will be necessary, in drawing interest, to present the certificates here, in order that the payment may be stamped thereon.

When interest on registered bonds, issued under the Funding act, is not paid to the owner in person, a power of attorney or order properly witnessed will be required.

The Funding act, of March 30, 1871, is still in force, except that coupons "receivable for taxes and public dues" cannot now be issued.

I have to request that persons drawing for interest, or desiring to have stock transferred, will do so through parties outside this office, as my official duties render it impracticable for me to attend to those matters.

☞ The financial officers of the State of Louisiana announce that the new consolidated bonds authorized by the Funding bill will be ready for delivery in a few days, and that the interest on the coupons, due January last, will be paid as fast as the old bonds are converted. The payment of interest on the new bonds will be commenced on July 1 next.

The Railroad Controversy.

In the combat which has been opened in Wisconsin between the State and the railroads, there is, of course, great danger that prejudice and passion will usurp the place of reason and reflection, to the detriment of all the interests involved. Regarding the dispute from a distance sufficient to free us from any shadow of partizanship, we are in a better position to perceive the equities of the situation than perhaps either of the combatants. And one of the first things we are compelled to note is the injustice with which even the fairest journals of the Wisconsin press open the battle. The Milwaukee *Journal of Commerce*, for example, generally a just and candid paper, as it is unquestionably an able one, recently denounced in quite bitter terms, as a high handed, revolutionary proposition, the declaration of the President of one of the railroads that if the new law went into effect it would be necessary to close his line, as it could not operate at a profit under the statute. The position of this railroad manager is, however, the natural and, what is more, the inevitable position of any man who should be placed in the same circumstances. Of course, it may be contended that the effect of the new law would not really be what he claims that it would be. But on that point there can be no better authority than that of the directors of the business; and the fact that they propose to suspend operations rather than continue to run under the law, appears to warrant the conclusion that they have told the truth when they declared their inability to clear a profit under the new provisions, since even a very small profit would be preferable to the absolute loss which must ensue upon suspension of operations. If the other side can show that there is profit in operating under the new bill, it is its duty to show it; but until that is clearly demonstrated we must accept the statement of the managers, because it is the most trustworthy yet put forward. And assuming that this position is tenable, the question recurs, on what pretence of public necessity can a law which thus destroys the value of property, and invades the rights of the citizen, be justified or supported? We know of but one possible answer to this, and it is, that the railroads have heretofore charged extortionately, and that it is necessary to reduce their opportunities, and throw safeguards about the public interests. To this we must reply that the charges of extortion in the past do not appear to us to have been satisfactorily proved; and that even if they were so proved, that could not constitute a justification for confiscating their property. If we admit that the corporations have wronged the people heretofore, we do not thereby set up a rational argument for the future wronging of the corporations by the people. But in fact we do not believe that the corporations have been convicted on sufficient evidence, and therefore there is not even the poor excuse of retribution for the course being pursued in regard to them.

The Milwaukee *Journal of Commerce*, however, intimates that if the companies cannot operate under the new law they ought to surrender their charters, and at least keep the roads open until the State can take charge of them. Perhaps that view seems reasonable at Milwaukee, in an atmosphere of prejudice, but to us it appears little short of monstrous. What! You first legislate all the profits out a business, and ruin it as an enterprise, and then you complain because the man you have ruined does not keep his business going until you can assume control of it. The people of Wisconsin may think that good reasoning, but elsewhere it is apt to be denominated, adding insult to injury. In fact, however, the kind of law passed by the Wisconsin Legislature is in utter defiance of all constitutional principles. Even if the power to regulate railroad charges exists in the Legislature—an undetermined point—it certainly does not carry with it the right to confiscate, any more than the right of the parent to correct his child carries with it the right to kill the child. There is no constitution or law in this country which recognizes any power inherent in any department of government, to inflict injury upon one class of the community for the benefit of another class. It is held that private property may be taken for public uses, but not without compensation, and as no compensation is offered the railroads their case does not even come within the constitutional provision noted. We have no doubt that when this matter is taken into the Courts the new law will be declared unconstitutional, and therefore void. And in truth it is idle to expect that any good end can be served by such vindictive legislation. The corporations have rights which the people must respect, since to ignore those rights is to drive capital out of the country, to paralyze industry, and to stagnate commerce. As it is vitally necessary for the people to have capital, to have internal improvements, to have business, so it is absolutely requisite that they should treat capital and enterprise, if not liberally, at least with justice. Nor is there any escape from this position, for though it is perfectly true that the State has the right to take possession of the railways, it is also perfectly true that the State cannot hope to operate them as economically as the corporations, and that if the latter cannot make them pay under the new law, they must certainly run behind under State management. What follows upon this is a deficit; which must be made up, either by increasing the fares and freights, or by levying fresh taxes upon the people. In either event the result is the same. The people have to pay the difference in operating expenses caused by the greater extravagance of the State management, and the only change is in the fact that the profits go into the pockets of political office-seekers and wire-workers instead of into the pockets of the original directors. As State management, moreover, would have no motive for economy, it may be regarded as certain that the last condition of these railroads would be worse than the first.—*Sacramento Record.*

Peterboro' Railroad.

The annual meeting of the Peterboro' Railroad Co. was held in Nashua, N. H., on the 25th inst. This road, which is an extension of the Wilton road to Greenfield, has been nearly completed during the past year at a cost of about $500,000, exclusive of gratuities paid by the towns in aid of the undertaking. The total cost of the road will be about $525,000. The road has been in operation since the first of January and the business has more than met the expectations of the most sanguine of the projectors. The road is operated by the Nashua and Lowell corporations, and the stockholders are paid six per cent upon the cost of construction. The following directors were elected: James Scott, Granville P. Felt, Geo. A. Ramsdell, Solomon Spalding, Gilman Scripture, Josiah G. Graves and Albert McKean. President, James Scott; Clerk, Gilman C. Shattuck.

☞ A compromise has been agreed upon between the different parties interested in the Southern Minnesota Railroad Company. The second mortgage is to be foreclosed and the road to be under the control of the first mortgage bondholders until its earnings shall pay the interest on their bonds and on preferred stock which is to be issued for the overdue interest on the same; then the control is to pass to the bondholders under the second mortgage. This agreement is subject to the approval of the United States Circuit Court, which now controls the road through a receiver.

☞ Messrs. Baring Bros. & Co., London, notify that the sum of £12,988 has been employed in the purchase of sixty eight £200 bonds of the Baltimore and Ohio Railroad 6 per cent loan, redeemable in 1874, and that £19,162 has been similarly used in the absorption of 6 per cent bonds redeemable in 1895 and 1910.

Northern Central Railway.

We gave in our issue of March 7th the Report of the President of this company for the year ending December 31, 1873, showing the receipts from operations of the road to have been $5,031,365 59, the operating expenses $3,447,514 09, and the net revenue $1,583,851 50. From the Treasurer's statements, which have since been received, we learn that the receipts and expenses were apportioned as follows:

RECEIPTS.

Main Line	$3,230,722 87
Shamokin Division	850,487 11
Elmira Division	698,202 53
Chemung Division	302,375 50
Canandaigua Division	449,577 58
Total earnings	$5,031,365 59
Consolidated mortgage bonds issued	230,000 00
Income bonds issued for stock of Chemung R. R. Co., and Elmira, Jefferson and Canandaigua R. R. Co.	250,000 00
Floating debt—increased	168,505 46
Total	$5,679,871 05

EXPENDITURES.

Main Line	$2,202,187 29

Secretary.—ROBERT S. HOLLINS.

Treasurer.—J. S. LEIB.

Auditor.—STEPHEN LITTLE.

Gen. Superintendent.—A. R. FISKE.

☞ The Boston and Albany Railroad Company will continue the work, begun last year, of substituting stone and iron bridges for the wooden structures along their line. Six iron bridges averaging 150 feet in length, are to be built this season; three at Chester, one at Warren, one at Palmer and one at Albany.

☞ An ordinance passed both branches of the Baltimore city council on the 21st of May, authorizing the commissioners of finance to purchase at their discretion the unindorsed bonds of the Western Maryland Railroad and the matured coupons detached from the same, and to hold them for investment in the redemption fund.

North Pennsylvania Railroad.

The earnings of this road for the years ending October 31, 1872 and 1873, were as follows:

	1872.	1873.
From passengers.....	$452,187 26	$493,146 30

General expenses.....	31,954 57	38,754 59
	$732,829 27	$931,573 90
Net earnings.....	$604,109 09	$545,966 18
Interest account.....	346,624 78	350,321 54
Balance carried to profit and loss	$257,484 31	$195,644 64

The total amount to credit of profit and loss, October 31, 1873, was $462,194 93, against $479,107 18 on the 31st of October, 1872.

The capital stock at the close of the year was $3,596,500, an increase during the year of $123,000.

A scrip dividend of five per cent was declared in January, convertible into stock on the 1st of February 1874.

The permanent accounts have been increased as follows:

For construction	$44,368 87
" equipment	76,671 62
" real estate	10,401 12
" depots, shops, and stations.....	32,431 11
Total increase.....	$163,867 22

The bonded debt has been increased $407,000.

There has been advanced to the Stony Creek Railroad Company.....	$287,873 75
To the North East Pennsylvania R. R. Co.....	45,768 50
Total cash advances.....	$333,642 25

The additions to the equipment include two first class passenger engines, and one shifting engine, built by the Baldwin Locomotive Works; and six first class passenger cars, and one baggage car, built by the Wilmington Car Works. The report says:

On the eighteenth of December, 1872, the North East Pennsylvania Railroad was opened from Abington to Hatboro, and the Bucks County Line, a distance of seven and three-tenths miles; the North Pennsylvania Railroad Company furnishing the rolling stock, and maintaining and working the road. The gross earnings up to October 31, 1873, have been $13,540 47, and the expenses $15,089 46. The grading and masonry of the extension of the line to the Bristol Road, a distance of two miles and a third, are nearly completed. A number of experimental lines for proposed further extensions of the North East Pennsylvania Railroad, have been run in the past year by F. H. Saylor, Esq., the Chief Engineer of that company, who is now preparing an explanatory map to exhibit their results.

On the first day of January, 1874, the Stony Creek Railroad was opened for public use, from Lansdale to the Main Street in Norristown, a distance of ten miles and three-tenths; and it is now run in direct connection with the Doylestown Branch, and with the Main Line of the North Pennsylvania Railroad; this company furnishing the rolling stock and controlling the road. It is well constructed, with moderate grades and iron bridges; and with a strong track of 58 pound rails, laid with fish joints. The Stony Creek Railroad Company owns a good deal of valuable real estate in Norristown.

The company have 42 locomotives, of which 4 are shifting. Number of miles run: passenger 410,034; freight, 299,252—total, 709,286. Number of passengers carried, 984,723, equal to 328,244 through passengers. Number of passengers carried one mile, 17,763,827. The total tonnage of the year was 996,213 tons. Number of tons carried one mile, 35,869,531.

CONDENSED BALANCE SHEET, October 31, 1873.

Right of way	$216,018 35

President.—FRANKLIN A. COMLY.

Directors.—John Jordan, Jr., J. Gillingham Fell, William C. Ludwig, Ellwood Shannon, Edward C. Knight, Alfred Hunt, William C Kent, Thomas Smith, Arlo Pardee, James H Stevenson.

City Directors.—Jacob Riegel, O. Howard Wilson.

Treasurer.—WILLIAM WISTER.

Secretary.—JOHN S. WISE.

Engineer and Sup't.—SOLOMON W. ROBERTS.

Dora Coal Mines.

The Harrisonburg (Va.) Old Commonwealth, of the 21st instant, publishes, with a strong indorsement, a report of C. G. Dandridge, chief engineer of the Washington and Cincinnati (narrow gauge) railroad, on the Dora coal mines, situated nineteen miles from Harrisonburg, on the line of the Washington, Cincinnati and St. Louis Railroad. The deposits, according to the report, are twenty miles in extent, and are found in three veins, the lower of which has six feet of workable and rich anthracite coal. The other two vary from three to five feet in thickness. Hematite and copper ore are found in large quantities near these mines, in the mountains across the North river, one quarter of a mile distant.

☞ The Alabama and Chattanooga Railroad was sold on the 26th inst. by Governor Lewis of Alabama, on behalf of the State, to Mr. A. P. Balch and a company consisting mostly of New England capitalists.

Railroad Law.

HORSE RAILROADS—COMPARATIVE CARE REQUIRED OF DRIVERS OF CARS AND OTHER VEHICLES.

The facts of this case are fully set forth in the following opinion of the Court by Judge EARL:

In this case the jury rendered a verdict for the plaintiff, and the defendant, upon a case made and settled moved for a new trial at Special Term, and the motion was granted. It may have been granted upon questions of fact. There is nothing in the record showing that it was not. Hence, the proper course for us to pursue, is to dismiss the appeal on the ground that it brings nothing before us which we can review, or to affirm the order on the ground that it does not appear that the court erred in granting it. (Dickson *vs.* Broadway and Seventh Ave. R. R. Co., 47 N. Y., 507.)

I prefer the latter course because both parties have asked us to examine and pass upon the merits of the case, and because it is quite clear that there was ample ground for granting the new trial for error of law.

In the evening of January 1, 1864, the plaintiff was passing upon one of the streets of the City of New York, and the defendant's team came dashing along, with a pole and whiffle trees attached to them, at a furious rate and ran over her. On the trial she called witnesses who saw the team run over her, and who knew the nature and extent of her injuries; but she did not call a witness who saw how the horses became detached from the car, or who knew what caused them to run away. The only witness she called upon the subject testified that he sat in the front part of the car, in the corner; that the car all at once stopped, and he looked out and saw the horses running away; that he saw the horses had been attached to the car by a hook, standing upright, which appeared to have been broken off at some time, and that he did not see any one interfere with the horses.

The witness did not testify that he was looking when the horses became detached, but that his attention was attracted by the stopping of the car, and that he then looked and saw the horses running away from the car. But this was sufficient to make out a *prima facie* case. The fact that the horses were unattended and unfastened in the street was, unexplained, evidence of negligence against the defendant. Hence, the court committed no error in refusing to nonsuit the plaintiff at the close of her evidence. But after the close of her evidence, the defendant proved by two witnesses (one the driver, and the other a police officer) precisely how the horses became detached from the car, and were caused to run away. The driver stopped the car to take on some ladies; and at that time two intoxicated men came along and caught hold of the horses, and one of them struck one of the horses on the head, and the other caught hold of the reins and pulled them out of the driver's hands, and then the horses backed and got loose from the car and ran away. This is all the evidence upon the subject. There is nothing to cast suspicion or doubt upon the truthfulness of the witnesses, and we must take their evidence as true.

It thus appears that the horses got loose and ran away without any fault whatever of the driver, and I can perceive no principle upon which the defendant can be held liable. A person driving horses through a street is not bound absolutely to keep them under control. He is bound to exercise that reasonable degree of diligence and care which a man of ordinary prudence and capacity might be expected to exercise under the same circumstances.

But it is claimed on the part of the plaintiff that there was some defect in the hook by which the whiffle-trees were attached to the car. One of the plaintiff's witnesses testified that a piece of the hook appeared to have been broken off at some time before the accident; but there was no evidence tending to show that this in any way impaired the usefulness of the hook; and it did not appear that this defect in the hook in any way contributed to the accident.

It also appeared that the whiffle-trees could have been fastened into the hook with a pin, so that they could not have slipped out unless the pin broke. But the proof showed that this hook was made and the whiffle-trees attached in the manner usual upon other roads. While it may be true that the team is more securely attached to the car by the use of the pin, that is not the only thing to be considered. Regard must be had to convenience and practicability, and to the safety of the passengers.

The team should be so attached that it can be easily detached in any emergency. Hence upon all the evidence in the case, no jury could properly determine that even the greatest degree of care would require that the pin should be used with the hook. But the learned counsel for the appellant argues that a street railway company is bound to adopt every improvement and to use every precaution for the purpose of meeting an unforeseen occurrence, and preventing injuries to travelers upon the street as well as passengers in the cars; and he seeks to apply the same rule, as to diligence and care, which has in many cases, been applied to railway companies, whose cars are drawn by steam, in the construction of their cars, with the view to the safety of passengers therein. The argument is clearly unsound. The degree of care which a person owing diligence must exercise depends upon the hazards and dangers which he may expect to encounter, and upon the consequences which may be expected to flow from his negligence. Railroad companies, whose cars are drawn by steam, at a high rate of speed, are held to the greatest skill, care and diligence in the manufacture of their cars and engines, and in the management of their roads, because of the great danger from their hazardous mode of conveyance to human life in case of any negligence. But the same degree of care and skill is not required from carriers of passengers by stage coaches (Hegeman *vs.* Western Railroad Corporation, 13 N. Y., 9); and, for the same reason, is not required from the carriers of passengers upon street cars drawn by horses. The degree of care required in any case must have reference to the subject matter, and must be such only as a man of ordinary prudence and capacity may be expected to exercise in the same circumstances. In some cases this rule will require the highest degree of care and in others much less.

But whatever degree of care may be required of street railway companies, as to the passengers which they carry, their cars are no more dangerous to pedestrians in the street than carriages, omnibuses or any other vehicles drawn by horses; and there can be no more danger from the horses attached to the street cars than from horses attached to any other vehicle; and hence no more can be required of street railway companies in the management of their cars and horses in the street than is required of the driver or owner of any other vehicle. It would be a very hard and unwise rule which would require the owner of every vehicle driven in the streets of a city that he use, in the construction of his carriage and in the harness of his horses, and all the means by which they are attached to the vehicle, the best methods which human skill and ingenuity have contrived and brought into use to prevent accidents to pedestrians in the streets. Such a rule has not and, probably, never will be adopted.

I hold, therefore, that the defendant was not required to adopt an unusual and perhaps untried method of attaching its horses to the cars. It discharged its duty in that respect to pedestrians who had the right to use the streets in common with it if it attached them in the way which was in general use and which had been found reasonably adequate and safe.

I am, therefore, of the opinion that the motion to nonsuit the plaintiff, at the close of all the evidence, should have been granted; and this leads to an affirmance of the order of the General Term, and judgment absolute against the plaintiff for costs.

Projected Railroads in California.

We note the encouraging progress of the scheme to build a branch line connecting Visalia with the main route. The Tulare *Times*, referring to the recent conference between the leading citizens of Visalia and Governor Stanford, says: "Mr. Stanford's propositions are very acceptable. He will allow the privilege of connecting with his road at any point; will furnish the rolling stock, and the parties building the road can conduct it, or he will take charge of it himself. He also offers to do all he can to encourage and sustain the enterprise." The *Times* makes a rough estimate of the cost of the proposed branch, which will be six and a half miles, and thinks it will not exceed $50,000. Nearly a sufficient amount to build the road has already been subscribed, and it is hoped that "within sixty days direct communication will be opened up by rail with the world."

In another part of the State a branch line is also talked of; namely between Castroville and Monterey. Th Castroville *Argus* says that "as things look now, Castroville will soon be connected with Monterey by railroad. We have good reasons for believing that a branch of the S. P. R. R. will be extended from this town to Monterey this summer, in time to transport to that place next Fall's crop." The same paper adds:" Should the above scheme be carried into effect, this whole valley will have cause to rejoice, as the completion of this road will be apt to lower freight, by competition with other routes, to a figure highly beneficial to the farmer. It will be a good thing for both Castroville and Monterey, and the country at large as well; and the citizens of both places should lend all their influence to assist the project along." Now if these papers, says the Sacramento *Record*, from which the above was obtained, had been diligent students of our morning contemporary, they would be occupied in proving the immense superiority of mud wagons and prairie schooners, to railroads, as transportation agents, and would

have commenced denouncing Stanford & Co. in advance of the inauguration of the new line, instead of hailing the contemplated changes with an eargerness approaching enthusiasm. It is a somewhat singular thing that notwithstanding the alleged evils of railroading, it is impossible to find a community lacking such facilities, which is not strongly desirous of securing them.

Kent County Railroad.

At the annual meeting of the stockholders of this company held at Chestertown, Kent Co., Md., on the 18th inst., Wm. Painter, President of the company, submitted his report for the year ending April 30, 1874, in which he says:

Since the last annual meeting, and in accordance with a resolution of your board, I contracted with J. H. T. Jackson for the building of the extension to your road from Worton to the Chesapeake bay, under which contract he has completed the road for about three and a half miles, and has graded nearly the whole distance, but was stopped owing to the failure of the New Jersey Southern Railroad Company to furnish the funds, as agreed upon by them with this company. I regret to state that the business of the company has not been so prosperous this year as we anticipated. The disaster to the peach crop was a serious blow to us. The open winter and a general falling off of freights and travel have also tended to reduce our receipts, the total amount for the year ending May 1st, as per the report of the treasurer, being $18,051 10 which was disbursed for operating expenses. The floating debt amounts to $9,973 64 to which there has been no increase during the year.

Our lease of the Townsend branch railroad was terminated April 25. It is expected that the Philadelphia, Wilmington and Baltimore Railroad Company will themselves operate the Townsend branch, after putting it in first class condition, when our Massey's connection may be made to suit the convenience of our traveling public. I had ardently hoped to report at this time a through connection with Baltimore and New York by the completion of the enterprise commenced by the New Jersey Southern Railroad Company; but owing to the panic last September, it has been deferred by them for an indefinite period.

At an election for directors held on the same day the following gentlemen were chosen; Richard C. Johnson, Robert Nicholson, Isaac Parsons, Moses W. Serat, John L. Stam, Thomas P. Dixon, A. J. Rees and William E. Cacey. At a subsequent organization of the board Moses W. Serat, president of the New Jersey Southern, was elected president, and H. W. Vickers, of Chestertown, secretary—both to serve without pay.

California Gold Mines.

The Gold Hill *News* of the 9th instant has a very interesting article on stocks and mines, from which we make the following extracts:

The dividends officially declared at the present time aggregate larger than for many months, to say the least, being as follows: Belcher, $520,000; Crown Point, $400,000; Consolidated Virginia, $324,000; total, $1,244,000. This, if we mistake not, is the largest aggregate of dividends from the Comstock mines for any one month for nearly a year past. The two mines first mentioned have had to do the dividend paying for many months, and it is gratifying, not only to stockholders, but for the interest of the country at large, to be able to record another successful company pulling into the line of dividend paying mines. The Consolidated Virginia mine has been most admirably managed from first to last, and has only at last commenced paying dividends simply because of the ore and bullion developments enabling them to do so, with a healthy reserve in the treasury and plenty more dividends in sight. The mine itself shows continued improvement at its lower levels, as further developed, and the great ore body bids fair to develop into equal importance with the Belcher and Crown Point.

The Belcher and Crown Point lower levels show better and better as further developed, and the bullion yield shows a corresponding increase. The Crown Point, however, will have to stop on hoisting shortly for a few days in order to get in new and heavier machinery. The present low price of stocks is not at all alarming or unexpected. Stocks may even go a little lower, but not much. The season is getting too far advanced, the yield of the mines is heavy, and the prospects ahead are too good to allow of any permanent depression.

Railroad Land Grant Forfeiture.

The following is a copy of a letter filed with the House Committee on Public Lands:

DEP'T OF THE INTERIOR, LAND OFFICE,
WASHINGTON, D. C., April 22, 1874.

To Hon. W. A. Townsend, Commissioner of Public Lands:

Dear Sir: I have the honor to report the following in response to your letter of the 10th instant, referring to House Bill No. 2,847, to forfeit certain public lands granted to aid in the construction of a railroad and telegraph line from the States of Missouri and Arkansas to the Pacific coast. The Act of the 27th of July, 1866, statutes page 295, makes no provision for the forfeiture, but provides that if the company makes any breach of conditions and allows the same to continue for upwards of a year the United States may do all needful acts to insure the speedy completion of the road. The records show that the line of road has been duly located, its construction commenced and one hundred and twenty five miles have been accepted as completed.

The enclosed copy of a letter of April 10, 1872, from Hon. B. R. Cowen, Acting Secretary of the Interior, to Francis B. Hayes, President of the company, will show the opinion of the Commission appointed to examine the construction of the 8th and 9th sections, specifying the conditions imposed by the statute, viz: that the company was required to commence work not later than the 27th of July, 1868, and that it had then until the 27th of July, 1870, before the condition requiring the completion of fifty miles per year would begin to run, and that after that date such condition became operative. This would require the completion of not less than one hundred and fifty miles by the 27th day of July, 1873; but as no breach can be taken advantage of by the United States for upwards of one year after it is made, it will be apparent that the company may repair the present tracks by building twenty-five miles before the 28th of July next, prior to which time it will not be competent for the United States to assume control of the works.

W. W. CURTIS, Acting Commissioner.

Grand Trunk Railway of Canada.

Mr. C. J. Brydges, under date of Montreal, 20th April, 1874, announces his retirement from the management of this line as follows:

I have now to announce to the heads of departments, and to the staff of the Grand Trunk, that I have resigned my office of managing director of the company, and that my resignation has been accepted by the board of directors. From and after this date, Mr. Hickson, secretary and treasurer, will be in charge of the railway, and I feel sure that his instructions will be carried out with the same loyalty and zeal that mine have always been. Although to myself personally it is a very great relief to be free from the responsibility of managing so vast a concern, it is with great regret that I separate myself from the officers and staff of the railway. It has been a source of great comfort to me to feel during twelve very eventful years of hard work, that I was surrounded by a body of men who were so devoted to the interests of the company—so anxious to promote its welfare and the public service—and so uniformly loyal to their chief officer. Many of the staff were with me before I took charge of the Grand Trunk, and all have worked with the greatest energy and cordiality. I rejoice to know that in retiring I leave the Grand Trunk in excellent physical condition both as regards its roadway and rolling stock—with a staff thoroughly competent to work it in a satisfactory manner—and with public confidence established in the ability of the company to do its duty to the trade of the country. I thank every member of the staff most heartily and warmly for the earnestness and loyalty with which they have always carried out their duties, and I trust that every possible prosperity may attend them all and the company which they serve.

Spring Mountain Coal Co.

The lease of part of the property of the Spring Mountain Coal Company to the Lehigh Valley Railroad Company was signed by both parties in Philadelphia, on the 13th inst. The lease is from June 1st, 1874, to December 1st, 1884. By the terms of the lease the Lehigh Valley Company is to pay, without any condition or reservation, seven per cent. upon the capital stock in semi annual payments. The Spring Mountain Company is to receive one half of any profits realized from the business in excess of the seven per cent., in each and every year when made, the company agreeing not to charge for transportation any higher rate than is paid by other parties in the same region. The Spring Mountain Company also reserves properties and privileges which it is estimated can be made to realize about one per cent. additional dividend annually to the stockholders, besides its participation in the net profits of the business.

Cincinnati, Sandusky and Cleveland Railroad.

Mr. John S. Farlow, the president of this railroad company, returned here yesterday from Ohio, and reports having settled up definitely the civil suits of the company against Rush R. Sloane, the defaulting ex-president. The settlement was made on a basis of $250,000. During the past week Mr. Farlow has put on record the deeds for real estate in Chicago, Sandusky, Columbus, &c, taken in part consideration. These with the notes, bonds and mortgages he has received, will, he feels quite sure, with a little judicious nursing, realize fully the sum named above as basis of settlement. He also reports the road as in excellent condition the whole extent of its line, and in good order and readiness for the enlarged business reasonably expected on a revival of the general business of the country. When in Columbus last week he concluded large purchases of land there needed to accommodate the increasing business at that end of the road.—*Boston Adv., May* 26.

☞ At an adjourned meeting of the stockholders of the Old Colony Railroad company, the committee to collect, count and sort the votes on the question of purchasing or subscribing for shares in an incorporated company, running steamboats in connection with the road to New York, to an amount not exceeding $750,000, and in a company running to the islands in Vineyard Sound for an amount not exceeding $40,000, reported that the whole number of shares was 66,921, of which 34,461 were necessary for a vote; and that upon this question, 35,206 had been cast in favor, and 8,369 against. The President declared the vote decided in the affirmative, and the meeting adjourned.

☞ A rolling mill company, with $80,000 capital, has been organized in Ashtabula, Ohio. A charter has been applied for and the work of building will commence immediately.

RAILROAD EARNINGS—MONTHLY.

The St. Gothard Tunnel.

In reply, no doubt, to rumors circulated from French sources that the St. Gothard Tunnel was to be abandoned as a failure, its progress being so slow as not to promise its completion for twenty years, the Swiss Federal Government is now making public, after proper verification of their correctness, the monthly reports received by it of the state of the works. The report for March shows that the rate of advance of the boring for the month was as nearly as possible 500 feet lineal, the proportion on the Swiss side being greater than that made from Airolo by nearly a third. The total length gained since the first trials were made sixteen months ago is an actual advance of seven-eighths of a mile, of which very nearly 1,200 yards are cleared out to the complete section of the tunnel. The number of workmen now employed on an average daily is 1,380; but this appears to include the labor in extensive workshops outside each of the two openings. The boring from the Swiss end continues to be entirely through solid gneiss rock. The temperature is found remarkably equable within the tunnel, varying little during the month from 70°, while outside the average was 41°. At the southern end the micaschist through which the boring has been carried, has ceased to contain quartz, and has become of a much softer and looser character as the work advances. The reports as to the leakage of springs into the tunnel are decisively contradicted in this report, according to which the quantity of water entering in March was perfectly insignificant. It is also announced that so far from the Belgian boring machines of Dubois and Francois having been given up as a failure, they are working on with the greatest success.—*Pall Mall Gazette.*

Railway Enterprise in Russia.

The rapid increase of railway enterprise in Russia is one of the most gratifying proofs of the progress of the country. The zeal with which this novelty is pursued by the Russian public seems, according to the journals of the Empire, to be untempered with discretion. On the 13th (25th) of April last, the day appointed for the receipt of the subscriptions to the Ural Railway, the Government bank was crowded to suffocation by would be investors. Several ladies fainted away, and one man had his arm broken by the crowd. It is said that instead of 581,000 roubles, the sum actually demanded, the subscriptions amounted to about 70,000,000 roubles, or about 180 times more than was required. This, though proving the confidence of the people in the Government guarantee (five per cent.) is bad for trade, owing to the sudden withdrawal of such large sums from circulation, and the strain on the banks caused by their production. The same eagerness to subscribe is also apparent at Moscow. Meantime, the St. Petersburg *News* does not see where the money is to come from required to pay the interest of the £500,000,000 Russia will need to complete her railways.—*London Echo.*

Peruvian Railroads.

A translation of a Government decree, dated January 13, is published in the Panama *Star and Herald* of January 20, which says that the following lines of railroad were then open for traffic—From Ilo to Moquegua, 100 kilometres; from Molendo to Puno, 542 kilometres; and from Pisco to Ica, 47 kilometres; and that during the present year the lines from Callao to San Matao, of 118 kilometres in length, from Chimbote to Taquilpon, of 90 kilometres, and from Pacasmayo to La Vina, of 148 kilometres will be completed, making a total of 1,045 kilometres (650 miles). The decree continues that the districts traversed by these roads abound in mineral wealth, which should be developed not only for the purpose of advancing the material interests of the country, but also with a view of supporting the lines themselves, and that the resources at the disposal of the Republic are not sufficient to attain this desired end. For these reasons it says that it is advisable to call attention of European markets to the material resources of the country, and directs that plans and profiles of all the railroads be prepared, a commission appointed to collect specimens of minerals along the roads, and the collections, catalogues, and drawings be sent to Europe for exhibition in London, Paris, and Berlin, and descriptive pamphlets be published in English, French, and German, and distributed free. The Minister of the Republic in France was authorized to furnish free passage to mining engineers of reputation going to examine mines in Peru, and the representatives of mining companies having a capital not less than $1,000,000.

☞ The Prairie du Chien *Union* gives an account of the launching of Mr. Lawler's great pontoon railroad bridge over the Mississippi at Prairie du Chien. It is the largest boat of the kind on the Western waters, being 408 feet long and 30 feet wide over all. It contains over five tons of iron and upward of 250,000 feet of timber. There were twelve "ways," each 125 feet long, down which it glided into the water.

☞ Mr. W. M. Phillips has been appointed assistant superintendent of the Bennett's Branch extension of the Allegheny Valley railroad, which will hereafter be known as the Low Grade Division of the latter road, with his headquarters at Brookville, Pa.

RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh Rails**, and of any required weight and pattern.

PERKINS, LIVINGSTON, POST & Co.,
59 Liberty Street,
NEW YORK.

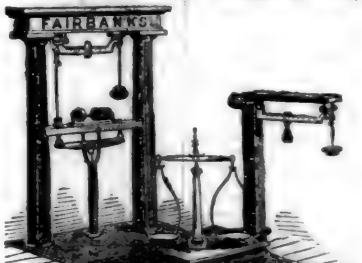
ENVELOPES.

SAMUEL RAYNOR & CO.
115 & 117 William Street, N Y.

Manufacture every style of Envelope, from the smallest drug size to the largest Official Size, and of any pattern, shape, or quality, including White or Blue Cloth Lined, Parchment and Manilla paper. Railroads, Express Companies, Banks, Insurance Companies, Brokers, Merchants and others supplied with every style that may be wanted. Samples given when requested.

THE ILLINOIS CENTRAL RAILROAD COMpany offers par and a premium of one per cent. (101 per cent.), with accrued interest, for any of its construction mortgage bonds presented for prepayment prior to July 1, 1874, at its office in New York.

The outstanding balance of its Construction Mortgage Debt is about $3,000,000. These Bonds mature April 1, 1875.



L. V. F. RANDOLPH,
Assistant Treasurer.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*), recurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, May 30, 1874.

Stock Exchange and Money Market.

Money has been offering very freely all through the week, the accumulation of unemployed means at this point having been steadily increasing, in the absence of anything like an urgent, or even notably active inquiry from any source for accommodation. The speculative demand has been comparatively moderate, while from mercantile borrowers there has been very little call for aid Call loans have been ruling at 2@4; and best discounts at 5@6 per cent per annum. The City banks, in their last weekly statement, were $2,151,700 lower on their deposits, and $1,773,100 lower on their loans and discounts, than the week before. The legal tender notes were further augmented $2,753,100, and the specie reserve reduced $1,279,300. The circulation was enlarged $1,700. The U. S. Sub-Treasury at this port has again gained handsomely in the line of its currency reserve, while further reducing its coin board mainly through coin interest disbursements. The U. S. Sub-Treasury in this city closed the week with a currency balance of $44,602,974, against $41,622,884 the preceding week; and a coin board of $51,516,242, against $53,280,819 on the previous return. The City bank exchanges, during the week, were $423,805,644, or a daily average of $70,634,274. The customs revenue of the port, during the week, was $1,930,000, of which $1,755,536 were in coin certificates. The City banks reported their average of gold last week at $26,022,800, and their greenback average at $59,858,300. Their deposits stood at $234,243,300. The loan item was about 282⅞ millions. The circulation was $26,800,900.

The cash balances of the Treasury Department on Wednesday were: Currency, $9,500,000; special deposits of legal tender for redemption of certificates of deposit, $56,785,500; coin, $86,700,000; including coin certificates, $35,100,300.

The outstanding amount of legal tender notes is yet 382 millions; and of National bank circulation 349⅛ millions.

Government has received about 91¾ millions from internal revenue, thus far in the current fiscal year.

Gold has been moving rather slowly, the speculative demand having been especially tame. The customs inquiry has been moderate. The export drain has been rather more extensive. Last week's shipments were $2,879,662; and on Wednesday of this week, $1,320,000. The extremes of the price have been 111⅞@112⅝, closing at 112¼, as against 112⅛ on Wednesday of the preceding week. The specie outflow, last week, was $2,879,662. The imports of specie at this port since Jan. 1, have been $1,634,497, against $1,769,660 same time last year. The customs demand for Gold last week averaged $321,666 a day. Foreign Exchange has been comparatively slow of sale most of the week, closing weak. Bankers' sixty day bills on London closed on Wednesday at $4 87¾@$4 88; sight bills on London at $4 90½@$4 91. The week's exports of Domestic Produce have been to the currency value of $5,876,034.

Government securities have been more sought after and quoted firmer. The investment demand has been stimulated by the unusual ease in Money. U. S. sixes of 1881 closed on Wednesday of this week at 121⅞@122; U. S. Five-Twenties of 1862, 115⅝@115⅞; U. S. Five-Twenties of 1864 at 117¼@117½; U. S. Five-Twenties of 1865, 118¼@118½; U. S. Five-Twenties of 1865 consolidated, 120⅛@120¼; U. S. Five-Twenties of 1867, 120¾@121; U. S. Ten-forties at 115@115¼; U. S. Fives of 1881, (Funding Loan) 115⅜@115⅝; Six per cent. currency Sixes from 117¼@117½.

State and Railway bonds have been in more demand and quoted firmer in price. Central Pacific first mortgage six per cents have been unusually brisk and have advanced to 92¼@92½; Western Pacific sixes, 85½@86. Chesapeake and Ohio First Mortgage Bonds, Six per cents, have been in more request at from 51@51. Railway and miscellaneous share property has been less active, and though quoted stronger early in the week, closed lower.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $11,876,203, against $8,585,218 same week last year. The exports of domestic produce are $5,876,034, as against $5,205,204, last year. The exports of Gold and Silver, $2,889,661, as against $659,018 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $1,931,000, as against $2,300,212, same week last year.

General business has been more active in the line of domestic produce, but comparatively quiet in foreign merchandise. Metals have been slow of sale. Eglinton Pig Iron quoted at $34@$35. Glengarnock, $36 50@$38; Coltness, $39@$40; No. 1 American Pig at $33@$35; No. 2 do. at $31@$32; Forge, $26@$28; English Rails at $55 gold; American Rails at works, $60@$65; Old Rails, $40@$41. Wrought Scrap, $38@50. The sales include 1000 tons American Rails on p.t. Breadstuffs have been freely dealt in, but at easier prices. Provisions and Cotton, active, closing lower. Freights have shown more animation, especially in the grain line, with rates quoted firmer.

At the auction sale of Scranton Coal, on Wednesday, 50,000 tons were disposed of at advanced prices, the range having been from $4 40@$5 47½, as against $4 37½@$5 32½ per ton in April.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Boston, Concord and Montreal Railroad.

At the annual meeting of the stockholders of this corporation, held at Plymouth, N. H., on the 25th inst., the following gentlemen were unanimously re-elected directors for the ensuing year; John E. Lyon of Boston, Alexander H. Tilton of Tilton, Joseph P. Putnam of Laconia, Peter Butler of Boston, John L. Dix of Milford, John A. Parks of Boston and Joseph W. Lang of Meredith. John E. Lyon was re-elected President, and Col. Charles Lane of Laconia Clerk. Hon. Asa P. Cate, of Northfield, presented a resolution giving the Directors additional power for carrying out the scheme for the consolidation of the stock which was authorized at the annual meeting last year, and it was unanimously passed. It provides for consolidating the stock, even if the holders of the old stock do not present it for exchange. If the old stock is not exchanged it can never draw dividends. In the consolidation five shares of "old" give one share, two shares of "new" give one share and two shares of "preferred" give three shares. There will be 20,000 shares of consolidated stock, making the capital of the road two million of dollars.

☞ The election of directors for the Pacific Mail Steamship Company resulted in the success of the ticket of the present management, embracing the names of Russell Sage, George S. Scott, Francis Alexandre, James D. Smith, W. H. Guion, Frederick L. Talcott, Trevor W. Park, Charles J. Osborn, Rufus Hatch, for which 170,971 votes were cast. The stockholders' ticket received 58,261 votes.

Purchase of Stolen Securities.

The Commission of Appeals has rendered a decision, of which the following is the syllabus, in part, furnished by the Albany *Law Journal*:

Held, That a dealer in United States bonds, payable to bearer, is not bound to inquire of one offering to sell, as to his right or title thereto, or to take any special precautionary measures to ascertain or protect the interests of others in case of the purchase by him of such bonds which have been stolen. An omision on his part to examine and regard a notice of the theft left at his place of business, will not of itself, without actual knowledge or notice, deprive him of the character of a *bona fide* purchaser. (Reynolds and Gray, CC., dissenting).

One who purchases negotiable paper before due for a valuable consideration, in good faith, and without actual knowledge or notice of any defect of title, holds it by a title valid as against every other person.

Suspicions of a defect of title, knowledge of circumstances which would excite such suspicion in the minds of a prudent man, disregard of means of information, an examination of which would disclose such defect, in fine, gross negligence at the time of the purchase will not alone defeat his title. It is evidence, but not conclusive of bad faith, and that must be established by one seeking to impeach such title. Seybel *vs.* Nat. Cur. Bank. Opinion by Lott, Ch. C.

☞ The new railroad on the north shore of Staten Island is progressing slowly near Factoryville, where a portion of the roadway has already been graded. The corporate authorities of New Brighton have entered a protest against the laying of a branch track from the Central Railroad of New Jersey to Bergen Point, which was in contemplation by the latter Company, to meet the new road on the Jersey side of the ferry, and the company now propose to run a ferry from the terminus of the road near Factoryville direct to New York by steam-boats.

☞ At the meeting of the first-mortgage bondholders of the New York and Oswego Midland Railroad in Utica, on the 26th inst., over $1,000,000 in bonds was represented. A committee of five, consisting of James W. Clarke of Oxford, J. T. White of Utica, Charles G. Burke of Little Falls, and Clarkson T. Collins of Great Barrington, Mass., was appointed to report a plan of action by circular to the bondholders for their approval or disapproval. This committee will meet at the Windsor Hotel, New York, on Tuesday, June 16.

☞ The earnings of the Toledo, Wabash and Western Railway company for the four months ending April 30, 1874, were $1,668,038 28, the expenses $1,121,780 49, and the net earnings $546,257 74. For the corresponding period of the previous year the earnings were $1,693,228 21, the expenses $1,335,863 80, and the net earnings $357,364 41—showing a decrease in earnings of $25,189 98, with a decrease in expenses of $214,083 31, making the increase in net earnings $188,893 33.

☞ At the annual meeting of the stockholders of the Concord Railroad company, held in Concord, N. H., on the 26th inst., the following gentlemen were elected directors for the ensuing year: Jno. E. Lyon of Boston, Onslow Stearns of Concord, Jas. W. Johnson of Enfield, Frederick Smyth of Manchester, Jos. P. Pitman of Laconia, Jno. A. Burnham of Boston and Sam'l N. Bell of Manchester.

Nashua, Acton and Boston R. R.

The annual meeting of the Stockholders of this company was held at Graniteville, N. H., on the 19th inst., when the following directors were elected:

Peter B. Brigham of Boston; John C. Moulton, Laconia; Henry Parkinson, Nashua; Benjamin Saunders, Nashua; Joseph B. Clark, Manchester; Charles G. Sargeant, Graniteville; John Fletcher, Jr., Acton; James T. Burnap, Dunstable; Dana Sargent, Nashua. Mr. Brigham was chosen President of the Board of Directors, F. D. Cook of Nashua Treasurer, and Charles B. Goodrich of Boston, Clerk of the Corporation.

The report of the directors for nine months ending March 31, show the receipts to have been $23,280, and the expenditures $28,234. The receipts since that time have been largely in excess of the expenditures, and the future prospects of the road look encouraging to the stockholders.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending May 16, at 436,810 tons, and for the coal year 6,008,352 tons, against 6,218,004 tons to corresponding time last year, being a decrease of 214,652 tons. The bituminous tonnage for the week is 81,429 tons, and for the year 1,020,200 tons, against 1,009,020 tons to same time last year, giving a total of all kinds for the week of 518,239 tons, and for the year of 7,023,552 tons, against 7,027,024 tons to same time last year, being a decrease of 203,472 tons.

☞ The Massillon and Coshocton railway company, with a capital stock of $300,000 in shares of $50 each, has filed a certificate of incorporation with the Secretary of State of Ohio. The incorporators are Clement Russell, John Fisher, Alonzo Slayton, William L. Holden, Frederick C. Goff, Robert B. Dennis and Samuel P. Walker. The proposed road is to run from Massillon to Coshocton through the counties of Stark, Tuscarawas and Coshocton.

☞ A chattel mortgage executed by the Canada Southern Railway Company to William Lawrence Scott, of Erie, Pa., and Kenyon Cox, of New York, has been filed in the County Clerk's office of Albany county. The instrument conveys the entire fixtures of the road, rolling stock, land, &c., to the parties of the second part, to secure the payment of $9,000,000 in bonds issued for the construction of the road, and is in fact intended as an additional security for those bonds.

☞ The sale of the Blue Ridge Railroad, which was to have taken place under a decree in bankruptcy, has been postponed by order of Judge Bryan until October 22, 1874.

☞ The Northern Pacific Railroad Company has ordered its engineers to relocate the route of its road east of the Cascades, Washington Territory, preparatory to putting the graders and tracklayers at work.

☞ Work on the Virginia Valley railroad in the lower end of Botetourt is progressing finely. There are now about three hundred hands at work between Buchanan and the Rockbridge line.

☞ The city of Toronto has granted an additional bonus of $100,000 in aid of the Toronto, Grey and Bruce Railway.

☞ The Auditor of Virginia has forwarded to Messrs. Baring Bros. & Co., London, $38,000 to reimburse them for the amounts advanced by them for that State in 1867-'68 on account of interest on her sterling debt. The firm has waited for its money for several years, when the Legislature, at the recommendation of the Governor, voted its payment last winter.

☞ The contract for building the Martha's Vineyard Railroad has been awarded to Dacy Brothers, who have given bonds to have the road completed ready for the rolling stock by July 20. The route extends from Oak Bluffs to Katama, through Edgartown, Dukes County, Mass.

☞ The Lowell section of the Lowell and Andover Railroad, abandoned when partially completed by Mr. Barker, has been recontracted to John H. Dawes. It is to be done July 1. The rest of the road is ready for the rails.

☞ Henry B. Hammond of New York has been elected President, Chauncey Vibbard of New York Vice President, and D. R. Burt Secretary and Treasurer of the Indiana and Illinois Railway Company.

COMMERCIAL WAREHOUSE CO.—CASH CAPITAL, $2,000,000—Office, 29 William street, corner Exchange place; warehouses, Atlantic Dock, Brooklyn. The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

American Railroad Journal.

New York, Saturday, June 6, 1874.

Economy of the Wharton Patent Safety Railroad Switch.

THE MAIN TRACK ENTIRELY UNBROKEN AND CONTINUOUS.

By the use of the Wharton Safety Railroad Switch, a continuous and unbroken track is obtained for the through travel, thus insuring such trains from switch accidents, and saving them from any and every damage which result from the open joints and movable rails of a common switch. Some idea of the great economy of this switch over all others can be formed from the following statements:

Cost of a Wharton Safety Railroad Switch	$150 00
Cost of a Common Switch	50 00
	$100 00

This difference of one hundred dollars in price is not only overcome in the maintenance of the roadway, but besides the difference of cost, a further saving on the roadway alone amounts in ten years to $145 50, or a profit on the investment in the Wharton Safety Switch of over 14 per cent per annum, as the following statement will show:

COST OF ORDINARY RAILROAD SWITCH FOR TEN YEARS.

First cost of switch stand, lever, switch rods, clamp bars, head blocks, slides, &c.		$50 00
Ten years' interest on same, at 6 per cent per annum		30 00
Cost of renewals during ten years, (allowing for old materials taken out out,) viz:		
Four new rails every twelve months, ten renewals at $20.00		200 00
Head castings each year, at $3.50		35 00
Labor on renewals and repairs at 75 cents per month		90 00
Interest on cost of renewals and repairs		97 50
		$502 50

COST OF WHARTON'S RAILROAD SWITCH FOR TEN YEARS.

First cost of switch, lever, rods, clamp bars, slides, etc.	$150 00	
Ten years' interest on same at 6 per cent	90 00	
Cost of renewals for ten years, (allowing for old rails taken out) viz:		
Two renewals of four main track rails, at $20.00	40 00	
Labor on renewals and repairs, at $5.00 per year	50 00	
Interest on cost of renewals and repairs	27 00	
	357 00	
		$145 50

But when in addition to this saving of the roadway, the saving in wear and tear of the rolling stock is considered, the economy of the Wharton Safety Railroad Switch becomes further manifest. If we estimate the damage to a locomotive and train of cars in passing the open joints and movable rails of a common switch at the small sum of ONLY ONE CENT, we have a result on a calculation of thirty through trains a day, at one cent each, of thirty cents, or, in one year, (three hundred and sixty-five days) of $109 50, which is more than the difference in the original cost of the switches, and as THE AVERAGE LIFE TIME OF THE WHARTON SAFETY RAILROAD SWITCH IS MORE THAN TEN YEARS, it will be noticed that for the following nine years such damage will be annually saved, free of all cost. And as to the question of safety, one cent set aside as the insurance of each through train passing a common switch (thirty trains in number daily) will pay in one year more than the difference in cost between a Wharton Safety Railroad and common switch, AND SECURE THROUGH TRAINS FROM SWITCH ACCIDENTS FOR A TERM OF TEN YEARS.

Broken rails and bent axles are often caused by the constant thumping of the wheels at the open joints and movable rails of the common switch, (insecurely held in position under the pressure of passing trains by means of the switch rods or other apparatus,) causing many accidents, loss of life and great destruction of property.

As the Wharton Safety Railroad Switch secures to railroads a continuous and unbroken track, and the above enumerated advantages of safety and economy at a very small cost, it would scarcely seem advantageous to further consider the propriety of using any switch contrivance which breaks the rails of the main track.

The loss of life and destruction of property resulting from switch accidents is so apparent that it is not necessary to enlarge upon that subject. It is enough simply to say that railroad companies need not be subjected to them, since the way to avoid them is so sure and inexpensive.

Lease of Foreshore Rights to the New York Central and Hudson River R. R. Co.

The City authorities have leased the foreshore rights of land under water between Sixtieth and Sixty-fifth streets to the New York Central and Hudson River Railroad Company, on which the company purpose building a grain elevator capable of operating 1,250,000 bushels of grain. Extensive docks will also be constructed on the reclaimed water-front, and tracks laid down to connect with the main line. Part of the foreshore is owned by the Railroad Company, and the terms of the new lease of the other portion are as follows: The company are to have control of the land for fifty years at a rental of $5,000 for the first term of ten years, $6,000 for the second term, $7,000 for the third, $8,000 for the fourth, and $9,000 for the fifth term; the company to keep the piers in repair, and perform the dredging and other necessary work in the channel. At the expiration of the term, the lands and improvements will revert to the City. The Commissioners of Docks express themselves satisfied that the agreement is advantageous to the City.

Railroad Law.

RAILROAD COMPANIES.—CONTRACT FOR FREIGHT. LIABILITY OF COMMON CARRIERS FOR LIVE STOCK.

The facts of this case are fully set forth in the following opinion of the Court by Judge EARL.

The rule of the common law makes a common carrier responsible for the safe carriage and delivery of property intrusted to his care, unless he be prevented by the act of God or of the public enemy. But this rule is not applied in its full extent to the carriage of live stock (Angell on car., § 214; Clark *vs.* The Rochester and Syracuse R. R. Co., 14 N. Y., 570; Bissell *vs.* New York Central R. R. Co., 25 id., 442; Smith *vs.* New Haven Northampton R. R. Co., 12 Allen, 531). In the transportation of such stock, in the absence of negligence, the carrier is relieved from responsibility for such injuries as occur in consequence of the vitality of the freight. He does not absolutely warrant live freight against the consequences of its own vitality. Animals may injure or destroy themselves or each other; they may die from fright or from starvation because they refuse to eat, or they may die from heat or cold. In all such cases the carrier is relieved from responsibility if he can show that he has provided all suitable means of transportation, and exercised that degree of care which the nature of the property requires.

Therefore in this case it was not sufficient to establish the common law liability of the defendant to show that the hogs died from heat; but it was incumbent on the plaintiff to show further that there was some negligence or omission of duty on the part of the defendant.

In this State it is well settled that a carrier may, by express contract, exempt himself from liability for damages resulting from any degree of negligence on the part of his servants, agents and employes. (Lee *vs.* Marsh, 42 Barb., 102; Keeny *vs.* Buffalo, N. Y. and Erie Co., 4 Keyes, 108; Keeny *vs.* Grand Trunk R. R. Co., 59 Barb., 104; Bissell *vs.* N. Y. Central R. R. Co., *supra.*) In some of the States it is held that a carrier cannot be exempted from responsibility for gross negligence. But so long as the freighter can insist that the carrier shall carry his property under the common law responsibility, there can be no reason founded in justice, convenience or public policy why he may not voluntarily enter into a contract founded upon sufficient consideration exempting the carrier from all responsibility for any degree of negligence whether it be gross or slight.

In this case, the plaintiffs assumed and agreed to take the risk of injuries to the hogs in consequence of heat.

Effect should be given to this stipulation. The parties must be held to have meant something by it. In consideration that the plaintiffs would assume and take certain risks which would otherwise devolve upon the defendant, it agreed to carry at a reduced rate. If it be held that this stipulation simply exempts the defendant from liability for injuries to the hogs from heat without any fault on its part, then it gets nothing; for in such case, without the stipulation, it would not be responsible. Force and effect can be given to this stipulation only by holding that it was intended to exempt the defendant from negligence, in consequence of which, the hogs died from heat.

The Judge at the trial, however, entirely ignored this special contract and put the case to the jury upon the defendant's common-law responsibility, charging that it was liable if they found it guilty of negligence in the transportation of the hogs. And he refused to the defendant any benefit whatever from the special contract.

In this I cannot doubt the learned judge erred.

The judgment should, therefore, be reversed and new trial granted, costs to abide event.

Concord Railroad.

The receipts from operations of this road for the fiscal years ending March 31, 1873 and 1874, have been as follows:

	1873.	1874.
From passengers	$862,867 49	$372,741 58
" freight	647,826 27	636,943 86
" rents	7,418 35	8,218 86
" express	12,050 00	13,050 00
" mails	9,458 05	10,484 47
	$1,040,115 16	$1,041,438 72
Expenses, viz:		
Repairs of road	$111,438 64	$114,362 61
" structures	30,978 73	25,071 91
" locomotives	21,566 63	34,233 25
" cars, etc.	55,832 43	56,232 06
Oil and waste	11,511 01	10,693 70
Fuel	146,018 21	116,676 08
Passenger expense	57,201 81	60,043 97
Freight expense	66,888 21	72,016 02
Damages	4,371 90	3,536 95
General running exp.	20,717 38	12,631 37
Insurance and taxes	13,589 47	11,088 64
New railroad iron	82,648 87	75,188 67
New locomotives	19,408 29	14,161 12
New cars	23,282 23	96,130 84
New engine house at Concord	.....	15,932 13
All other expenses	28,323 21	18,747 67
	$688,226 97	$736,696 99
Leaving a balance of	$351,888 19	$304,741 78
From which has been paid—		
Taxes on capital stock	$52,406 89	
Northern Railroad on Vermont Central contract	5,700 00	
Manchester and Lawrence Railroad	46,679 26	
Rent on Concord and Portsmouth Railroad	25,000 00	
On account of the construction of Suncook Valley Railroad	3,871 74	
		133,657 89
Receipts over expenses		$171,083 84
From which is reserved and appropriated for—		
New iron and steel rails	$18,000 00	
For unsettled claims	2,000 00	
Paid two dividends of 5 per cent each	150,000 00	
		170,000 00
Balance carried to contingent fund		$1,083 84

It will be observed that the expenses include unusually large expenditures for new locomotives and new passenger and freight cars, amounting to $110,291 96, and for new iron rails, $75,188 67; but these outlays have been judicious and necessary, in order to make suitable provision for the requirements of the business of the road. Nearly sixteen thousand dollars have been expended towards the construction of a new engine-house at Concord, which has been greatly needed. Only so much of it has been erected as was required for immediate use; but the plan contemplates a much more extensive and better structure than the road has had, and one which will be sufficient for all its probable wants for many years to come. The additions will be continued as the funds of the road will allow, and its necessities require.

During the past year, there has been expended, from the earnings, the sum of $3,871 74, on account of the construction of the Suncook Valley Railroad, which amount has been charged to the account of that road.

The intention of the management of the road has been to meet all bills during the year promptly as they have accrued, and the foregoing statement of expenses includes nearly ten thousand dollars ($10,000) of incidental and other expenses of former years, which have been paid during the past year.

The financial condition of the Corporation is shown by the trial balance of the Treasurer, which accompanies this report.

The stock account has been increased to the amount of $13,213 54, as appears by the annexed statement. This excess is mostly in coal and materials for the repairs of the road, now on hand.

The rolling stock of the road is now nearly, if not quite, sufficient to meet the reasonable requirements of its business. Four new first-class passenger cars have been purchased and paid for during the past year, and another has been finished in the shops and put on the road, and one first-class mail and baggage car has been built. The road now has 39 passenger cars and 10 baggage cars, the most of which are of modern construction and in good condition. The whole number of freight cars now owned by the corporation is 775. Of these, 50 new platform cars, 10 new box cars, and 75 new coal cars have been purchased and paid for since the last report. In addition to the cars purchased, 84 platform cars have been substantially rebuilt during the past season, and, to comply with a statute of Massachusetts, brakes have been put on to 214 platform cars.

One new first-class freight locomotive has been built, and several others have been thoroughly repaired during the year, and the motive power of the road is now in a good and efficient condition.

The road bed and superstructure have been fully kept up, and are in a good condition. There have been purchased and laid in the track 1,397 tons of new iron rails, and 1,412 tons have been taken up, repaired, and relaid upon the Concord Road and branches. Five hundred tons of new steel rails have been contracted for and are now being received, and will be laid in the main track in the course of the ensuing summer, in continuation of those heretofore laid, which will nearly complete one track of steel between Concord and Manchester. There have been laid 53,608 new sleepers during the past year; and the ballasting of the road bed one foot in depth with gravel has been continued, and now extends from Concord to a point near Goff's Falls.

The depots and other buildings have been somewhat improved. A new passenger depot has been built at Goffstown, and the old one moved and fitted up for a freight house, which has greatly improved the facilities for doing business at that place.

The new roads and connections at Nashua will soon require a larger and more convenient passenger depot and other improvements at that Junction. No arrangements have as yet been made with the other roads interested, but it is expected that satisfactory agreements will be entered into, which will insure such a new depot and other accommodations as are required by the public and will be creditable to the roads.

A new freight depot has been built at Suncook, and the important and increasing business of the road at that place demands enlarged and better passenger accommodations. Preparations have been commenced for them, and they will be completed as soon as practicable.

Additional accommodations for engines are much needed at Manchester, and some improvements of the passenger depot at the same place are desirable.

In the last annual report, mention was made of the necessity for increased depot accommodations at Concord, but nothing has yet been done in that direction. That necessity increases with the large increase of business at that point, and measures

should be taken to remedy the existing deficiencies whenever the funds of the road will admit. We presume it is the wish of the stockholders, as it has been the endeavor of the directors in the management of the road, to provide all the reasonable accommodations for the public, which the business of the road will allow, with the payment of proper dividends on the stock. But in such a course the progress must be gradual, and limited by the means which the business of the road, with strict economy in its operations, shall furnish.

The great depression of business during the panic, and the consequent large falling off in the receipts of the road, as before stated, with the apprehension then entertained that the same effects would continue to a greater degree than ultimately proved, rendered it necessary, in the view of the directors, to diminish the expenses as far as practicable, in order to avoid too great deficiency in the net income of the year. The way which appeared best for that purpose, and likely to be attended with the least inconvenience to the public, was by diminishing the number and speed of the trains over the road while that depression of business should continue. It evidently would have been poor economy to run more trains, or with more expensive speed, than the existing business required. But with the revival of business, and greater occasion of the public for accommodation, the former facilities will be resumed, and increased as circumstances shall warrant. The intention of the directors, in order to attract travel over the road and its branches, is to furnish all such accommodations and comforts as the business, at reasonable rates, will allow. For this purpose large sums have been expended, as this report shows, for passenger cars and other equipments of improved modern style, for use on all those parts of the road and its branches where the amount of travel is sufficient to call for them.

The total tonnage of the road for the year has been 730,741, equal to 20,666,524 tons transported one mile. Total number of passengers carried 614,327; total carried one mile, 13,653,612. Number of miles run by trains, 800,934.

President.—WILLIAM A. TOWER.

Directors.—William A. Tower, John E. Lyon, Onslow Stearns, James W. Johnson, Frederick Smyth, Joseph P. Pitman, John A. Spalding.

Treasurer.—NATHAN PARKER.

Superintendent.—H. E. CHAMBERLIN.

☞ The directors of the Suncook Valley Railroad Company, elected on the 28th ult., are: Saml. N. Bell, Manchester; Natt. Head, Hooksett; Fredk. Symth, Manchester; Lemuel B. Towle, Epsom; Chas. H. Carpenter, Pittsfield; Martin V. R. Edgerly, Manchester. The Suncook Valley Extension Company elected on the same day as directors: S. N. Bell, Fredk. Smyth, Jas. H. Colbath, Daniel E. Tuttle, Thos. Coggswell, Jno. M. Durgin.

Atchison, Topeka and Santa Fe Railroad.

The annual meeting of the stockholders of this corporation was held at Topeka, Kansas, on the 28th of May. The Topeka *Commonwealth*, of 27th, gives the following report:

At the meeting of the stockholders of the Atchison, Topeka and Santa Fe Railroad held in this city yesterday, the following named gentlemen were elected Directors of the Company for the ensuing year: T. Nickerson, H. Strong, G. Twichell, J. Nickerson, F. H. Peabody, A. Speare, G. B. Wilbur, I. T. Burr, G. Opdyke, T. J. Peter, D. L. Lakin, B. P. Cheney, C. K. Holliday.

These gentlemen are among the leading business men of the East and of Kansas, being principally residents of Boston, and stand high among the solid men of that city, and their business relations to the road are such as to insure the most perfect arrangements for its successful operation.

The Directors elected Thomas Nickerson President; F. H. Peabody Vice President; C. W. Pierce Secretary and Treasurer; G. H. Nettleton General Superintendent; and E. Wilder Assistant Treasurer.

The following resolution was adopted:

Resolved, That the company accept the proposition of the city of Topeka, and establish permanently their "general offices" and "machine, car and repair shops" in this city.

It is understood that work on the offices and shops will soon be commenced, and that they will be pushed forward to completion as fast as possible.

It is gratifying to know that the stockholders and directors are greatly pleased with the present condition and prospects of the road, and that this very important line is highly prosperous, and that the whole country through which it passes is being so rapidly developed in consequence of the liberal policy toward those who settle along its route.

Midland Railway of Canada.

From the report of this company for the year ending December 31, 1873, we learn that the receipts during that period were: from passengers, $80,489 56; from merchandise, $231,036; and from mails, $6,634 32, making a total of $318,159 88. During the same time the expenditures were: for general management, $14,137 34; operating road, $77,285 38; repairs, $82,239 14; and miscellaneous, $6,514 04, making $180,175 90, and leaving to be carried to net revenue account the sum of $137,983 98. The directors have charged to this account the interest on £40,000 of the £100,000 first mortgage bonds, sold for the construction of the Beaverton extension; being a just proportion on the 20 miles now completed and running from Beaverton to Orillia, whilst the further interest on £60,000, expended on this extension, was made chargeable to the construction account.

The receipts on capital account during the year were $48,770 45; and since commencement, $3,254,458 89. The expenditures on same account during the year have been: on lines and works open for traffic, $67,660 41; on lines and works in course of construction, $184,768 96; rolling stock, $64,155 98; sinking fund, $32,606 69—making a total for the year of $349,192 04; and from commencement of the undertaking, $3,597,644 91. In reference to the extension to Waubaushene and Midland, the report says:

The urgency of completing this extension is made apparent in the burden of an accumulating and yet unproductive interest charge, and in view of this, your directors have continued even during the financial pressure prevailing, to urge forward the necessary works, feeling encouraged that if the road reached its terminus, no doubt existed that the revenue receipts would largely increase, if not double. The bridges on the entire line to Midland are under construction. The sleepers are being taken out, and the completion of the line to Waubaushene, at least by the middle of summer, is confidently expected.

The financial condition of the company, December 31, 1873, was as follows:

LIABILITIES.

Bonded debt, £335,000 stg., first mortgage bonds	$1,630,333 32
Share account	835,782 50
Reserve account, applicable to shares	758,948 58
Realized from sales of land not required	2,194 49
Depreciation fund, for depreciation of rolling stock	27,200 00
Foreign Bankers, amount advanced by them	222,747 65
Bills payable	93,399 54
Pay rolls	22,212 66
Municipalities, sundry amounts due them	7,775 00
Sundry acc'ts due by the company	52,748 36
	$3,655,342 10

RESOURCES.

Construction account—100.69 miles of road, including sidings	$2,475,823 70
Equipment account	378,245 88
Georgian Bay Extension, amount expended	710,968 64
Sinking fund, bonds redeemed	32,606 69
Material, lumber, iron and fuel on hand	35,489 05
Outstanding freight and cash on hand	5,031 98
Sundry accounts due the company	17,176 16
	$3,655,342 10

The Directors for the year are: Adolph Hugel, Port Hope, Ont., President; William Fraser, Port Hope; Lewis Ross, M. P., Port Hope; N. Kirchhoffer, Port Hope; J. F. Schepeler, London, Eng.

Manchester and Lawrence Railroad.

At the annual meeting of the stockholders of this company, held at Manchester, N. H., on the 29th of May, the old Board was unanimously re-elected as follows: E. A. Straw of Manchester, B. F. Martin of Manchester, E. A. Abbot of Concord, W. W. Stickney of Exeter, J. W. Smith of Andover, Mass., Nathan Parker of Manchester, Arrtaz Blood of Manchester.

At a meeting of the Directors, Gov. Straw was re-elected President, and Hon. S. N. Bell, Clerk. Hon. Geo. B. Chandler, of the Amoskeag Bank, retains the Treasurership.

The report shows the total tonnage of merchandise transported during the year to be 72,314, a decrease from the previous year of 7,119; the whole number of passengers was 160,909, an increase over the previous year of 2,054; number of miles run by trains 77,940, an increase of 1,762; total receipts $190,036 88; expenses $89,314 31; net earnings $100,722 57. Two dividends of 5 per cent have been paid.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending May 23, at 480,791 tons, and for the coal year 6,484,423 tons, against 6,667,608 tons to corresponding time last year, being a decrease of 183,185 tons. The bituminous tonnage for the week is 79,668 tons, and for the year 1,099,868 tons, against 1,076,086 tons to same time last year, giving a total of all kinds for the week of 560,459 tons, and for the year of 7,584,291 tons, against 7,743,694 tons to same time last year, being a decrease of 159,403 tons.

United States Rolling Stock Company.

The income account of the company on 31st December 1872 closed with a balance to the credit of income of $25,651; the income of the year closing December 31 1873, has been as follows:—From interest, $46,483; from rental, $1,006,648; making a total to credit of income account of $1,079,783. The charges against income for the same period have been as follows:—For freights, $7,227; repairs not chargeable to lessees, $28,297; general expenses, $37,587; operating expenses, $26,081; insurance, not chargeable to lessees, $3,174; estimated loss by doubtful debtors, $20,604, making a total to debit of income account of $124,249; leaving a credit balance applicable to dividends and reserve of $955,534.

Out of the total net income, there was, as you are aware, declared in June 1873 and paid a semi-annual dividend at the rate of 12 per cent. per annum, net in gold coin, on the total capital of $5 000,000, amounting, with the premium on gold, commissions, &c, to the sum of $326,548., leaving a balance of $628,985 to the credit of income account at the close of the year.

Out of this latter sum, $250,000 was carried to reserve account, leaving $378,985 applicable to dividend for the balance of 1873. On 22d January 1874 a dividend of 3½ per cent., net in gold coin, was declared and paid, and a resolution adopted by your board declaratory of a further dividend of 2½ per cent., in gold, out of income earned, whenever collected.

In reviewing each item of the preceding account, as well as of those to follow, I beg to remind you that, while I have been one of your board of trustees and the company's treasurer throughout the year, it was only in August last that I assumed, at your request, the general management of the company's affairs, and that consequently my personal knowledge of the details of the company's business dates from that time only.

INTEREST.

The amount of $46,483 to the credit of this account is derived from current interest on the balances in the hands of the company's bankers both in Europe and here. On the latter the rate has, until quite recently, been uniformly 6 per cent. per annum. Part of the amount has been derived from retarded payments by lessees, who have charged the usual legal rate of 7 per cent.

RENTAL.

Appended hereto are detailed statements of the rentals earned by each class of cars during the entire year, summarised as follows:—From locomotives, $153,864; passenger coaches, $68,866; baggage cars, $10,203; combination cars, $2,509; oil tank cars, $30,210; dump cars, $22,500; flat cars, $28,125; stock cars, $104,672; box cars, $393,669; gondola cars, $197,528; total as above, $1,006,648.

The stock has been in the main well and steadily employed. But it must be remembered that at the opening of the year little more than one-half of the company's capital had been productively invested. On the 1st of January 1873 there still remained in builders' hands rolling stock in process of construction to the amount of $2,223,625—of which, on 30th June 1873, there still remained undelivered (as shown in the preliminary report to the stockholders of that date) the amount of $561,000. These important additions to the company's rolling stock were delivered at various periods throughout the year, and consequently earned only a corresponding proportion of a full year's rental.

During the first nine months of the year almost the whole of the stock found profitable employment immediately upon receipt from the builders or upon delivery from lessees whose leases had expired. The majority of the railroads were doing a large and profitable business, and the demand for rolling stock greatly exceeded our ability to supply it. Since the disastrous panic of 1873, which affected railway interests more than any other, the applications have entirely ceased, and not only have we been unable to promptly renew or exchange several leases about to expire, but we have since January 1, 1874, been obliged in several instances to permit stock to be returned to us on unexpired leases, the lessees being unable or unwilling to retain or pay for the same. At the close of the year all of our stock, with the exception of sixteen locomotives and sixteen passenger coaches, still remained under lease, but the general unwillingness to renew leases about to expire, and the almost total absence of demand, warn us to anticipate greatly reduced earnings during the first half of the current year.

FREIGHTS.

In the early part of the year, and while the demand for rolling stock continued extremely active, little difficulty was experienced in inducing lessees to receive the stock at the builders' shops, and transport it to destination at their own expense. In duller times, and in exchanging leases, it has been found impracticable to insist upon this condition in all cases, and the company has frequently been obliged to deliver the stock on the lessees' lines, and itself bear the expense. In this country of great distances, where the great preponderance of traffic is in one direction, from west to east, this expenditure for freight is at all times likely to be a serious one, and may at times greatly exceed the moderate figures of the past year.

REPAIRS.

The report of the general master mechanic, submitted herewith, explains in greater detail the cause of this large item of expenditure, $28,974, which, under the form of contract now in use by the company, should apparently have been borne by the lessees. All the early contracts for construction were based upon models and specifications in use upon eastern roads, and were at first, for uniformity sake, adhered to throughout. It was very soon found, however, that the majority of the lessees were Western companies, or that the stock largely traveled over Western roads. These latter, owing to their lighter construction, less perfect road-beds, and less frequent facilities for cheap repairs, were found to require—for profitable use—various modifications in the stock leased to them. Notably was it found necessary to strengthen the trucks in use, and this was, by order of General M'Clellan, then your president, done throughout. Whenever repairs of this kind increased the actual construction value of the stock, the cost of the same has to that extent been charged to construction, and added to the valuation of the stock. The balance has been charged to repair account. It is to this class of repairs that the various "rebates on rental" are due which appear in the detailed tables of earnings. There will at all times be a certain amount of repairs to be done at the expense of the company, in order to maintain a high condition of the stock; but, after the pending accounts from this source are finally settled, they will be comparatively unimportant. The stock of the company is now reported in first-class condition, and gives unquestioned satisfaction to lessees. The cost of repairs to the company has also been largely increased by not owning our own repair shops and storage yards.

DOUBTFUL DEBTORS.

While the recent panic and continued dullness and depression seriously affects the financial stability of many roads, and results in great delays in making collections, only four accounts have involved an unquestionable loss. Neither has yet been definitely settled, but 90 per cent. of the amount involved has been written off as a total loss leaving a balance which there is every reasonable prospect of collecting. The total deductions from income amount as above to $124,249, or about 11¼ per cent. on the total gross earnings.

RESERVE.

In spite of the strictest attention to the maintenance of the highest standard of repairs, and the stringent provisions on this subject in the company's lease contract, there is, nevertheless, a gradual and unavoidable depreciation in the value of the rolling stock, which would in the course of years result in practical destruction, involving an entire reconstruction of the stock. To fairly represent the depreciation, the value of the stock should be established by an annual or semi-annual valuation of the property, involving a very great labor and presenting manifold difficulties. It has, therefore, been deemed best to fix the annual depreciation at an estimated per-centage, and by transferring this amount to reserve account, supply a fund for annual new purchases or new construction equivalent to the estimated depreciation by wear and age. In view of the high standard of repairs maintained, an annual depreciation of 5 per cent. on the total amount of stock in use has been deemed adequate. The $250,000 thus placed to the credit of reserve account will be available for new construction during the current year.

DIVIDENDS.

The net earnings of the year were more than sufficient to have paid a full 12 per cent. dividend for the entire year. Only 9½ per cent. was paid, owing to the sudden and almost entire stoppage of collections, in consequence of the financial panic of September last. The collections have since then somewhat improved. Further reference will be made to this subject hereafter.

RENTALS AND BALANCES DUE TO COMPANY.

The following are the rental balances accrued on December 31, 1873, a considerable portion of which has since been paid:—Shenango and Allegheny Railroad, $1,200; Indianapolis, Peru, and Chicago Railroad, $371; Cincinnati, Hamilton, and Dayton Railroad, $1,000; Milwaukee, L. S. and Western Railroad, $4,562; Great Western of Canada, $7,061; Newcastle and Franklin Railroad, $100; Harlem Extension Railroad, $1,125; Pithole Valley Railroad, $375; Pennsylvania Petroleum Railroad, $75; Green Bay and Minnesota Railroad, $2,006; Newark and Straitsville Coal and Iron Company, $14,002; Paris and Danville Railroad, $977; W. P. Rend and Co., Chicago, $5,027; Erie, $3,092; Frederick and Pennsylvania Railroad $1,185; Derby Coal Company, $1,012; Atlantic and Great Western, $238,853; total, $282,026.

Reference has already been made to recent difficulties in making collections due to the September panic. No delay has been experienced in collecting on any contract made during the last six months, or under the more stringent form of contract lease adopted since the last annual report. The trustees hope to make ultimate collection from every company except the amounts transferred to doubtful debtors already given above. But serious uneasiness has arisen concerning the amount due from the Atlantic and Great Western, owing to the peculiar circumstances in which the Rolling Stock Company finds itself placed with regard to the latter.

HISTORY OF THE ROLLING STOCK COMPANY.

The Rolling Stock Company was organized by the friends of the Atlantic and Great Western Railroad Company. It was based upon a contract between the two companies, agreed upon prior to the actual organization of the Rolling Stock Company, and intended, avowedly, as a means of furnishing that railroad company with the rolling stock which it so urgently required, but which it was then unable to acquire in fee-simple. At the request of the proprietary of the Atlantic Company, and the subscribers to the Rolling Stock Company, a board of trustees for the latter company was selected from the directors of the Atlantic Company, and the principal officers of the latter were invited to fill similar positions in the former. This arrangement has, with slight modifications, continued up to the present time.

When the existence of the Rolling Stock Company first became known in this country—no similar institution having previously existed—it was recognized as supplying a want long and urgently felt by the rapidly growing railway system of the United States. The application for stock on terms equivalent to those of the contract with the Atlantic became so numerous and urgent that the trustees felt justified in inviting the original subscribers to double the capital, which was promptly assented to and carried out. But even the increased capital did not enable the

company to satisfy the demand, and nine months ago we had on our books applications for rolling stock for over $5,000,000 in value from among the most prosperous and responsible railroad companies in the United States.

It was, however, soon found that the increase in the capital, and the distribution of the stock among many different companies, involved an entire change in the character of the company's business. The trustees, whose duties originally were of a fiduciary character in watching over the execution of a pre existent contract, found themselves gradually charged with the administration of a large corporation, with interests extending into half the States of the Union involving a vast multiplicity of considerations, legal, financial, and mechanical, as well as those of ordinary business policy. The officers of the company, in serving two corporations, found themselves over-burdened with work, and, in attempting to do justice to both, became involved in a conflict of interests, o' responsibility, and not infrequently of authority.

In the early summer, when these difficulties first made themselves apparent, the trustees at once became convinced of the necessity of a reorganization, with an entire separation of the two companies. In the meantime, certain propositions had been made to leading shareholders, which induced them to recommend delay, and definite action upon the matter was at their request postponed. The visit to Europe of P. H. Watson, Esq., president of the Erie, in the fall of 1873, led again to negotiations which made delay seem advisable, and action was again deferred until the annual shareholders' meeting, which should have been held according to the company's charter on November 6, 1873. At the request of shareholders largely interested, and whose presence would otherwise have been impossible, the annual meeting was postponed; and, when it was finally held in the present month, was adjourned by the stockholders present, in consequence of limited attendance.

Under these circumstances, the position of both trustees and officers of the company has become peculiarly embarassing, especially in view of the company's relations to the Atlantic Company.

THE ATLANTIC AND GREAT WESTERN LEASE.

At the time of making this lease, the Atlantic Company's line of roads was chiefly of the 6ft. gauge, at one time not uncommon in this country, but now generally abandoned, and retained alone by the Atlantic and the Erie. It was, however, at that time the intention of the Atlantic to narrow its gauge at an early day to the universal standard of 4ft. 8½ in. or 4ft. 10 in. With this view, it contracted with the Rolling Stock Company for only a limited amount of broad gauge stock, and ordered the principal part of the schedule agreed upon of the narrow gauge, which was then expected to be in use before the deliveries could be completed. It was found, however, that serious delays intervened in carrying out the narrowing of the gauge, and the Atlantic Company was suffering from insufficiency of stock to carry on its business on the existing 6ft. gauge. As the ordinary cars, if properly constructed for that purpose, can be reduced from one gauge to the other at comparatively slight expense, the Atlantic Company preferred to receive a further supply of broad gauge cars for temporary use and subsequent conversion, while at the same time receiving the narrow gauge stock agreed upon, which was expected at every moment to be imperatively required to carry on business after the change of gauge. Unfortunately, what was expected to be only a brief and temporary delay proved to be, for that year at least, a total abandonment, on the part of the Atlantic, of its intention to change its gauge. The result was, that the railroad company found itself in possession of a large amount of stock, upon which it was incurring a heavy expenditure for rental, but which was for the time being totally useless and unproductive.

In view of these facts, as soon as the Atlantic Company had arrived at a decision, the Rolling Stock Company readily consented to release the Atlantic Company from its contract for narrow gauge rolling stock, in so far as lessees could be found for the same elsewhere, and about 400 cars and forty locomotives were promptly leased to other parties. But before further progress could be made the disastrous panic of September supervened, and not only paralysed our efforts to relieve the Atlantic of its remaining narrow gauge stock, but threw back on our own hands a portion of that previously disposed of. The Atlantic Company now claims that for the latter it should be relieved from all responsibility. It further asks a concession on the rental of all the stock unused during the whole period of its standing idle, on the ground partly that the stock has undergone no wear or depreciation, and partly that an equitable consideration is due to them for the disastrous results of that part of their lease contract. At the same time, and pending the settlement of these questions, the great pressure of the times, from which the Atlantic Company has suffered more than most other trunk lines, makes it difficult for them to meet promptly even that portion of the rental concerning which there is no question. It must be evident that here are the elements of a very serious conflict of opinions, and possibly of a legal contest. It must be equally evident that no such conflict or contest can be carried on with justice to either party so long as the trustees and officers of both corporations are the same persons. However overwhelming the majority of interests that may be identified with both corporations alike, there is, unquestionably, in both corporations a large minority who are interested exclusively in one or the other, and whose interests the trustees are, therefore, especially and primarily bound to protect. While they were far from foreseeing last summer this precise difficulty, the trustees yet feel that, could their advice have been more promptly acted upon, the shareholders would have been better served; and they cannot too strongly urge upon the owners of the property such action as will relieve the present trustees from their anomalous position, and place the great interests of this corporation in the hands of gentlemen untrammelled by conflicting considerations and duties imposed upon them at a time when interests, now possibly divided, were united and harmonious.

CASH AND CASH ASSETS.

With the exception of cash in bank in New York and London, $177,079, this account comprises only—$4 865 for value of shares transferred to trustees to render them eligible under the law; $5,572 of bills receivable at short dates; and $88,304 securities on hand. No other item in the accounts submitted seems to call for special remark.

PROSPECTS.

So long as the general business prospects remain undoubtedly gloomy, and until a genuine reaction sets in from the panic and depression which befel us four months ago, it is unsafe to prognosticate. But although under continued dullness in business the proprietary may have to see a part of their stock continue unproductive, and possibly may have to consent to lower rates or losses on rentals, they have the satisfaction of knowing that the whole of their stock is in the most perfect order and condition; that their mechanical organization, under its present general master mechanic, Mr. C. F. Jauriet, has attained the highest degree of efficiency, and that their earnings will be the first to revive under the inevitable early revival of general prosperity throughout the country.

JAS. B. HODGSKIN,
Treasurer and General Manager.

☞ Onslow Stearns, Edward L. Goddard, Daniel W. Johnson, Dexter Richards, Mason W. Tappan, Charles Minot and Charles O. Sanborn, were elected Directors of the Concord and Claremont Railroad at the annual meeting held at Concord, N. H., on the 27th ult. Hon. Onslow Stearns was re-elected President and John Y. Ungridge, Clerk.

The Illinois Railroad Law.

The first verdict under the Railroad Law of Illinois was rendered in the Sangamon Circuit Court on the 23d of May. The particulars, as given by the Springfield *Journal*, were these:

This was in the case against the Chicago and Alton Railroad Company, on which the latter obtained a writ of certiorari to the United States Court, but which Judge Zane decided, a few days ago, to be still before the Sangamon Circuit Court. As was expected, the railroad company made no defense, its counsel contenting themselves with filing a protest against the proceedings, doubtless for the purpose of furnishing a basis of appeal to the Supreme Court. There were five counts in the complaint, charging as many distinct violations of the Railroad law, all of which were proven by the witnesses who testified in the case. The jury, after being out half an hour, returned a verdict against the railroad company, assessing damages against the railroad company at $3,000. As the law permits a fine of $1,000 to $5,000 it is evident that the jury treated the violations proved as a single offense, though some may claim that there were as many offenses as there were counts in the declaration. The chief interest will be felt in the case in view of the progress toward the determination of the principle involved. What course will be taken by the railroad company has not yet been publicly announced; but it is hoped, for the sake both of the railroads and the State, that such steps will be taken as will lead to a speedy settlement as to the constitutionality of the Railroad law by the decision of the Supreme Court.

Erie Railway.

The Committee on Securities of the New York Stock Exchange have issued the following notice in regard to a certain class of bonds of this company:

Erie Railway Mortgage Bonds may now be registered and transferred to Duncan, Sherman & Co., transfer agents.

The first mortgage extended bonds bearing indorsements, and known as "extended indorsed," if registered by the company and indorsed to bearer, are a good delivery as extended bonds.

If any indorsements are without date, the transfer agents must certify on the bonds that they were there at the time of registering and transfer to bearer.

☞ The directors of the St. Louis, Alton and Terre Haute Railroad Company have declared a dividend of three per cent on the preferred stock, payable on the 6th of July next. An arrangement has been recently perfected between the Indianapolis and St. Louis Railroad Company (the lessees of the main line of the St. Louis, Alton and Terre Haute Railroad Company) and the Terre Haute and Indianapolis Railroad Company (the lessees of the Vandalia line) by which they agree to work together and divide earnings equally. As this puts an end to rivalry and competition between these two lines it is likely to prove beneficial to both of them.

☞ At an election for directors of the New York Bridge Company, held at No. 21 Water St., Brooklyn, on the 1st inst., stock representing 2,460 shares was cast for the following ticket, which was declared elected: Henry C. Murphy, James S. T. Stranahan, Alexander McCue, Isaac Van Anden, Wm. C. Kingsley, Wm. H. Vanderbilt, John H. Prentice, Abner C. Kenny, Benjamin F. Tracy, Hassan H. Wheeler, Jeremiah P. Robinson, Abram S. Hewitt, Seymour L. Husted, William Marshall, and Henry W. Slocum. The Mayor and Controller, both of New York and Brooklyn, are ex-officio members of the board.

Taxation of Corporations in Pennsylvania.

The following circular has been issued by the Treasurer to the Stockholders of the Erie and Pittsburg Railroad Company:

By an act entitled "An Act for the Taxation of Corporations," passed by the Legislature of Pennsylvania and approved by the Governor of said State April 24, 1874, "The tax on the capital stock of railroad, canal and transportation companies is increased from one half of one mill to nine-tenths of one mill for each one per cent of dividend declared, and from three mills to six mills on its appraised value, when no dividend is declared."

Pursuant to the requirements and provisions of the above mentioned act, this company, instead of deducting five per cent, as heretofore, will hereafter deduct nine per cent from each dividend declared upon its capital stock.

Statement of the Public Debt of the United States June 1, 1874.

DEBT BEARING COIN INTEREST.

Totals	$64,623,512 00	$1,615,587 80

Interest paid by United States, $22,386,691 62; interest repaid by transportation of mails, &c., $5,095,450 06; balance of interest paid by United States, $17,291,241 56.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, May 30, 1874.

WILLIAM A. RICHARDSON,
Secretary of the Treasury.

☞ Mr. Franklin B. Gowan, President of the Philadelphia and Reading Railroad Company, sailed for Europe in the "Oceanic," on the 30th ult. He purposes to be absent about three months. Mr. Robert B. Cabeen has been elected President *pro tem*, and will act as president during Mr. Gowen's absence. Until his return all communications and reports such as have heretofore been sent to the president (other than those relating to the transportation department) will be sent to Mr. J. W. Jones, first vice-president, and those relating to the transportation department, both railroad and canal, will be addressed to Mr. G. A. Nicolls, second vice-president.

ENVELOPES.

SAMUEL RAYNOR & CO.
115 & 117 William Street, N Y.

RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh Rails**, and of any required weight and pattern.

PERKINS, LIVINGSTON, POST & Co.,
59 Liberty Street,
NEW YORK.

THE ILLINOIS CENTRAL RAILROAD COMpany offers par and a premium of one per cent. (101 per cent.), with accrued interest, for any of its construction mortgage bonds presented for prepayment prior to July 1, 1874, at its office in New York.

The outstanding balance of its Construction Mortgage Debt is about $3,000,000. These Bonds mature April 1, 1875.

L. V. F. RANDOLPH,
Assistant Treasurer.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

The asterisk (*), occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, June 6, 1874.

Stock Exchange and Money Market.

Money has been quite plenty throughout the week, and lenders have found considerable difficulty in placing balances advantageously, on the basis of even the low current rates, which have been from 2@4 per cent on call to the leading borrowers, for Street use, and 5@6 per cent per annum on the best discount applications. The wants of borrowers have not been urgent in any prominent instance. The speculative demand has been quite moderate. The mercantile call for accommodation has been comparatively limited. The City banks, in their last weekly statement, were $1,839,000 lower on their deposits, and $2,256,300 lower on their loans and discounts, than the week before. The legal tender notes were further augmented $1,608,300, and the specie reserve reduced $504,900. The circulation was contracted $78,400. The U. S. Sub-Treasury at this port has further gained handsomely in the line of its currency reserve, while again reducing its coin hoard mainly through coin interest disbursements. The U. S. Sub Treasury in this city closed the week with a currency balance of $46,417,164, against $44,602,974 the preceding week; and a coin hoard of $49,484,275, against $51,516,242 on the previous return. The City bank exchanges, during the week, were $335,139,852, or a daily average of $67,027,970. The customs revenue of the port, during the week, was $1,780,000, of which $1,566,154 were in coin certificates. The City banks reported their average of gold last week at $25,517,400, and their greenback average at $61,456,100. Their deposits stood at $232,404,300. The loan item was about 280½ millions. The circulation was $26,727,500.

The U. S. Sub Treasury, during May, received from all sources, $46,347,710, including $8,679,313 from customs; and disbursed on all accounts, $46,136,942, including $8,669,601 of coin interest.

The cash balances of the Treasury Department on Tuesday were: Currency, $11,177,704; special deposits of legal tender for redemption of certificates of deposit, $56,050,000; coin, $81,958,797; including coin certificates, $38,179,500.

The outstanding amount of legal tender notes is yet 382 millions; and of National bank circulation 349½ millions.

Government has received about 94 millions from internal revenue, thus far in the current fiscal year.

The aggregate of U. S. currency outstanding on the 1st of June was $436,776,282.

The disbursements of the U. S. Treasury in May amounted to $12,954,683.

Gold has been in quite moderate demand on speculative account, and for Custom House purposes, and the export drain has been on a less important scale. The price has been further depressed and the general market weak. The extremes of the price have been 111½@112⅛, closing at 111⅛@111⅝, as against 112 on Wednesday of the preceding week. The specie outflow, last week, was $2,214,437. The imports of specie at this port since Jan. 1, have been $1,634,497, against $1,769,660 same time last year. The customs demand for Gold last week averaged $442,887 a day. Foreign Exchange has been in less request most of the week, closing easier in price. Bankers' sixty day bills on London closed on Wednesday at $4 87½@$4 88; sight bills on London at $4 90½@$4 91. The week's exports of Domestic Produce have been to the currency value of $5,158,171.

Under the official order of the Treasury $5,000,000 Gold will be sold by the Government in June, to wit, $1,500,000 each on the First and Third Thursdays, and $1,000,000 each on the Second and Fourth Thursdays.

Government securities have been moderately active and generally very firm in price. The purchases on investment account have been checked by the scant offerings of the favorite issues. The last public debt statement indicated a further liquidation of $4,456,833. U. S. sixes of 1881 closed on Wednesday of this week at 121¾@122; U. S. Five-Twenties of 1862, 115½@115¾; U. S. Five-Twenties of 1864 at 117⅛@117⅜; U. S. Five-Twenties of 1865, 118⅛@118⅜; U. S. Five-Twenties of 1865 consolidated, 120@120¼; U. S. Five-Twenties of 1867, 120½@120¾; U. S. Five-Twenties of 1868, 120½@120¾; U. S. Ten-forties at 114⅝@114⅞; U. S. Fives of 1881, (Funding Loan) 115¼@115½; Six per cent. currency Sixes from 114⅛@115.

State and Railway bonds have been in fair demand and generally firm in price. Railway and miscellaneous share property has been comparatively tame, with values generally quoted lower. Speculation showing very little spirit.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $8,580,605, against $6,525,621 same week last year. The exports of domestic produce are $5,158,171, as against $5,396,442, last year. The exports of Gold and Silver, $2,214,437, as against $526,992 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $1,735,000, as against $1,579,000, same week last year.

General business has been less active in the line of domestic produce, with prices quoted lower, in most instances. And in foreign merchandise, the dealings have been on a restricted scale, without any very decided alterations as to values. Metals have been quiet throughout, and quotations very irregular. Eglinton Pig Iron quoted at $34@$35. Glengarnock, $36 50 $37@$50; Coltness, $39@; No. 1 American Pig at $32@$34; No. 2 do. at $30; Forge, $26@$28; English Rails at $55 gold; American Rails at works, $60@$65; Old Rails, $40. Wrought Scrap, $38@40. Ocean Freights have been less active, especially in the Grain and Petroleum line, with rates closing weaker.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

South Carolina Bonds.

The Committee on Securities of the New York Stock Exchange have issued, under date June 1, 1874, the following notice:

F. L. Cardozo, Treasurer of the State of South Carolina, gives notice that the following bonds of the State, issued under Act March 23, 1869, entitled "Loan for the Conversion of State Securities" are authorized to be funded into "Consolidation bonds," they having been duly exchanged and represented by bonds on file, viz:

Denomination of $1,000, numbered in red—No. 1 to 519, inclusive; No. 521 to 1,130, inclusive; No. 2,451 to 2,475, inclusive. Denomination of $1,000, numbered in blue—No. 3,271 to 3,496 inclusive; 3,498. Denomination $500, numbered in red—No. 1 to 237, inclusive; No. 1,001 to 1,200, inclusive. Denomination of $100, numbered in red—No. 1 to 120, inclusive.

The Legislature has declared that the remainder of the "Conversion bonds" were put upon the market without any authority of law, and are absolutely null and void. The disputed bonds are not a good delivery from this date, as regular South Carolina bonds.

☞ A dispatch, dated New Orleans, La., June 2, says that the Supreme Court have decided the Levee bonds issued under Act No. 32 of 1870 to be valid obligations of the State. These bonds have been enjoined, and, in consequence of that injunction, the Stearn Brothers, of London, and other large foreign bondholders, had commenced suits against the State Funding Board. If these suits should be discontinued the Funding Board will commence funding in July, paying the interest on all the bonds to Jan. 1, and the interest on the new bonds to July 1.

☞ Col. Thomas A. Scott has been elected President of the Pennsylvania Railroad Company, vice J. Edgar Thomson, deceased. George B. Roberts has been promoted to be First Vice-President.

Nashua and Lowell R. R.

The annual meeting of the stockholders of this company was held at Nashua, N. H., on the 27th of May. From the report of the directors, which was presented, we learn that the receipts from operations of the road during the last fiscal year were $613,396 71, of which $330,923 10 was for freights, $257,066 01 for passengers, and the balance for express, mails, interest and contingent fund. The expenses have been $529,602 25, of which $81,290 41 have been paid for repairs on the road, $81,973 81 for rent of other roads, $69,643 08 for fuel, $56,320 34 for merchandise and depot expenses, and the remainder for repairs, salaries and miscellaneous expenses. The stockholders have received $80,000 in five per cent. semi-annual dividends. The lines now operated by this corporation, in connection with the Boston and Lowell Railroad, have an aggregate length of 135 miles. The report states:

On the first of August last the Middlesex Central Road was opened from Lexington to Concord, Mass., eight miles, and on the first of January the Peterboro' Road was opened from Wilton to Greenfield, eleven miles. The business from these extensions has been fully as great as was anticipated, for the season of the year that they have been in operation, and an increase of income may be expected from them in the summer months. The roads have, in common with all others, felt the effects of the business panic of last fall. The growth of traffic has been temporarily checked, but there seems reason to hope that it will soon resume its accustomed progress, and that the investments will continue to yield adequate returns.

The following directors were unanimously elected for the ensuing year: Francis B. Crowninshield of Boston, Daniel S. Richardson of Lowell, Edward Spalding of Nashua, Onslow Stearns of Concord and William W. Bailey of Nashua. President, Francis B. Crowninshield; Treasurer, Theodore H. Wood; Clerk, Edward P. Emerson.

☞ At the annual election of the New York and Long Island Bridge Company held on the 1st inst., the following gentlemen were chosen directors: William C. Conover, Isaac D. Coleman, J. L. Brown, John T. Conover, Shepherd F. Knapp, Archibald N. Bliss, Daniel L. Potter, George Wilkes, Anthony W. Winans, Phineas L. Taylor, Gideon L. Knapp, Joel A. Fithean, Henry Vanderwater, Herman T. Livingston, Jacob W. Levy, Edward J. Shandley, Robert M. C. Graham, Charles Johnson, Purcell W. Turney, William Steinway.

☞ Judge Shepley, in the United States Circuit Court at Boston, has decided in favor of the pretensions of the Goodyear Dental Vulcanite Company's patent. He has dismissed the suit of the Boston Elastic Fabric Company against the Easthampton Rubber Thread Company for infringement on Hall's "improved machine for cutting caoutchouc," and that of Ashcroft vs. the Boston and Lowell Railroad Company for an alleged infringement by the Richardson spring safety valve on Naylor's English patent.

☞ Sealed proposals will be received by the Jersey City and Albany Railroad Company until noon June 15, for the work and materials necessary to finish the road to Haverstraw. Information furnished on application to E. K. Alburtis, President, 46 Beaver street, N. Y.

Nashua and Rochester Railroad.

At the annual meeting of this company, held at Nashua, N. H., on the 26th ult., the following Board of Directors was elected for the ensuing year: F. H. Kinnicutt of Worcester; C. H. Waters, Groton; N. V. Whitehouse, Rochester; J. C. Eastman, Hampstead; Francis H. Dewey, Worcester; Charles E. Whitin, Whitinsville; E. B. Stoddard, Worcester; Charles W. Smith, Worcester; Charles S. Turner, Worcester; Aaron W. Sawyer, Nashua; A. H. Dunlap, Nashua; John Lynch, Portland; Joseph C. Burley, Epping; F. A. McKean, Nashua; and Edwin Wallace, Rochester. President, F. H. Kinnicutt; Clerk, A. F. Stevens. The report of the directors shows that the amount of money received from subscribers for the construction of the road is $902,681, of which $894,026 has been thus far expended. Everything connected with the road is represented to be progressing satisfactorily, and it is hoped that the road will be open for public travel in September next.

☞ The following named gentlemen have been elected directors of the Hudson Suspension Bridge and New England Railway Company:—E. W. Serrell, John Q. Hoyt, Hiram Barney, B. E. Smith, J. H. Jackson, C. R. Griggs, A. S. Diven, D. C. Littlejohn, J. R. Macbeth, E. R. Wiswell, C. J. Pusey, L. T. Guthrie, A. W. Humphreys. The following officers were also elected: President, Charles J. Pusey; Vice President, John Q. Hoyt; Treasurer, A. W. Humphreys; Secretary, John R. Macbeth; Chief Engineer, E. W. Serrell.

☞ A bill in chancery was filed in the United States Court, at Desmoines, Iowa, on the 2d inst., for the foreclosure of the first and second mortgages of the Central Railroad of Iowa and the appointment of a receiver pending a decision. H. E. Boardman, A. V. Linde, Charles Alexander, E. B. Page, A. W. Spencer, Sophie W. Dana and Quincy A. Brown, of Massachusetts; Joseph Wentworth and Elijah Colburn, of New Hampshire; Nathaniel Holmes, of St. Louis, and 260 other bondholders, are complainants.

☞ The annual meeting of the Wilton Railroad Company was held at Nashua, N. H., on the 27th ult. The road is about 15¼ miles in length, extending from Nashua to Wilton, N. H., and is operated under lease by the Nashua and Lowell Railroad Company. The receipts for rent of the road for the past year, less all expenses, were $15,136. Two semi-annual dividends of 8½ per cent have been paid, and there is a surplus in the Treasury of $23,254. The following were elected Directors: Isaac Spalding of Nashua; William Ramsdell, Milford; Clarke C. Boutwell, John Reed and Solomon Spalding, of Nashua; Clerk, J. Thornton Greely.

☞ Papers have been served upon the Attorney General and Railroad Commissioners, notifying them that an injunction would be applied for in the United States District Court for the Western District of Wisconsin to restrain them from instituting any proceedings or taking any measures for the purpose of executing the act of the last Legislature. The action is brought by the creditors of the Chicago and Northwestern Railroad Company, who claim that their securities are weakened or destroyed by the law of last winter.

Cheshire Railroad.

The directors of this company, recently elected, are: E. Murdock, Jr., Thomas M. Edwards, William A. Brigham, John Henry Elliot, Samuel Gould, Isaac M. Murdock, George F. Williams. This road continues to be among the very best managed roads in New England, and the report of the Directors shows it to be in a more prosperous condition. The net earnings for the year have been $152,544 26. The indebtedness of the road has been reduced about $29,000 during the year, in addition to the payment of a 5 per cent dividend. The gross receipts have fallen off about $20,000, caused by reduction of rates, the tonnage carried having been equal to former years. The road and all its equipments are in thorough repair. All renewals of rails have been of steel. It is proposed during the coming year to substitute iron bridges for the wooden structures and to add other permanent improvements.

☞ C. J. Brydges, late of the Canada Grand Trunk Railway, has been commissioned by the Dominion to investigate the management of all the railways in New Brunswick and Nova Scotia.

☞ Five first-class locomotives from the Baldwin Locomotive Works, Philadelphia, were shipped to Russia, on the 23d of May.

THE
SECOND ANNUAL EXHIBITION
OF THE
INTER-STATE
Industrial Exposition
OF CHICAGO.
WILL OPEN
September 9th, and Close October 10th, 1874.

Special Features for this year are *Machinery in operation*, and *Processes of Manufacture*. The largest and best Exhibition Building on the Continent. The most liberal arrangements for Exhibitors in every class, and the best and cheapest method of advertising for all Artisans, Manufacturers, and Inventors. Space, Steam Power, and Shafting free. Applications should be made, as early as possible, to

JOHN P. REYNOLDS, Sec'y.

CHICAGO, May 25th, 1874.

COMMERCIAL WAREHOUSE CO.—CASH CAPITAL, $2,000,000—Office, 29 William street, corner Exchange place; warehouses, Atlantic Dock, Brooklyn. Cash advances made on first class securities on demand and time. Cash advances made on all kinds of merchandise stored in our own warehouses or consigned to us on favorable terms.

PAUL J. ARMOUR, President.
JOSE F. NAVARRO, Vice President.
JOHN BAIRD, Second Vice President.
FELICIANO LATASA, Third Vice President.

WILLIAM TOBIN, Sup't of Warehouses.
JAMES CLYNE, Secretary.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

American Railroad Journal.

New York, Saturday, June 13, 1874.

Illinois Central Railroad.

The annual meeting of the shareholders of this company was held in Chicago on the 27th ult. There were present, in person or by proxy, 118,119 shares. On motion, Lucien Tilton was appointed chairman of the meeting, and W. K. Ackerman, secretary. The minutes of the last meeting of shareholders were read and, on motion, approved. The minutes of the meetings of the board of directors, held since the last annual meeting of shareholders, were submitted, and the following resolution adopted:

Resolved, That the acts and doings, resolutions and votes of the board of directors, all and singular, are hereby ratified, approved and confirmed.

The annual report of the president and directors to the shareholders, for the year 1873, with the accompanying statements, was presented and on motion approved. The president stated that the mild Winter had diminished the expenses; this, with greater economy in labor and cost of materials, has given a better net result the first four months than for several years past. The net profit to this date is 21 per cent beyond that of last year, a gain of about $220,000. The present movement of freight traffic is largely towards the south by the new connection, supplying Georgia and other southern States with grain. The following preamble and resolution was adopted:

Whereas, In the negotiation of the Six per cent Construction Bonds of this company, which are payable April 1, 1875, a prospectus was published by the agents of this company, representing that the principal of such bonds, and the interest thereon should, at the option of the holders, be paid in London at the rate of four shillings and two pence sterling, to the dollar, and the bonds by inadvertence were so made as not to express the obligation intended as to the payment of the principal—

Resolved, That the shareholders here represented recognize the obligation of the company to pay such bonds, as stated in such prospectus; and inasmuch as there are outstanding three hundred and thirty-two of such bonds, we request the directors of the company, when such bonds become payable, to pay the principal in London in sterling money at the rate of four shillings and two pence to the dollar.

Also the following resolution:

Resolved, That the shareholders approve the action of the board of directors in making and exchanging the Five per cent Sterling Bonds of this company, for the Consolidated Gold Bonds of the Mississippi Central, and New Orleans, Jackson and Great Northern Railroad Companies.

Resolved, That if the board of directors shall deem it expedient to raise the money necessary to retire, at their maturity, the Redemption Bonds for $2,500,000, payable April 1st 1875, or any part thereof, by the issue of new bonds, the shareholders recommend it to do so, and if in its opinion it is desirable to secure such bonds by a mortgage of the railroad and railroad property of the company, the shareholders recommend that the mortgage be for $15,000,000, and that it provide for the security of the Five per cent Sterling Bonds, and the Redemption Bonds of 1890, as well as for such new bonds.

Resolved, That the meeting do now proceed to elect three directors, to fill the vacancies occurring by the expiration of the term of office of W. H. Gebhard, Wilson G. Hunt, and Jonathan Sturges, at this date.

J. M. Douglas and Henry DeWolf were appointed tellers, to receive and count the votes. The tellers reported that the whole number of votes represented were 118,119, all of which were cast for W. H. Gebhard, Wilson G. Hunt and Jonathan Sturges, to serve until the last Wednesday in May, 1878. Thereupon the chairman declared that all the votes cast were for the above named gentlemen, who were declared duly elected. No other business being presented the meeting on motion adjourned.

People's Freight Railway.

Articles of association, drawn up under the General Railway law, to incorporate the People's Freight Railway Company, were filed in the Secretary of State's Office at Trenton, N. J., on the 6th inst. The stockholders are: J. M. Nash, of Brooklyn; C. W. Jones, George H. Lincoln, Frank Kimball, of New York City, and R. Babcock, Jr., Jas. F. Hughes, P. S. Trainer, H. B. Kerr, Edward McGinnis, W. H. Dorman, Andrew Kerr, Michael Kelley, and Geo. W. Whybard, of Jersey City. These gentlemen are also Directors. The object is to construct and maintain a road from a point on Staten Island Sound at the State line of New York within the township of Linden, in Union County, or Woodbridge, in Middlesex County, to a point on the Delaware River at the State line of Pennsylvania, within the townships of Kingwood or Delaware, in Hunterdon County. The length of the road is to be fifty miles, to run through the Counties of Union, Middlesex, Somerset and Hunterdon. The capital stock is $1,000,000, divided into 10,000 shares. J. M. Nash of Brooklyn, takes 988 shares, and all the other corporators one share each, which makes 1,000 shares the whole amount subscribed.

Sale of the Vermont and Canada Railroad.

The St. Albans (Vt.) *Advertiser* gives the following statement of the contract for the purchase of the Vermont and Canada Railroad by the Central Vermont.

The Central Vermont pays $3,000,000 for the Vermont and Canada in shape of Central Vermont 6 per cent. coupon bonds, thirty years to run from the first day of June, 1874, with interest from the first day of September, 1874.

It is agreed that $45,000 of such interest shall be paid December 1, 1874, and afterward $90,000 shall be paid on the first days of June and December respectively. The Vermont and Canada assigns to the Central Vermont their demand for back rent on the Vermont Central. The contract is secured by a mortgage on the Vermont and Canada Railroad, the mortgage running to three

trustees, viz: Bradley Barlow, Lemuel Shaw and Samuel Wells.

The bonds are redeemable in cash at the option of the Central Vermont. In addition the Central Vermont is to pay to the Vermont and Canada for past incidental expenses not exceeding $20,000. The Central Vermont agrees to indemnify the Vermont and Canada against liability on Ogdensburg and Lake Champlain lease and their guarantee upon $1,000,000 bonds, what is known as Vermont Central guarantee-bonds. The stock of the Vermont and Canada, as far as exchanged for the bonds of Central Vermont is to be surrendered to Vermont and Canada, and by them placed in trust for the Central Vermont. The Vermont and Canada are to execute to the Central Vermont a power of attorney to use their name, in any way they deem necessary, not detrimental to the interests of the Vermont and Canada. When the present outstanding securities of the Vermont Central and of the trustees and the managers are arranged for, then the stock of the Vermont and Canada to be cancelled and the old lease of the Vermont and Canada is to be determined. If the title under the mortgage is liable to be defeated by reason of this old lease, then the Central Vermont and Canada is to hold possession of the Vermont and Canada as lessees, on the same terms as the contract of sale aforesaid, until the title can be perfected, when the Central Vermont shall have right to purchase on the same terms. This contract will take effect upon ratification by the stockholders of the two companies.

Pennsylvania Railroad and Leases.

We have heretofore published the text of the two last annual reports of the Pennsylvania Railroad Company (see issues of March 29, 1873, and March 28, 1874). As a corollary to the exhibits given in the reports referred to we have prepared the following table, which shows the results of operations on the several lines operated directly by the company, both in Pennsylvania and New Jersey.

GENERAL SUMMARY.

The revenues of all the lines of railroads (and canals) operated by the company in 1872 and 1873, and the amounts paid for their working expenses, interest on debts, and dividends to shareholders, were comparatively as follows:

	1872.	1873.
Pennsylvania R. R. and branches	$22,412,525 27	$24,886,008 90
Philadelphia and Erie R. R.	3,980,752 87	3,842,067 20
United Railroads of New Jersey	8,266,226 80	8,516,739 93
Belvidere Delaware R. R. & branch	664,393 18	1,148,222 76
Delaware and Raritan canal	1,524,605 24	1,590,100 12
Gross receipts	$36,448,503 36	$39,988,138 91
Penna. R. R. and branches	$13,764,673 09	$15,440,305 16
Phila. & Erie R.R.	3,288,015 91	3,413,310 84
United Railroads of New Jersey	6,005,166 78	6,792,188 05
Belv. Del. R.R. and branch	515,531 48	825,912 65
Del. & Rar. canal	1,016,037 49	883,321 46
Working expenses	$24,589,424 75	$27,355,038 16
Penna. R. R. and branches	$8,247,852 18	$9,445,703 74
Phila. & Erie R.R.	692,736 96	428,756 36
United Railroads of New Jersey	2,261,060 02	1,724,551 88
Belv. Del. R. R. and branch	148,861 70	322,310 11
Del. & Rar. canal	508,567 75	706,778 66
Net earnings	$11,859,078 61	$12,628,100 75

PENNSYLVANIA RAILROAD.

The statistics presented herewith refer to the main line between Philadelphia and Pittsburg, and the branches (owned and leased) operated in immediate connection therewith:

	1872.	1873.
Main Line of road miles.	358	358
Branch lines " .	426	511
Total railroad operated " .	784	869
Locomotive engines	723	878
Passenger cars	336	385
Baggage, mail and express cars	136	136
Freight cars	13,749	16,282
Railway cars	1,267	1,807
	1872.	1873.
Passengers carried	5,250,393	5,879 684
Do. carried one mile	173,840,412	177,448,863
Freight (tons) moved	4,175,707	4,683,733
Coal (tons) moved	3,669,071	4,52 ,501
Company's fuel, &c. (tons) moved	614,757	787,560
Total tonnage	8,459,535	9,998,794
Passengers	$4,022,012 80	$4,169,141 97
Emigrants	240,005 08	220,529 49
Mails	154,914 78	158,287 50
Express matter	449,627 35	450 241 40
General freights	16,856,891 41	19,608,555 07
Miscellaneous	289,073 85	269,253 47
Gross earnings	$22,012,525 27	$24,886,008 90
Conducting transp.	$4,964,932 75	$5,664,140 57
Motive power	3,826 946 40	4 223,530 53
Maintenance of cars	1,305,899 83	1,926,095 53
Maintenance of road	3,337.724 69	3,246,832 20
General expenses	329,169 42	379,706 33
Working expenses	$13,764,673 09	$15,440,305 16
Net profits	$8,247,852 18	$9,445,703 74

In the following exhibit is shown separately the arnings, working expenses (including rentals paid) and net profits of the branch roads, owned and leased.

	1872.	1873.
Gross earnings	$2 001,706 47	$2,577,527 22
Working exp., &c.	1,994 121 84	2 560,097 10
Net profits	$7,584 63	$17,430 12

The following statement shows the rate per mile of earnings, working expenses and profits, and also the ratio of expenses to gross earnings:

	1872.	1873.
Earnings (main line) p. m.	$55,896 14	$62,314 19
Earnings (branch line) p.m.	4,698 84	5 053 96
Earnings (main & br.) p.m.	28 077 20	28,637 52
Expenses (main) p. m	$32,878 65	$36,062 87
Expenses (branch) p. m.	4,681 04	5 009 97
Expenses (m. & br.) p. m.	17,556 98	17,767 90
Profits (main) p. m.	$23,017 49	$26,251 32
Profits (branch) p. m	17 80	43 99

UNITED RAILROADS AND CANALS OF NEW JERSEY.

The company owning these roads are a consolidation of the Camden and Amboy, the New Jersey and the Philadelphia and Trenton Railroads, their branches and leased lines—in all 276 miles. The company also own the Delaware and Raritan canal 61 miles. All are leased by the Pennsylvania Railroad Company, which assumed all the company's bonds and liabilities, and pay as rental to the stockholders 10 per cent per annum in quarterly instalments. Rolling stock furnished by lessees. The following are the statistics for the past two years of the—

UNITED RAILROADS OF NEW JERSEY.

	1872.	1873.
Passengers carried	7,580,795	8,003,043
Passengers carrried one mile	161,470.933	167,263,599

Dollar 6 p. c. loan. 1888	154,000	154,000
Dollar 7 p. c. bond (N. J.) to State	100 000	100,000
Dollar 7 p. c. bond (U. C.) to State	500 000	250,000
Dollar 6 p. c. loan, 1894	2,000,000	1,930,000
Dollar 6 p. c. loan, 1901	.....	3,000,000
Total funded debt	$16,660,705	$18,758,969

BELVIDERE DELAWARE DIVISION.

The Belvidere Delaware Division consists of the Belvidere Delaware Railroad 68 miles, and the Flemington Branch Railroad 12 miles—in all 80 miles. These roads were leased to the Pennsylvania Railroad Company April 1, 1872, and hence the returns of operations were only for the last nine months of that year.

	1872.	1873.
Passengers carried	.....	397,163
Passenger milcage	.....	6 751,601
Coal (tons) moved	812,749	1,224,528
General freight (tons) moved	172,084	220,045

Working expenses	*$515,531 48	$825,912 65
Net earnings	*$148,861 70	$322,310 11

* The total gross earnings in 1872 (year) amounted to $835,380 35; the working expenses to $616,771 75, and net earnings to $218,608 60.

The following is an abstract from the Balance Sheet showing the financial condition of the company December 31, 1872 and 1873 comparatively:

	1872.	1873.
Capital stock	$995,800 00	$995 869 00
Funded debt	2,244 500 00	2,244,500 00
Special loans	191.882 17	201,591 49
Due other companies	1,036,246 33	1,036,246 33
Total liabilities	$4,468,428 50	$4 478,137 82
Cost of road & equipments, not including discounts and interest on loans	$3,876,841 72	$4,034 829 34

☞ The Southwest Pennsylvania Railroad will be extended this season from Connellsville to Mount Braddock, a distance of about seven miles. The completion of this road to Mount Braddock will put the Pennsylvania Railroad in direct competition with the Pittsburg, Washington and Baltimore Railroad for the coke trade of the Fayette branch.

Western Union Telegraph.

At a meeting of the directors of this company held on the 3d inst., the following Report with accompanying resolutions was presented by the President:

To the Directors:

The net profits of the company for the eight years commencing July 1, 1866, and ending June 30, 1874, those for the present month of June being estimated, are $23,077,069 23.

Of this sum there has been distributed in dividends to stockholders	$4,857,239 34
Disbursed for interest on the company's bonds	2,530,749 98
Total	$7,387,989 32

The balance, $15,689,079 91, is represented as follows:

Paid for the construction of new lines and the erection of additional wires	$4,920,868 53
Paid for the stock of companies leased to the Western Union, subject to an annual rental	700,299 95
Western Union stock (72,877 shares)	4,064,483 07
Gold and Stock Telegraph Company's stock (47,710 shares)	1,173,509 00
International Ocean Telegraph stock (10,384 shares)	961,556 52
Pacific and Atlantic Telegraph stock (56,636 shares)	597,585 50
Anglo-American Telegraph stock (£1808)	10,000 00
Western Electric Manufacturing Company stock (500 shares)	39,000 00
Western Union bonds redeemed and cancelled	1,068,575 00
Western Union building, Broadway and Dey street, mortgage sinking fund	60,000 00
Real estate, exclusive of Broadway and Dey street property	828,769 86
Patent (the Page and Duplex Telegraph,)	61,758 00
Cable steamer	12,665 19
Western Union bonds, not cancelled ($7,500)	6,750 00
Fraction of share, old issue, redeemed and cancelled	42 50
Total	$13,990,863 02
Leaving a balance of net profits	$1,698,216 89

Represented as follows:

Cash on hand and due from agents	$475,000 00
Call loans	400,000 00
Advanced on account of the new building, Broadway and Dey street, in excess of the building mortgage bonds	300,000 00
Poles, wire, and other materials and supplies on hand	423,216 89
Total	$1,698,216 89

Of this sum, $1,400,000 is the net profit for the six months ending June 30th inst., about $740,000 being the net profit of April, May, and June. This is an increase of more than $250,000 over the net profits of the same three months last year, (1873.)

In view of the large reduction of rates throughout the South and West which took effect on the 1st of July, 1873, and of the universal depression in most kinds of business which followed the financial panic of September last, such a result is most gratifying, and seems to furnish grounds for the belief that as the general business of the country improves the receipts and profits of the company will continue to increase.

The Executive Committee have had under consideration for some time past the subject of a disposition of the unappropriated profits above stated. They were at first inclined to recommend a dividend equal to the net earnings of the current six months, which would be about four per cent. on the capital outstanding. To do this, however, would necessitate either the funding of the amounts expended for construction and on the building in excess of the loan made for that purpose, or the sale of a portion of the company's stock now in the treasury. On mature deliberation, it is deemed advisable to do neither, but to limit the dividend to the profits of the current quarter. This course they have unanimously advised me to recommend to the board, and in pursuance I submit the following resolutions:

Whereas, The business and financial condition of the company justify the resumption of regular dividends to the stockholders, which, in the judgment of this board, should be made quarterly; therefore,

Resolved, That a dividend of two per cent. from the net earnings of the three months ending June 30, be and the same is hereby declared payable on the 15th day of July next.

Resolved, That for the purpose of such dividend, the stock books be closed at the close of business on the 25th instant, and be opened on the morning of the 16th of July. WM. ORTON.

The report of the President was accepted and approved, and the resolutions adopted unanimously.

The Union Pacific Railroad Case.

In the U. S. District Court in Boston, on the 2d inst., Judge Lowell refused to grant an order compelling the Union Pacific Railroad Company to show cause why they should not be adjudged bankrupt. The petition was filed some time since and heard two weeks, or more, ago. The petitioner was Mr. Henry W. Goldring of New York, who represented that he owned eight of the $1000 income Bonds of the Company, which are not secured by a mortgage and are due the first of next September. He alleged that the Company is insolvent, and was so on the 18th of last December when it made a transfer and assignment to the Union Trust Company of New York of the railroad and other property to secure sixteen millions of bonds, which purported to be issued in discharge of and exchange for antecedent liabilities, including the Income Bonds. A statement of the debts of the Company, and the amount of annual interest thereon and of the earnings, is given in the petition to prove the insolvency of the defendants. The mortgage is averred to have been given with intent to delay, defraud and hinder creditors, including the petitioner, and to give a preference to some creditors over others, and to defeat the operation of the Bankrupt act. A copy of the mortgage was presented, one agreement of which was as follows:

"That eleven millions one hundred and seven thousand one hundred and eleven dollars of the bonds intended to be secured, shall be reserved to be used by the vote of the Directors of the Company in exchange for or for the purchase or payment of the Income Bonds, and the bonds or proceeds shall not be applied to any other purpose, until the same shall have been fully redeemed or paid."

A part of the act of Congress with regard to the Company was also laid before Judge Lowell by the Company's counsel, which was as follows:

"The books, records and correspondence, and all others documents of the Union Pacific Railroad Company, shall at all times be open to the inspection of the Secretary of the Treasury, or such persons as he may designate for that purpose. The laws of the United States providing for proceedings in bankruptcy shall not be held to apply to said Corporation. No dividend shall hereafter be made by said Company but from the actual net earnings thereof, and no new stock shall be issued or mortgages or pledges made on the property or future earnings of the Company without leave of Congress, except for the purpose of funding and securing the debt now existing or the renewals thereof."

In giving his decision, Judge Lowell said:

"Two most important and interesting questions have been argued in this case. First—Whether the petition alleges an act of bankruptcy on the part of the defendant corporation? Second—Whether the statute which exempts the defendant from the operation of the Bankrupt act is within the constitutional power of Congress to enact?

"It is admitted to be the better opinion generally, and the settled law of this circuit, that a railroad corporation is liable to be made bankrupt: and within a month last past I have adjudged one to be so for preferences such as would have sufficed in the case of a natural person. So that, as I said before, the first question is whether in making a mortgage of its franchise, lands and other property to a trustee for the equal security or payment of all its unsecured creditors, this Company has committed a technical fraud within the thirty-ninth section of the Bankrupt act."

If the Company had been a trader Judge Lowell said that he should have had no hesitation in declaring that such a mortgage securing the payment of creditors after a lapse of twenty years after debts became due would be an act of bankruptcy. But a carrier is not a mere trust to pay in twenty years. It can hardly be said that a railroad company contracting a debt for building and equipping its road undertakes to sell its franchise in season to pay that debt as it matures. Wisely or unwisely, it has been the policy of this country to encourage the building of these new highways by borrowed capital, and he feared it was true of a very large proportion of these corporations that they neither can nor are expected to pay such debts at maturity, excepting by negotiating a new mortgage; and if the very act of giving such a mortgage is a technical fraud on the statute, then all these companies are, or at a period already fixed will certainly be, bankrupt. It has never been said, and cannot with truth be said, that a mortgage by a railroad company is an act of an unusual character. Another important point is that the mortgage does not merely offer to postpone the debt, but to give the long bond or the money instead thereof. This is plainly one of the trusts, and the trustee can be compelled to apply the new bonds in one or the other of these modes to the satisfaction of the present creditors. So far as he knew, even a trader may mortgage his property for present value, if there be no actual fraud. At common law a mortgage of goods necessarily delays creditors, because the goods cannot be taken in execution while the mortgage remains unpaid; and yet it is the law that a mortgage given for the honest purpose of relief, however inadequate the relief may be, that is to say though the whole stock be mortgaged for a small advance, and however certain it may be that creditors will be delayed in levying their executions, will not be considered to be given *with intent* to delay them, the intent being really wanting. It is a new idea of preference that a security can be fraudulent preference to some creditors which is offered equally to all. The very fundamental conception of preference is inequality, and that is equality.

Judge Lowell cited numerous authorities in support of his decision, and concluded as follows:

"While, therefore, I find it to be settled by a preponderance of authority, though against some weighty opinions, that a trust to sell a debtor's

property and divide the cash ratably among his creditors is an act of bankruptcy, I do not find it to be settled that a sale by the debtor himself for cash with intent, so to divide it, is such an act, much less that a mortgage by a railroad company to secure all its creditors equally out of its earnings, or to pay such as refuse the security, their ratable proportion of the proceeds, is an act of bankruptcy.

"My opinion upon the first question renders it necessary that I should decide the still more interesting one of the constitutionalty of the statute which undertakes to except this corporation out of the general law. If supported, it must be, I think, upon the ground of a right in Congress to modify the charter of the Company to that ex tent."

Order to show cause refused.

Transportation to the Seaboard.

The Select Committee on Transportation to the Seaboard, has submitted its report of 492 pages, through the chairman, Senator Windom, of Minnesota. The committee is in favor of a National freight railway from New York to Council Bluffs, to cost $225,000,000. The Federal Government is recommended to open, improve, and hold under its control four great national routes:

First—The Mississippi River.

Second—A continuous water line of adequate capacity from the Mississippi River to the City of New York, via the Northern lakes.

Third—A route adequate to the wants of commerce through the central tier of States, from the Mississippi River, via the Ohio and Kanawha rivers, to a point in West Virginia, and thence by canal and slack water, or by a freight railway, to tide water in Virginia.

Fourth—A route from the Mississippi River, via the Ohio and Tennessee rivers, to a point in Alabama and Tennessee, and thence by canal and slack water, or by freight railway, to the ocean.

The cost of the Mississippi river improvements would be $16,000,000; that of the Northern route from the Mississippi to the city of New York, $19,000,000. On the central route it is estimated that $22,000,000 would be required to improve the Ohio River, $3,000,000 to improve the Kanawha River, and $55,000,000 for a freight railway from the Ohio River to tide water on the coast of Virginia, or if the connection is made by canal, $25,000,000. The Southern canal route would require the expenditure of $5,000,000 on the Tennessee River, $35,000,000 to connect the Tennessee River in Alabama or Tennessee with the Atlantic Ocean by canal, or if by railway, about $30,000,000.

It will be seen from this report, that the lowest estimate made by the committee for opening and putting in operation the four routes is $120,000,000.

The Junction Railroad.

Public attention was some time since called to what was termed "The Junction Railroad" project, whereby it was proposed to carry the traffic of the Fitchburg, Massachusetts Central, Woonsocket, Hopkinton, Boston and Albany and Providence railroads to deep water at South Boston, and to concentrate the termini of these roads for merchandise traffic on the South Boston flats, the filling of which is now under way. The plan has been carefully examined by many railroad experts, and some of these gentlemen out of the State have fully confirmed the only critical remark yet made upon it, to wit: "That it was too far East; if it had been out West it would have been built years ago, and the money borrowed in Boston to pay for it with."

Articles of association have been signed for the formation of a corporation under the general railroad act, to be entitled the "Boston and North western Railroad Company," to construct this line from the Old Colony Railroad near Savin Hill, to a point on the Boston and Albany Railroad, a little east of Grantville, whence very short spurs will connect with the Massachusetts Central and the Fitchburg. The directors named in the articles are Edward Atkinson, Thomas B. Williams, Aaron D. Weld, jr., Edward J. Collins, Robert W. Dresser, Jonas C. Gibson, R. A. Ballou, Aaron W. Russell and James Houghton. A considerable subscription has already been made, and measures are being taken to prese the work to completion at the earliest day.

The plan has been examined by competent railroad men, who express the opinion that the road will probably become an excellent property in itself, quite irrespective of the interest of those who own the land through which it will pass. There are several other connections which will probably be made and perhaps combined with this plan, the most important of which would be the proposed line from South Framingham through Natick and Needham, whereby a connection would be established with the Boston, Clinton and Fitchburg Railroad. The managers expect, by the adoption of these measures, to solve the terminal difficulties in our railway problem.—*Boston Journal.*

Aquarium Car.

The Springfield *Republican* thus describes the Aquarium Car which was recently fitted up at Charlestown, N. H., for its journey to California:

It is a large, handsome passenger-baggage car, forty feet long by nine feet wide, with twelve wheels and an air brake and Miller platform. At one end is a stationary fresh water tank, holding five tons of water, and, at the other end, two salt water tanks, holding in the aggregate the same amount of salt water; the ice-boxes are over the tanks, and there will be twenty or more portable tanks between these two. It is proposed to take the following varieties of fish: Lobsters and oysters from Massachusetts Bay; tautogs, eels and weakfish from Martha's Vineyard; striped bass, kingfish and bluefish from New York Harbor; black bass and glass-eyed pike from Lake Champlain, Michigan and Nebraska; horn pouts from Lake Champlain; fresh water eels from the Hudson river; shad from the Hudson or Connecticut river; catfish from Raritan river, N. J.; alewives from Mystic river, Mass. The departure of the car will depend wholly upon the forwardness of the shad-hatching season. As soon as the shad are ready, the car will start.

☞ The Wilmington, Del., *Commercial* says that more iron vessels have been built in Wilmington than in all the other yards of the country combined. The Harlan Hollingsworth Company, who began to build iron vessels in 1844, have constructed 160 of them, and Pusey, Jones & Company have built 61—making a total of 221, mostly steamers. The Commercial doubts if all the other yards in the country have produced more than 50 iron ships.

☞ At the annual meeting of the Stockholders and Bondholders of the Keokuk and Des Moines Railway Company, held at Keokuk, Iowa, on the 4th inst., the following Directors were elected: Henry A. Barling, Edward D. Wandell, G. W. Duer, Israel Corse, J. Augustus Johnson, Wm. C. Nicoll, C. Seguine Johnson, O. C. Hale, Robert C. Geer.r

☞ The officers of the Southern Minnesota Railroad company, recently elected, are: President, Clark W. Thompson; Vice President and Treasurer, P. M. Myers; Secretary, H. M. Wells, Jr.; Land Commissioner, I. K. Brown.

Windsor and Forest Line Railroad.

A meeting of the grantees and those interested in the construction of the Windsor and Forest Line Railroad, from the terminus of the Peterborough Railroad at Greenfield N. H., to the Vermont Central Railroad at Windsor, Vt., a distance of forty-five miles, was held at Greenfield on the 13th of May. A report was presented showing the estimated cost of the road to be $1,800,000. Of this amount it is proposed to raise $200,000 by gratuity, $500,000 by individual subscription, $270,000 by payment of stock to contractors, and $830,000 by convertible gold bonds. By this plan the individual subscriptions will be only $9,000 per mile of the road. This proposition was discussed and adopted by the meeting.

The prospects of the road were spoken of encouragingly, and it was the prevailing opinion that but for the panic of last season the road would now be in process of construction. Special efforts to raise the necessary gratuity and subscriptions to stock will be made at once.

The meeting elected the following directors: Theodore H. Wood, of Nashua; Hosea W. Parker, Claremont; Josiah G. Graves, Nashua; Geo. E. Dame, Newport; Christopher Robb, Stoddard; Mark N. Spalding, Hancock; James Burnap, Marlow; J. Harvey Dicky, Acworth; Roger W. Love, Claremont; Virgil C. Gilman, Nashua; Hiram Parker, Lempster. Theo. H. Wood was chosen President, and Otis F. R. Waite, of Claremont, Clerk.

Redemption of Five-twenty Bonds.

The following notice was issued by the Secretary of the Treasury on the 3d inst:

By virtue of authority given by act of Congress, approved July 14, 1870, entitled an act to authorize the refunding of the national debt, I hereby give notice that the principal and accrued interest of the bonds herein below designated, known as five-twenty bonds, will be paid at the treasury of the United States, in the city of Washington, on and after the 3d day of September, 1874, and that the interest on said bonds will cease on that day. That is to say coupon bonds known as th series, act of February 25, 1862, dated May 1, 1862, as follows: Coupon bonds, fifty dollars, No 10,601 to No. 12,100, both inclusive; $100, No. 34,001 to No. 37,400, both inclusive; five hundred dollars, No. 17,601 to No. 19,300, both inclusive; one thousand dollars, No. 41,001 to No. 46,100, both inclusive; total, $4,500,000. Registered bonds, fifty dollars, No. 1,411 to No. 1,450, both inclusive; one hundred dollars, No. 10,561 to No. 10,680, both inclusive; five hundred dollars, No. 6,301 to 6,390, both inclusive; one thousand dollars, No. 25,651 to No. 26,100, both inclusive; five thousand dollars, No. 8,101 to No. 8 300, both inclusive; ten thousand dollars, No. 10,321 to No. 10,509, both inclusive; total, $500,000; grand total $5,000,000. Of the amount outstanding embraced in the numbers as above $4,500,000 are coupon bonds, and $5,000,000 are registered bonds. United States securities forwarded for redemption should be addressed to the loan division secretary's office, and all registered bonds should be assigned to the Secretary of the Treasury for redemption.

☞ It is stated that 25 miles of the Missisquoi and Black River Valley Railroad will be built this summer, work is to commence at once. The contractors are C. R. Alton & Co. of New York, and I. N. Sears & Co. of London, England.

☞ The opening of a branch of the Mississippi Central Railroad was celebrated at Durant on the 4th inst.

Central Railroad of Iowa.

A bill in chancery was filed with the Clerk of the United States Circuit Court yesterday, asking that proceedings in foreclosure of the company's first and second mortgages be commenced and that a receiver be appointed pending the decision of this suit.

The plaintiffs number some two hundred and sixty individual bondholders, scattered through the States of Maine, Vermont, Massachusetts, New Hampshire, Rhode Island, Maryland, Pennsylvania and New York, headed by H. J. Boardman, A. V. Lynde and Charles Alexander of Boston, a committee appointed last winter by the bondholders.

It is averred in the bill, among many charges, that the present management of the road is in the hands of men who hold the bulk of the floating debt, that they have, by a false and fraudulent representation of the earnings of the road, induced a majority of the bondholders to fund past due coupons, and those accruing for two years to come, for five years, for the purpose of thus controlling it, and securing the various claims due them, which, under the terms of the various mortgages, are second to the mortgage liens.

That the affairs of the road are loosely managed, and that the earnings of the present year have receded from the earnings of some months of the preceding year and of 1872.

While this suit is ostensibly brought by the first mortgage bondholders, they are supported by the second mortgage bondholders and many of the stockholders, who prefer to seek through the courts an ultimate solution of the difficulties by which the road is surrounded, rather than risk anything more to the present management.—*Iowa State Register*, June 3, 1874.

New Route between Philadelphia and New York.

Some time ago a rumor was in circulation to the effect that the North Pennsylvania, the Central Railroad of New Jersey, and the Baltimore and Ohio railroads had formed a union for the purpose of opening a through line between Baltimore and New York. The report seemed plausible, and it was stated that operations would soon be commenced for the extension of the Doylestown branch to a point on the Delaware river, in order to complete the proposed line. As far as the union is concerned it is probably true, but the route will be different from that at first proposed. The North Pennsylvania Railroad Company, it appears, have settled upon the immediate extension of the North-east Pennsylvania railroad from its present terminus, Hatborough, to the Delaware river, at or near Brownsburg, in this county. It is said that a large number of carts and implements have been brought to that part of the route, between the Bristol road and Pikeville, and the work will begin at once. A connection will be made at Brownsburg with one of the New Jersey roads, extended westward from Bound Brook. This will open a direct route between Philadelphia and New York, said to be but two miles longer than the present road by way of Trenton.—*Doylestown Democrat.*

☞ The directors of the New York Central and Hudson River Railroad Company, elected on the 3d inst., are: Cornelius Vanderbilt, Wm. H. Vanderbilt, Wm. K. Vanderbilt, Augustus Schell, Samuel F. Barger, H. Henry Baxter, Joseph Harker, Chauncey M. Depew, Henry R. Pierson, Walter S. Church, Chester W. Chapin, George J. Whitney and James M. Marvin. Inspectors of Election—Sidney T. Fairchild, Lansing Pruyn and Henry Roseboom.

☞ Contracts have been taken for the completion by September, of the grading on the Sherbrooke and Kennebec Railway from Sherbrooke to Weldon.

The Havre de Grace Railroad Bridge.

In October last the Baltimore Bridge Company of this city received a contract from the Philadelphia, Wilmington and Baltimore Railroad Company to replace one of the wooden spans of the great bridge over the Susquehanna river at Havre de Grace with an iron structure. The span, which is the first on the Perryville side of the river, is 255 feet in length, and was completed a few days ago. The iron work was manufactured in Wilmington, Del., one hundred and fifty tons of iron being consumed in the span. There are eleven wooden spans yet in the bridge, each the same length of the iron one just completed, and a draw one hundred and eighty feet in length, but the railroad company have not determined when they will substitute iron spans for the entire length of the bridge. The company which executed the iron span in question have completed this season four iron bridges on the line of the Erie Railroad, and are now completing a large draw over the Passaic river. The same company are also rapidly completing a four span iron bridge at Lynchburg, for the Virginia Midland Railroad Company, and are building a double track iron bridge to be placed at Tiffin, Ohio, and to be used on the Chicago division of the Baltimore and Ohio Railroad.—*Balt. Sun*, June 9.

Chicago and Northwestern Railway.

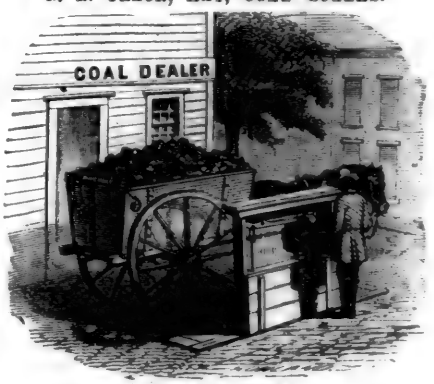
At the annual meeting of this company held in Chicago on the 5th inst., the following gentlemen were elected directors for three years, viz: J. F. Tracy and B. F. Allen of Chicago, David Dows, F. H. Tows and A. B. Bayliss, of New York. The Board subsequently re-elected the old officers for the ensuing year. The following resolution was unanimously adopted:

Resolved, That we approve the action of the Directors and officers of this company in contesting the validity of recent legislation prescribing arbitrary, unjust and inadequate tariffs for the transportation of freight and passengers in the State of Wisconsin, and that we look upon such legislation as in violation of rights granted to this company in our charters, and an attempt at the practical confiscation of private property and a withdrawal of that protection which the laws of the State afford to all other property within its boundaries.

☞ The semi annual report of the Commissioners of the Sinking Fund of the State of Ohio shows the disbursements during six months to have been $561,049 70, and the balance now in the Treasury $153,562 33. The funded debt on the 15th of November, 1873, was $8,211,062 10, and there is still outstanding $8,098,986 30.

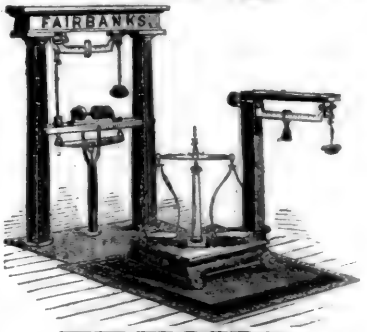
☞ The Grand Trunk Railway Company have decided to change the line to a narrow gauge east of Montreal in September. It will then be of uniform gauge throughout, and will correspond with its American connections.

☞ A corps of Southern Pacific Railroad engineers are engaged in running lines for the Castroville and Monterey branch Railroad.



ENVELOPES.

SAMUEL RAYNOR & CO.
115 & 117 William Street, N Y.



Manufacture every style of Envelope, from the smallest drug size to the largest Official Size, and of any pattern, shape, or quality, including White or Blue Cloth Lined, Parchment and Manilla paper. Railroads, Express Companies, Banks, Insurance Companies, Brokers, Merchants and others supplied with every style that may be wanted. Samples given when requested.

Finances of New Hampshire.

EXTRACT FROM THE MESSAGE OF THE GOVERNOR.

The financial affairs of the State, always a subject of special interest, appear to be in a sound and satisfactory condition. Notwithstanding the monetary derangements of the past year, every obligation has been promptly met, and the financial credit of the State is unquestioned. The report of the State Treasurer, soon to be laid before you, embraces an exhibit in detail of the business of his office, with a statement of the present indebtedness of the State. By his courtesy I am able to present the following summary:

REVENUE FOR THE YEAR ENDING MAY 31, 1874.

Receipts from State tax		$600,000 00
Receipts from other sources		140,062 24
Total revenue		$740,062 24
State expenses, ordinary and extraordinary	$174,693 05	
Interest	259,798 77	
		434,491 82
Excess of revenue		$305,570 42

This sum is represented by cash on hand, and by the reduction of the State debt. Briefly stated, this debt, compared with that of last year, is as follows:

Liabilities June 1, 1873		$4,191,965 48
Less assets in the treasury		59,805 04
Net liabilities June 1, 1873		$4,132,160 44
Liabilities June 1, 1864.	$4,102 166 49	
Less assets in the treasury	275,576 47	
Net indebtedness June 1, 1874		3,826,590 02
Reduction of the debt during the year		$305,570 42

Authority was granted by the last Legislature to issue bonds to the amount of $500,000, with which to pay off the Temporary Loan, then existing, to the amount of $226 000, and to meet other maturing obligations. These bonds were put upon the market, and have been negotiated at par, the proceeds being applied according to the original intent. As will be seen by the preceding statement, the present total indebtedness of the State is $3,826,590 02, all of which is funded, and will mature within the next thirty-one years, in nearly equal amounts annually.

From carefully prepared estimates, based upon an economical administration of the Government, it is apparent that an annual State tax of $400,000 for a few years, with the income from other sources, will be adequate to meet these obligations as they mature, together with the current expenses of the State, and leave a handsome margin besides. The annual tax may then be reduced, or the surplus can be used to anticipate the payment of the longer bonds, as shall be deemed expedient. I therefore recommend that a tax of $400,000 be levied the present year, and I am not aware that any further legislation on this subject will be required.

☞ At the annual meeting of the stockholders of the Chicago, Rock Island and Pacific Railroad Company, held in Chicago on the 3d inst., the following gentlemen were elected directors for three years: George L. Davenport, of Iowa; A. G. Dulman, Harvey Kennedy, and James R. Corning, of New York. President, John F. Tracy; Vice President, Hugh Riddle; Secretary and Treasurer, F. H. Tows; Executive Committee, John F. Tracy, Wm. L. Scott, David Dows, B. F. Allen, and F. H. Tows.

☞ The Lake Erie, Evansville and Southwestern Railway is to be completed from Evansville, Indiana, to the coal fields of Dubois county, immediately.

Wooden Railway.

A Wisconsin paper says that D. R. W. Williams is driving work on the Tomah and Chicago Narrow-gauge Railroad from Wauzeka to Reedstown, and it is expected that trains will be running over that portion of the road by the middle of September. The rails used are maple, which are sawed out 3½ by 5 inches; these are gained into the ties, and fastened at the ends wth dowel pins, the gains in the ties being made a trifle larger than will admit the rails, and on either side of the rail are driven wedges in opposite directions. These maple rails are obtained at a cost of $15 per thousand feet. It is estimated that the maple rail will last over one year without repairs, and that the interest on capital invested in iron rail would relay a track every twelve months. Last Fall, on the Elkader Road, in Iowa, a portion of the track was laid with maple rails, and an examination made of them this Spring shows that they have not been injured by use.

☞ The first meeting of the directors of the Worcester County Central Railroad, comprising a link of twenty-eight miles from Worcester, through Leicester, Spencer, East Brookfield, North Brookfield and New Braintree to Old Furnace Village in Hardwick, where it will connect with the Ware River Railroad, was held in the Town Hall in Spencer, Mass., on the 3d inst., and the following officers were elected: President, Richard Sugden of Spencer; Vice President and General Manager, John Gilman of East Brookfield; Clerk, Josiah W. Temple of Spencer; Treasurer, Edward Sargent of Leicester; Executive Committee, the President, Vice President and Alden Batcheller of New Bedford, W. G. Fay, of East Brookfield, Dr. E. M. Wheeler of Spencer, E. S. Watson of Leicester, T. W. Wellington of Worcester.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending May 30, at 495,604 tons, and for the coal year 6,989,029 tons, against 7,129,113 tons to corresponding time last year, being a decrease of 140,084 tons. The bituminous tonnage for the week is 78,926 tons, and for the year 1,175,787 tons, against 1,151,460 tons to same time last year, giving a total of all kinds for the week of 574,530 tons, and for the year of 8,165,816 tons, against 8,280,573 tons to same time last year, being a decrease of 114,757 tons.

☞ The election for directors of the Chicago and Milwaukee Railroad Company resulted as follows: Directors—Albert Keep, John F. Tracy, David Dows, A. B. Bayliss, A. G. Dulman, M. L. Sykes, Jr., H. H. Porter, William H. Ferry and J. B. Redfield. Officers—Albert Keep, president; M. L. Sykes, Jr., vice president, treasurer and secretary; J. B. Redfield, assistant secretary. Executive Committee—Albert Keep, M. L. Sykes, Jr., and H. H. Porter.

☞ At the annual meeting of the stockholders of the Warwick (R. I.) Railroad Company the following gentlemen were re-elected directors for the year ensuing: William H. Reynolds, Marshall Woods, Stephen Harris, Joseph A. Whitman, George W. Prentice. At a subsequent meeting of the directors William H. Reynolds was elected president, D. C. Reynolds clerk, O. P. Davis treasurer, Samuel N. Keith chief engineer, and Samuel Currey attorney of the corporation.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, June 13, 1874.

Stock Exchange and Money Market.

No new features have been developed in the Money market since our last. The offerings of funds on bank and private account have been largely ahead of the actual requirements of borrowers, whether for speculative or mercantile purposes. The demand has been on a moderate scale in all instances, exceptionally so in the discount line. Call loans have been ranging from 2 @4, and the best mercantile credits have been quoted at 5@6 per cent per annum. The City banks, in their last weekly statement were $491,000 lower on their deposits, and $631,800 lower on their loans and discounts, than the week before. The legal tender notes were further augmented $434,000 and the specie reserve reduced $1,185,800. The circulation was enlarged $36,500. The U. S. Sub-Treasury at his port further increased its currency reserve, while also adding to its coin hoard. The U. S. Sub Treasury in this city closed the week with a currency balance of $47,987,401, against $46,417,164 the preceding week; and a coin hoard of $49,800,805, against $49,484,275 on the previous return. The City bank exchanges, during the week, were $444,888,492, or a daily average of $74,148,082. The customs revenue of the port, during the week, was $2,310,000, of which $2,119,793 were in coin certificates. The City banks reported their average of gold last week at $24,382,100, and their greenback average at $61,890,800. Their deposits stood at $231,913,300. The loan item was about $279,926,300. The circulation was $26,764,000.

The cash balances of the Treasury Department on Wednesday were: Currency, $12,179,608; special deposits of legal tender for redemption of certificates of deposit, $58,075,000; coin, $82,431,589; including coin certificates, $32,555,500.

The outstanding amount of legal tender notes is yet 382 millions; and of National bank circulation 349 millions.

Government has received about 97 millions from internal revenue, thus far in the current fiscal year.

The aggregate of U. S. currency outstanding on the 1st of June was $486,776,282.

The Gold speculation has been further seriously depressed since the publication of the President's views as to the need and means of an early resumption of specie payments. The demand from speculative sources has been much less confident; that for export lighter, and for Custom House purposes moderate. The extremes of the price have been 110½@111½, closing at 110¾, as against 112⅛@111⅝ on Wednesday of the preceding week. The specie outflow, last week, was $2,306,184. The imports of specie at this port since Jan. 1, have been $2,355,316, against $1,088,487 same time last year. The customs demand for Gold last week averaged $374,799 a day. Foreign Exchange has been quoted lower on a restictive inquiry for prime bills. Bankers' sixty day bills on London closed on Wednesday at $4 87½@$4 87½; sight bills on London at $4 90@$4 90½ to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $6,631,703.

Government securities have been moderately active and generally somewhat lower in price in sympathy with the decline in Gold. The earliest series of the Five Twenties of 1862, and the new Five per cents of 1881 (or Funding Loan) have been exceptionally depressed, having fallen more than 2 per cent; the explanation of which depreciation was said to have been found in the recent negotiation of five millions of the Funding Loan without due notice to the public in advance of the sale, and without any subsequent publication of specific information relative to the details of the transaction, the secrecy of which has been very pointedly condemned in business circles, as unfair in itself, as between the Government and the people, and through its disturbance of confidence, injurious in its bearing on the public credit. U. S. sixes of 1881 closed on Wednesday of this week at 120⅝@121; U. S. Five-Twenties of 1862, 118½@118¾; U. S. Five-Twenties of 1864 at 116¼@116½; U. S. Five-Twenties of 1865, 117½@118; U. S. Five-Twenties of 1865 consolidated, 119⅛@119¼; U. S. Five-Twenties of 1867, 119¼120@; U. S. Five-Twenties of 1868, 119¾120@; U. S. Ten-forties at 113¼@114; U. S. Fives of 1881, (Funding Loan) 113@113¼; Six per cent. currency Sixes from 114½@115.

State and Railway bonds have been moderately dealt in, without any very decided changes in values. Railway and miscellaneous share property has been rather more active, and, for a while, stronger in price, but closed weak and irregular.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $8,265,398, against $6,382,231 same week last year. The exports of domestic produce are $6,631,703, as against $5,614,992, last year. The exports of Gold and Silver, $2,415,384 as against $2,158,443 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $2,312,000, as against $2,156,306, same week last year.

There has not been much animation in trade circles, apart from the fairly active dealing in Breadstuffs, in good part for export; and in Provisions and Cotton, mainly on speculative account. Prices have been generally less firm, affected to some extent by the decline in Gold. Metals have been very moderately sought after, with Eglinton Pig Iron quoted at $34@$35. Glengarnock, $36@$37; Coltness, $39; No. 1 American Pig at $32@$34; No. 2 do at $30; Forge, $26@$28; English Rails at $55 gold; American Rails at works, $56@$60; Old Rails, $36@$40 Wrought Scrap, $38@40. Ocean Freights have been more active, especially in the Grain and Petroleum line, but rates have been quoted much lower.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Pacific R. R. of Mo, 41½; do. 1st mort., 79; do. 2d mort., 73; Atlantic and Pacific R. R. pref., 14⅞; St. Louis and Iron Mt. R. Union Pacific Railroad.

The earnings of the Union Pacific Railroad for April, 1874, were $834,954 00, the expenses (including $48,000 for rails, and $36,000 for taxes) $453,366 00, and the net earnings $381,588 00. In April, 1873, the earnings were $881,266 00, the expenses $474,078 00, (including $91,000 for renewals of rails,) and the net earnings $407,187 00—showing a decrease in earnings of $46,312 00, with a decrease in expenses of $20,712 00, making a decrease in net earnings of $25,599 00. For the four months ending April 30, 1874, the earnings were $2,750,686 00, the expenses $1,555,361, and the net earnings $1,195,324 00—showing an increase in earnings, as compared with the corresponding period of the previous year, of $145,404 00, in expenses of $109,887 00, and in net earnings of $35,517 00.

☞ Paterson (N. J.) papers contain the advertisement of the Grand Trunk Railway of Canada for proposals for fifty locomotives, and there is some prospect of the order being received by the establishments of that city.

☞ Trains on the Baltimore, Pittsburg and Chicago Railway, which have hitherto run only to Deshler, have commenced running to Defiance.

Hamilton and Lake Erie Railway.

The annual meeting of the stockholders of this company was held at Hamilton, Ontario, Ca., on the 20th ult., when the reports of the directors and engineer were presented. The business of the line commenced on the 1st of September, one train a day being run each way. In three months after it was found necessary to run two trains each way, and for the past four months 17 541 passengers and 7,044 tons of freight have been carried. The total cost of the line from the Bay to Jarvis, a distance of 33 miles, was stated by the President, in answer to a question from a shareholder, to be about $850,000. The amount of Government and municipal bonuses was $179,000; private stock subscriptions, $90,000. The floating debt of the company amounts to $500,000. The gross traffic receipts for seven months ending 30th April were $38,000, and the working expenses $24,000. The President also stated that none of the company's first mortgage bonds had been sold, but all were hypothecated. The President declined to say what measures they proposed to adopt in view of the deficient net revenue to provide bond interest, so as to ensure the control of the road in the Hamilton interest. The old Board of Directors was re-elected.

Illinois Central Railroad.

The statement of this Company for the month of May, 1874, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	2,256.95 for	$17,542 68
Acres Interest Fund Lands Sold	40.00 for	288 00
Acres Free Lands Sold	40.00 for	520 00
Total sales during the m'th of May, 1874	2,336.95 for	$18,350 68
To which add Town Lot Sales	for	30 00
Total of all	2,336.95 for	$18,380 68
Cash collected in May, 1874		$27,365 50

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$359,269 00	$74,603 00	$433,872 00
Passengers	90,160 65	33,929 05	124,089 70
Mails	6,375 00	3,059 24	9,434 24
Other sources	78,125 00	2,370 76	80,495 76
Tot'l May '74.	$533,929 65	$113,962 05	$647,891 70
Total actual earn'gs, May, 1873	$506,016 73	$129,442 26	$635,458 99

☞ At a meeting of the stockholders of the Columbus, Chicago and Indiana Central Railway Company, at Columbus, Ohio, on the 3d inst., the following directors were elected: W. D. Thompson, Adrian Iselin, W. R. Fosdick, W. Whiteright jr., J. R. Waller, G. Gamell, Walter S. Gurnee, F. R. Fowler, of New York; J. T. Thomas of Philadelphia; Wm. Dennison, B. E. Smith, J. F. Bartlit, G. B. Wright, W. Jamison, of Columbus; John Gardiner, of Norwalk, Ohio; John S. Newman, J. N. Converse, of Indiana. President, B. E. Smith; Secretary and Treasurer, Gordon Moodie.

☞ A cable telegram from London, England, announces the appointment of Mr. Sergeant, Manager of the South Devon Railway, as successor to Mr. Brydges in the management of the Grand Trunk Railway of Canada.

The Western Railroad Law.

The Madison (Wis.) *Democrat* publishes an abstract of the papers served upon the Attorney General and the late railroad commissioners, notifying them that an injunction would be applied for in the United States District Court for the western district of Wisconsin, to restrain them from instituting any proceedings, or taking any measures for the purpose of executing an act of the last Legislature regulating railroads. The action is not brought in the name of the Chicago and Northwestern Railroad Company, but in the name of its creditors, who claim that their securities are weakened or destroyed by the law of last winter. The creditor parties to the litigation are William Frederick Riek, Moses Taylor, Henry R. Pierson, the Farmers' Loan and Trust Company, and the Union Trust Company of New York. The defendants were cited to appear at Madison, before Judge Drummond, on Thursday last, which they did, when the Attorney General asked for time. Judge Drummond said that, pending the delay, a temporary injunction would be granted, when the Attorney General agreed to proceed with the argument at once.

☞ The earnings of the Indianapolis, Cincinnati and Lafayette Railroad for the first four months of 1874, were $588,879, the expenses $388,798, and the net earnings $200,081. For the corresponding period of 1873 the earnings were $575,705, the expenses $491,196, and the net earnings $84,509—showing a gain in net earnings in 1874 of $115,572. The severe winter of 1873 and expenses consequent upon it is one reason why the comparison is so favorable to this year, but the work of renewal is still going on, and is charged into expenses. After July this work will be about finished and the expenses will be considerably decreased. The business is light, and for May and June will show a large decrease of gross earnings, but the net will probably be larger.

☞ The earnings of the Lake Shore and Michigan Southern Railway for the four months ending April 30, 1873, were $6,530,160 80, the expenses $4,377,983 06, and the net earnings $2,152,178 74. For the corresponding period of 1874 the earnings were $5,789,752 90, the expenses, $3,604,317 46, and the net earnings $2,185,435 44—showing a decrease in earnings of $740,407 90, with a decrease in expenses of $773,664 60, making an increase in net earnings of $33,256 70.

☞ The earnings of the Central Pacific Railroad for May, 1874, were $1,360,000, against $1,378,675 in May, 1873, and $1,380,922 in May, 1872. For the first five months of 1874 the earnings were $5,027,026, against $5,024 205 in the first five months of 1873, and $4,370,348 in the first five months of 1872.

☞ At a meeting of the bondholders of the Northern Pacific Railroad Company, held at No. 23 Fifth Avenue, New York, on the 8th inst., Mr. Wm. B. Ogden, of New York, was unanimously elected Trustee in the place of Mr. J. Edgar Thomson, of Philadelphia, deceased.

☞ The earnings of the Erie Railway Company for the five months ending May 30, 1874, were $7,801,970, against $7,795,215 for the corresponding period of 1873, a decrease of $493,245.

North Shore Railway.

At the annual meeting of this company held at Quebec on the 20th of May, a report of the past year's operations was read. It stated that:

Mr. McGreevy has entered upon the work with great spirit and energy, having already secured the right of way, and made arrangements for the completion of the grading, masonry, &c., from Quebec to the city of Three Rivers, a distance of about eighty miles, during the present working season. A considerable quantity of stone and timber has been prepared for the foundations at the principal river crossings, and there are now several engineering parties engaged upon the line, preparing the work for the contractors. A large quantity of fencing material has also been delivered along the line.

Directors were elected as follows, the names including some of the most substantial business men of Quebec: Messrs. J. B. Renaud, Willis Russell, Col. Rhodes, John Burstall, Jas. G. Ross, Andrew Thomson.

☞ The Milwaukee *Wisconsin* says that provision was made by the Wisconsin Central Railroad Company for the payment of the interest due June 1, on the funds of the Milwaukee and Northern Railway, that the same was promptly met, and no protest was made. This action of the Directors was made because of an order issued by the United States District Court, directing the officials of the Central road to retain enough of the net earnings of the line leased to them to meet the accruing interest on the bonds of the Milwaukee and Northern Railway Company.

☞ A co-operative iron company is to be organized at Pottsville, Pa., consisting of puddlers and other iron workers. They propose to either build works along the Berks County railroad, or lease the mill property of the Hamburg Iron Company.

☞ The earnings of the Burlington, Cedar Rapids and Minnesota Railroad for the five months ending May 31, 1874, were $449,072 31, against $385,111 32 for the first five months of 1873, an increase of $63,960 99.

COMMERCIAL WAREHOUSE CO.—CASH CAPITAL, $2,000,000—Office, 29 William street, corner Exchange place; warehouses, Atlantic Dock, Brooklyn. Cash advances made on first class securities on demand and time. Cash advances made on all kinds of merchandise stored in our own warehouses or consigned to us on favorable terms.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

New York, Saturday, June 20, 1874.

Michigan and Ohio Railway.

We have been favored with a copy of the report of J. F. MEYER, C. E., addressed to GEORGE GRAY, Esq., of London, Eng., describing minutely the region of country, the cities and numerous towns through which the proposed road will pass, its connections, and the amount of traffic which the road may reasonably expect when completed; together with an estimate, by close calculation, of its cost. Mr. Meyer is a gentleman of considerable experience and undoubted judgment in railway matters. He has been personally over the entire route to be traversed, and spent considerable time at the most important places, examining the country, conversing with its prominent business men, consulting statistics of trade, etc., etc., and we have therefore no reason to doubt the reliability of the report made by him. According to Mr. Meyer:

"The line of railway, when completed will be 400 miles long. Its two terminal points are the towns of Grand Haven, opposite the City of Milwaukee, on Lake Michigan, and Portsmouth on the Ohio river.

"The latter place is a city of considerable size, and very enterprising; the route will here make connection with the Chesapeake and Ohio, and the proposed Pound Gap route, thus forming an unbroken connection to the harbors of Richmond Virginia, and to all of the Southern Atlantic harbors nearer by 300 miles, than by way of New York. The proposed railway runs in a northwesterly direction by way of Columbus, through Ohio, crosses the state line in the northwesterly corner of Ohio, and thence to Grand Haven. It crosses thirty different railways and shortens the distance from Milwaukee by way of the lake, by 250 miles, to any of the Eastern Atlantic ports. It is proposed, as soon as the route is completed, to run separate fast steamers from Milwaukee to Grand Haven, where the loaded cars are to be brought over on the steamers and run down on the Michigan and Ohio railway, thus saving the 250 miles by way of Chicago, where otherwise, the great shipment of grain and other produce from Wisconsin and further west has to pass."

It is well known that the products of the west and northwest move in an easterly and northeasterly direction to cities of the Atlantic coast, and that a very considerable portion of the products of the northwest, viz: wheat, corn, barley, etc., as well as meats, dairy products and roots are first shipped east, and thence re-shipped to the cities and towns along the South Atlantic, and Gulf ports, to be ultimately consumed by the cotton, sugar, rice and tobacco planters; while their products are sent, via the same route, to the northwest, at a considerable expense to both parties. By the construction of the Michigan and Ohio Railway it is claimed that this interchange of commodities, which is constantly going on, can be effected at a saving of 30 per cent to the consumers.

The rich coal and iron ore beds of the southeastern portion of Ohio, the produce of which are in increasing demand in the northwest, have been entirely neglected, owing to the lack of cheap and rapid transportation. So, also, of the extensive pine forests and immense plaster beds of Michigan, the products of which are required in the Southeast; and, like the coal and iron of the Scioto Valley, can only reach the place of consumption by a circuitous route, involving an increase in distance of from 300 to 400 miles, and an increased cost for transportation of from 40 to 50 per cent. All this, it is claimed, can be obviated by the construction of the Michigan and Ohio Railway.

By taking the products of the northwest, destined for the eastern markets, via Milwaukee to Grand Haven, and thence by the Michigan and Ohio Railway, the report says a saving of 250 miles will be made, as compared with the route via Chicago, and the same can be brought nearer to any of the Atlantic ports by the Baltimore and Ohio or Chesapeake and Ohio Railroads, by 350 or 400 miles than by way of Albany to New York or Boston.

By examining a map, it will be seen that there are no parallel roads on either side of the projected Michigan and Ohio Railway, within from 50 to 100 miles, and that it runs through a country renowned for its fertility and productiveness, through numerous manufacturing cities and towns, and crosses more than thirty of the principal Railroads, all of which would induce us to believe that the road, if constructed, would prove a success, and become eventually, a dividend-paying road. We are assured that liberal contributions and donations of land for right of way are already being made by the people along the route.

The great respectability and business capacity of the gentlemen connected with this enterprise, leads us to believe that they will be successful in their efforts to secure the means requisite for the construction of the road, and that the products of the section of country named will thus be enabled to flow in their natural channels, and by the straightest and shortest way to reach the best harbors on the Atlantic coast.

☞ We are pleased to learn that Col. Miller has secured his English patents on what we consider among the most useful of American inventions. Messrs. Gilbert, Bush & Co., of Troy, New York, are building six cars, of American style, with Miller's platforms, buffers and couplers, for a railroad in Australia. The fame of these inventions is extending throughout the whole world.

☞ The following gentlemen have been elected Directors of the Twenty-third Street Railway Company: Jacob Sharp, Lewis May, James A. Richmond, L. J. Phillips, David J. King, B. F. Beekman, Charles G. Shaw, John T. Conover, Thomas P. Wallace, John R. Flanagan, James Flanagan, Eugene Ballin, and Thurlow Weed.

Colfax and the Grangers.

HIS VIEWS ON RAILROADS, ECONOMY, PUBLIC MONEYS, AND MIDDLEMEN.

In a recent letter declining, by reason of prior engagements, an invitation to address an Indiana Grange, Hon. Schuyler Colfax says:

Entirely removed now from political position or political candidacy, I can say, without a misconstruction of my motives, that the evils which the Grange organization was primarily intended to correct or modify were pointed out warningly by me in a Fourth of July oration two years ago, before the organization had attained its present prominence. But I have always recognized that there are railroad rights as well as railroad wrongs, and that this great question must be settled, and can only be enduringly settled, on the basis of right and justice, and upon those principles of equality which have been potential in the settlement of all the great questions confronting us in our recent history. Thus, while all must acknowledge their great usefulness in developing the resources of the nation, and opening vast areas of our interior to settlement and improvement, we all see plainly that railroads can no more do without the producers than the producers can do without them. And all should concede that, as railroads can only be built by the exercise of the State's right of eminent domain, under charters as public highways granted by the people through their Legislatures, they have no more right to denounce reasonable legislative supervision than ferries and turnpikes chartered by the same authority. And if the miller who grinds wheat can rightfully be limited by the State in his tolls, why cannot the railroad which brings the wheat to his mill to be ground? The just ground on which all just men can unite is that railroads should be common carriers for all on common grounds, and at equitable rates, without favoritism or unjust discrimination, and on the just basis of 'reasonable rates for the people and reasonable profits for the companies.' I remember, many years ago, how a distinguished English statesman was criticised for a proposition that their great railroads should run third-class trains, mornings and evenings, for laborers, &c., at a penny (two cents) per mile. He was lampooned as a demagogue and as a visionary theorist. But these 'parliamentary trains,' as they are called, were found, when at last reluctantly established, to be not only the great accommodation for the poor that was claimed for them, but also among the most profitable to the companies of all their trains.

Two things in your organization have struck me as specially auspicious. First, the admission of your wives and daughters to membership, enhancing doubtless the social interest of your meetings, and beckoning woman onward to wider sphere of usefulness in the community; and, secondly, the frank and outspoken declaration of so many of your granges as to intemperance, the enemy of the working man and the bane of society. I trust your organization will never speak with an uncertain voice on this great evil of the century. For all experience proves that, where drinking shops decrease, crime and pauperism with their consequent taxation decrease, comfort and happiness in the abodes of the poor increase, and law and order, peace and quiet, industry and thrift, more generally prevail.

Your demands, too, for increased economy in public expenditures and greater watchfulness as to public moneys, cannot fail to do good. When you proceed from generalities to details you will find that, besides strict scrutiny as to national appropriations, you will need quite as watchful care as to home taxation. Gov. Hayes, of Ohio, one of the best Governors that State ever had, proved several years ago, in a message that attracted too little attention, that unrestrained local taxation was the heaviest burden, by far, the taxpayer had to shoulder. And that is so completely within your power, locally, I have great hopes of beneficent results in that line from your organization.

Not being a member of your order, I am not sure that I understand your exact position as to 'middlemen.' If your object is to economize as far as possible, buying with cash from manufacturers or their agents, at their lowest prices, instead of on credit at higher rates, and thus saving the heavy per centages that the credit system absorbs from the honest poor, that is certainly laudable. But middlemen, as a class, are as necessary in the operations of trade and commerce and business, as lawyers are in law, and doctors in medicine, and need a special education and adaptation to their work. If you could abolish all middlemen with their experience, you would have to educate and train up middlemen out of your ranks to fill their places. And, as we cannot buy dress patterns for our wives direct from the Manchester mills, we must recognize that agents who contract at wholesale, and taking all risks of shipments and sales, retail goods to us, are, to a large extent, a necessity. But no one can object to the policy of buying and selling direct for cash in hand, as far as it is feasible.

Northern (N. H.) Railroad.

The earnings of this road for the years ending March 31, 1873 and 1874, were as follows:

	1873.	1874.
From passengers	$228,045 89	$228,778 89

Balance of interest account		15,520 99
Total income		$287,906 69
From which deduct—		
Dividend Dec. 1, 1873, $4 per share	$119,924 00	
Dividend June 1, 1874, $4 per share	119,924 00	
		239,848 00
Balance of income account		$48,058 69

The foregoing statement represents the accounts of the year as they appear in the Treasurer's books. It includes all the receipts from the business of the road during the year, but not all the income which has actually accrued to the company within that time. The explanation of this will appear in what is hereinafter stated.

The panic of last autumn, and the unfavorable season since for important business enterprises on the line of the road, have been unfavorable to the operations of the past year; and some effect from the same causes probably will be felt in the present year.

During the year, 609 tons of new rails and 45,537 new sleepers have been placed in the track; and about 3,400 tons of rails have been taken up, repaired, and relaid. One new passenger and also one new freight engine, and one baggage car, have been built and are additions to the furniture of the road. And one passenger and twenty-eight merchandise cars have been built to replace old ones; and the road and its furniture are in good condition.

The accounts in the Treasurer's office have been simplified and rearranged so as to show only such items of assets of the company on hand as are real and valuable.

The increase of bills payable from the amount stated last year, which appears in the present trial balance, has arisen from this: Prior to the close of the year in March last, notes of the company were given for funds borrowed to be used towards payment of the bonds of the company to the amount $102,100, which became due on the first day of April. But as the payment of those bonds was not made until after the close of the past year, it is not included in the accounts of that year. Payment has been made since of bonds to the amount of $85,200, and funds are ready for the balance whenever presented.

Instead of applying the assets, which had been intended to provide funds to meet the bonds above mentioned at maturity, for that purpose, the Directors have thought best, under the circumstances, to issue notes of the company to raise such part of the money required for that payment as was not ready from other sources. With this view, and also to fund other temporary loans of the company, an issue of its notes has been made to the amount of $104,000 at the close of the year, payable in three or five years from date. Within that time it is expected that sufficient funds can be realized from the assets of the company to meet those notes and discharge all of its indebtedness. The amount of those notes is included in the amount of bills payable, as stated in the trial balance.

It is known to the stockholders generally, we presume, that several years ago this company became interested in the securities of several roads in New Hampshire, the Concord and Claremont, the Contoocook River, and the Sullivan Railroads. The nominal amount of those securities was large, but the substantial value of them was problematical. All those corporations had become entirely insolvent, and the only possible way to realize anything from the securities was by recourse to the mortgages to obtain possession of the roads, and thus secure whatever might be realized from them. Steps were taken for that purpose, the necessary legislation obtained, and foreclosures of the mortgages of the roads have been made in the course required for that purpose. Long delays have been unavoidable in these proceedings. And although in the mean time funds were accruing from the operations of the roads, in which this company would be entitled ultimately to participate, yet, until the completion of the proceedings and settlements of the trusts, the interests of this company could not be fully determined and the funds properly come into its accounts.

By votes of the stockholders of this company at their annual meeting in May, 1868, the Directors were authorized to arrange for such use as they might think proper of the funds arising from the operations of the roads above referred to, so far as this company might be interested in those funds, to aid the construction of the Sugar River Road from the terminus of the Concord and Claremont Road in Bradford to the Sullivan Road in Claremont. The success of that enterprise was regarded as important to this company on account of its large interests in the Concord and Claremont Road which would be benefited by the new business thus brought on to it, and also with reference to the protection of other interests of this company connected with its main line. In compliance with those votes, therefore, aid has been given to the completion of the Sugar River Road by loans from the funds referred to and otherwise, so far as this company could do so. Mention of this was made in the annual report for last year, to which we refer.

Sufficient opportunity has not been had as yet for a full test of the value of the business on the line of the new road between Bradford and Claremont; but we believe that in its direct and indirect relations to the interests of this company the road will prove advantageous to it, besides being highly useful and beneficial to the public in an important section of the State. Much disadvantage and useless expense heretofore have been

in curred in the operations of the line from Concord to Claremont, with the connecting branch to Hillsborough, on account of the several parts of the line belonging to three distinct corporations requiring separate organizations and accounts. But during the past year those corporations have been united into one, under the name of the Concord and Claremont N. H. Railroad; and the accounts of the former corporations have been adjusted so as to allow of the interests of this company in the assets arising from their past operations, in part, to be brought into the accounts of this company. This will account for the increase of $408,193 55 in the contingent fund as it now is, from the amount which was stated in the report for last year.

The interest account, which is included in the statement of the year, has come in part from the loans above mentioned to the late Sugar River Road; and a larger sum has accrued during the year from the same source, but which is not yet included in the accounts of this company because it has not been fully adjusted with the new corporation. Besides, the sum of $25,000 will come to the company from the rent of the Sullivan Road during the past year. The addition of these amounts to the statement at the commencement of this report, would be necessary in order to show the total income of this company during the past year.

The equipment of the road March 31, 1874, was as follows: 12 passenger and 17 freight locomotives, 412 long and 101 short merchandise cars, 16 passenger, 7 baggage and 19 gravel cars. Number of miles run by passenger trains, 189,807; by freight trains, 282,000; by other trains 5,649—total, 477,456. Number of passengers carried 199,066; do., carried one mile, 8,177,430. Tons of merchandise carried, 882,947; do., carried one mile, 23,721,128.

TRIAL BALANCE SHEET, March 31, 1874.

President.—ONSLOW STEARNS.

Directors.—Onslow Stearns, John A. Burnham, George W. Nesmith, Uriel Crocker, Josiah Minot, Charles F. Choate, Edward Lawrence.

Treasurer.—J. MINOT.

Superintendent.—GEORGE E. TODD.

☞ It is now believed that the Lafayette, La Salle and Clinton Railroad, to extend from Sheldon, Indiana, to a point on the Prophetstown road, in Illinois, will be constructed this year. The estimated cost of construction and equipment is $2,188,000.

Northern Central Railway.

The Northern Central Railway company has executed a mortgage of its property to the Fidelity Insurance, Trust and Safe Deposit Company of Philadelphia as security for ten millions of its bonds. The mortgage is dated May 27, and was placed on record in the clerk's office of the Superior Court of that city on the 3d inst.

This is in accordance with the resolutions of the Board of Directors, passed at their meeting on the 9th of April last, viz: That for the purpose of providing for the floating debt of the company and for such terminal and other facilities and improvements and equipments as may be necessary to properly conduct the business of said road, the Board of Directors were authorized to create a consolidated mortgage of ten millions of dollars to secure bonds of that amount, said bonds to be issued in such form or sums, either in sterling or dollar bonds, and at such times, and to mature respectively at such dates, and bearing such rate of interest as the directors may, from time to time, deem to the best interests of the company. Of said ten millions, six millions shall be set aside and retained by the trustees, to be applied by the Board to provide for the payment of the existing bonds now issued, or may hereafter be issued, &c.

It was also resolved that the company make and execute to the Fidelity Insurance, Trust and Safe Deposit Company of Philadelphia a mortgage of the property, &c., of the company as mentioned therein, said mortgage to be a continuing lien to secure the payment of the 10,000 bonds, to be issued from time to time, after the payment of the whole or any portion thereof, or of any subsequent issue, never to exceed, however, at any one time ten thousand bonds outstanding, said bonds to be either of $1,000 in gold coin of the United States, or £200 sterling of Great Britain, &c.

The following form of certificates is to be placed on each of said bonds:

"This bond is one of those received by a mortgage of the Northern Central Railway Company (duly recorded), dated the 28th day of May, 1874, executed and delivered by the said company to the Fidelity Insurance, Trust and Safe Deposit Company of Philadelphia, the trustees therein named, and its successors, of the railroad estate, real and personal, and corporate rights and franchises therein mentioned, to secure the bonds of the said company therein set forth."

It was also resolved by the company that out of eight thousand bonds authorized to be issued there shall be retained six thousand bonds, which shall be applied to the payment of the bonds of this company, secured by mortgage of July, 1868, or other prior mortgage, exclusive of the annuity to the State of Maryland.

The remaining two thousand bonds shall be issued as hereafter authorized by the Board of Directors. The aggregate amount of all the bonds secured by this or any other prior mortgage of the property of the company, exclusive of the annuity to the State of Maryland, shall at no time exceed $10,000,000, but including the issue of $2,000,000 of bonds, if the same is hereafter authorized by the stockholders, &c., may be equal to $10,000,000; and that after the payment and cancellation of the whole or any portion of the bonds now outstanding or hereafter to be issued, an equal amount of bonds may be made and issued by this company for any of the purposes contemplated by the resolutions.

The deed of mortgage is signed by J. D. Cameron, President, and Robert S. Hollins, Secretary of the Northern Central Railway Company; also by N. B. Browne, President, and R. Patterson, Secretary of the Fidelity Insurance, Trust and Safe Deposit Company.

Pennsylvania Company.

An adjourned meeting of the stockholders of the Pennsylvania Company was held in Pittsburg on the 15th inst. Col. Thomas A. Scott, President, presented his report, showing the operations of the company for the year 1873. The following is a statement of the net earnings of the various roads operated by this company: Pittsburg, Fort Wayne and Chicago Railway, $3,522,082 57; New Castle and Beaver Valley Railroad, $192,514 75; Lawrence Railroad, $76,011 11; Erie and Pittsburg Railroad, $484,398 74; Cleveland and Pittsburg Railroad, $1,797,018 10; Jeffersonville, Madison and Indianapolis Railroad, $1,797,013 88; total net earnings, $6,518,170 15. The final result to the Pensylvania Company, after paying all expenses, rentals, interest, etc., shows a net profit of $1,238,340, out of which dividends have been paid on preferred and common stock, $570,000, leaving a balance of $668,310. The lines are now amply supplied with facilities to meet not only present demands, but also a much increased balance of business, and the condition of the track and rolling stock will enable business to be moved with economy and despatch. On the Pittsburg, Fort Wayne and Chicago Railway, forty-nine per cent of the entire line was relaid with new rails, and 6,000 tons of steel rail, and twenty-eight per cent of the ties were renewed. On the Cleveland and Pittsburg Railroad thirty-five per cent of line was relaid with new iron. In addition to the lines enumerated, and which are operated under leases, this company has also worked during the past year, on account of proprietary companies, the Ashtabula, Youngstown and Pittsburg Railroad, and the Toledo, Tiffin and Eastern Railroad, and completed a portion of the Mansfield, Coldwater and Lake Michigan Railroad. The directors of the company, elected on the 3d inst., are: Thos. A. Scott, George B. Roberts, H. H. Houston, H. J. Jewett, J. N. McCullough, Wm. Shaw and Edmund Smith.

☞ We learn from Cincinnati that the controversy between the Indianapolis, Cincinnati and Lafayette, and Whitewater Valley Railroad Companies, was decided in the District Court of Hamilton County on the 15th inst., the District Court reversing the decision of the Common Pleas Court, which appointed a Receiver, and discharging the Receiver appointed by that court, for the Harrison branch of the Whitewater Valley Road, and ordering the Harrison branch to be delivered to the Whitewater Valley Company. In the matter of the Hagerstown Branch Road, Judge Davis, of the Supreme Court of the United States, last Saturday, decided that the Indianapolis, Cincinnati and Lafayette Railroad Company had no claim, and the court refused to appoint a Receiver. These decisions settle a long pending controversy.

☞ McConnellsville is to be the southern terminus of the Columbus and Mineral Valley Railroad. Pleasantville, New Lexington and Ferrara will be points on the line.

Railroad Law.

RAILROAD COMPANIES.—LAW AS TO CROSSINGS—WHAT REGARD MUST BE PAID TO INTERESTS OF PRIVATE PROPERTY.

The facts of this case are fully set forth in the following opinion of the Court by Judge JOHNSON:

The question in this case arises upon the forty-fourth section of the general railroad act of 1850. (Laws of 1850, p. 233.) That section requires that every corporation formed under the act "shall erect and maintain fences on the sides of their road of the heighth and strength of a division fence required by law, with openings or gates or bars therein, and farm crossings of the road, for the use of the proprietors of lands adjoining such railroad." It is contended that under this statute the right to designate where the crossing should be made is in the land-owner; and the case of Wheeler *vs.* The Rochester and Syr. R. R. (12 Barb., 227) to that effect is cited in support of the position, and certainly inclines to that view. But it does not seem to me that sufficient attention was paid to the language of the statute and all the circumstances in which it was intended to apply. It is not limited to cases where the corporation acquires the land by the exercise of the power of eminent domain, but applies with equal force where the lands are purchased at a voluntary sale. In each case the duty to make farm crossings is imposed on the corporation, and the extent of the duty is the same in each. From the words, "for the use of the proprietors of lands adjoining," is to be implied an exclusion of any right in others than the proprietors to use the farm crossings and the openings, gates or bars through the railroad fence. No election is given in terms to the land-owner for whose use the crossing is to be made. In general, the party who is to act has the election in case one is to be made. (Co. Litt., 147 a.) And where the act to be done is single, the party bound to act is to do it at his own risk of its being in accordance with his obligation. Thus in Holmes *vs.* Seely (19 Wend., 510), in regard to a way of necessity, which rests on the notion of an implied grant, it was held that the way should be a convenient one over the adjoining close of the grantor, regard being had to the interests of both parties, and that subject to this qualification the grantor of the land should assign the way. That is, the owner of the servient tenement is in the first instance to locate the way. To the same effect is Russell *vs.* Jackson (2 Pick., 574). That the interest of neither party is alone to be regarded in the location of the crossing, but that it is, looking to all the circumstances, to be suitable and convenient, is certainly just in itself, and is fairly to be inferred, as well from the terms of the statute as from the language of the cases cited. In the analogous case of one having a right to make a way over another's land, it has been held that the power must be exercised in a reasonable manner, having regard to the convenience of the owner of the servient land, and subjecting him to no needless and unreasonable injury. Thus in Abson *vs.* Fenton (1 Barn. & Cres., 195), where, under an act of parliament, convenient and necessary ways were granted, it was held that the true question was whether the mode adopted was such as a prudent and rational person would have adopted if he had been making the road over his own land and not over the land of another man. This view, the court added, would on the one hand exclude all wanton, capricious and causeless injury to the owners of the servient lands, and, on the other, allow a beneficial exercise of the power conferred by the act of parliament.

In the case before us, the judge who tried the cause has found that the crossing actually built by the defendant was inconvenient for the plaintiff and not of easy access, and that the proper place for a farm crossing for the plaintiff was at the point where the plaintiff desired it to be made. That finding makes out a cause of action against the defendant within the principles before stated. The court, however, instead of directing a specific performance of the obligation, proceeded to inquire of the damages which the plaintiff had sustained, and gave him a pecuniary compensation. Of this the plaintiff does not complain.

There were many cases in which a court of equity, while refusing a specific performance, would give the injured plaintiff compensation in damages. (Story's Eq. Jur., §§794 to 800.) And under the Code, where issue is joined, such relief may be given as the case calls for, irrespective of the form of the summons, especially as damages are claimed in the complaint. Acting on these grounds, and finding that the expense of building a crossing at the point designated by the plaintiff would exceed the plaintiff's damage by being confined to the crossing made by the defendant, the court ascertained the amount of the damage and gave judgment therefor. This course is approved in Clarke *vs.* Rochester, Lockport & N. F. R. R., (18 Barb., 350), and cannot be complained of by the defendant, to whom the judgment is more favorable than it was otherwise entitled to.

Nothing in the statute prevents damages being given against the defendant for the breach of duty.

Some of the questions objected to bearing upon the extent of the plaintiff's damages are awkward in form but are yet, it seems to me, fairly competent. The substance of the inquiry was as to the effect of the one or the other crossing on the value of the land separated by the railroad from the rest of this farm. It was not as to the general effect of the railway embankment on the value of the farm or of the separated lands. This would have been improper, as not touching the real issue. The inquiry as made, was only another method of measuring the relative inconvenience of the crossings, and thus furnishing a criterion of the plaintiff's actual damages.

The judgment should be affirmed.

Baltimore and Drum Point R. R.

The annual meeting of the stockholders of this company was held in Baltimore on the 3d inst., Dr. E. Burnell, of West River, in the chair. Judge D. R. Magruder, president of the company, submitted the annual report of the directors, which stated that since the last annual meeting of stockholders a survey for the location of the entire length of the road from Drum Point to Baltimore has been completed, but that slight alterations may be made as the work of construction advances, with a view of saving in cost and distance. The right of way has been secured over more than one half of the line, with a good prospect of further grants of the right of way. The work of construction commenced on the first division, from Drum Point to St. Leonard, in June, 1873, and on the fifth division, from Annapolis to Butler's tavern, Eldridge Landing, in July, 1873, and was prosecuted until the occurrence of the financial panic in November, when it was suspended. Since then it has not been deemed prudent, nor was it practicable, to resume until the county subscriptions should be confirmed by the Legislature, and subscriptions be made actually by the county commissioners of the respective counties. The length of the road now graded on the first division is between three and four miles, and on the fifth division between two and three miles. The amount expended in construction has been $24,397 60, besides for right of way, $1,696 70. The whole amount received from payments upon subscriptions to the capital stock from the organization of the company up to the first of the present month is $33,348. The amount expended for engineering expenses has been $28,517 71. Salaries of officers, $7,739 96, and miscellaneous expenses, $12,979 74. The amounts expended over and above the receipts for subscriptions to the stock have been derived from loans made from time to time and from amounts received from the Annapolis and Eldridge railroad, under a contract made between the two companies for the construction of that part of the road between Annapolis and Elkridge. The purchase of the controlling interest in the Annapolis and Elkridge road saves between three and four miles of road of the main line between Baltimore and Drum Point, and saves the construction of between five and six miles into the city of Annapolis. The entire length of the road will be seventy-six miles. From Baltimore to Annapolis the distance will be twenty-three miles, eight of which are now made, (that of the Annapolis and Elkridge railroad,) leaving fifteen to be built. The report closed with a belief that as the construction of the road advances aid will be extended it by the city of Baltimore. After the reading of the report the board of directors were elected for the ensuing year: F. L. Barreda, New York; Judge D. R. Magruder, Calvert county; Andrew Banks, Baltimore county; James Webb, Baltimore city; H. E. Morton, Calvert county; W. R. Hutton, Baltimore city; Thomas S. Iglehart, Anne Arunde county; James Chester, Anne Arundel county; H. Owings, of S. Calvert county; James T. Briscoe, Calvert county; H. E. Loane, Baltimore city, and Dr. R. S. Steuart, Baltimore city.

Baltimore and Potomac Railroad.

The annual meeting of the stockholders of this company was held in Baltimore on the 12th inst. There was but little business transacted further than the reading of the annual report of ex-Governor Bowie, the president. The report shows the earnings of the road to have been satisfactory. The year after its completion the road was operated within its revenues, and the receipts so far in the present year have so largely exceeded the expenditure and increased so much over those of the corresponding months of last year as to be altogether encouraging. The report states that this excess would have been still greater but for the unusual expenditure caused by the unprecedented freshet of last autumn, which, however, is compensated for by the road having been placed in a better condition than before. The road bed has been widened and piled in many places, culverts enlarged, bridges substituted for culverts, and the road generally brought up to a condition than which no road could be made better. The bridges over the several rivers are reported to be in the best and strongest condition, and the different tunnels are fully completed. The arch bridge under Fulton avenue has been almost entirely rebuilt.

The entire transportation business of the road has been increasing in a ratio enabling all the trains, both passenger and freight, that could possibly be desired to be kept on the Washington Branch. It has, however, been found that the facilities extended on the Pope's Creek line were too liberal for the traffic offering or for the interest of the company. A passenger train is daily run up in the morning and down in the afternoon, but it has been found necessary to curtail the mixed trains of passenger and freight from a daily to a tri-weekly service. By an arrangement with the Richmond, Fredericksburg and Potomac railroad a fast express train has been established between Richmond and Baltimore, thus enabling passengers to leave Richmond in the morning, spend several hours in Baltimore, and returning, arrive in Richmond at an early hour in the evening. A contract, satisfactory at the time to all parties interested, for the use of the tunnel was duly executed on the 13th of December, 1873, between the Baltimore and Potomac, Northern Central, Western Maryland and Union railroads, and the Potomac Railroad Company has ever held itself in readiness to carry out the provisions of this contract. The report states that it is desirous of extending every proper encouragement for the use of the tunnel not only to these companies, but to all other roads entering Baltimore, upon terms just and equitable to all.

The report feelingly refers to the late J. Edgar Thomson, of Philadelphia, who took a deep interest in the road, and by whose friendly assistance the road became an assured success. The report adds that through the late Mr. Thomson millions of outside capital have been introduced into Maryland, largely developing her fertile resources.

At a meeting of the board of directors, after the adjournment of the meeting of stockholders, the following officers were re elected to serve for the ensuing year: Hon. Oden Bowie, president; J. N. Du Barry, vice-president and general manager; Stephen Little, secretary and auditor; John S. Lieb, treasurer.

Captain Tyler on the Working of Railways.

A paper on Simplicity as the Essential Element of Safety and Efficiency in the Working of Railways was read on Wednesday evening last, at the Society of Arts, in John street, Adelphi, by Colonel Yolland, in the absence from England of Captain Tyler, the author of the paper. Capt. Tyler's contribution, which is lengthy but interesting, enters very fully into the consideration of the subject on which he is so competent to treat. As might be expected, the gallant Captain upholds all the requirements so strenuously insisted upon by his department, and attributes to Colonel Yolland the first suggestion of the interlocking system, since known as Saxby's Patent. Captain Tyler points to the difference between simplicity of construction and simplicity in working, and regards the latter as the essential element in the safe working of railways. After taking exception to some remarks made by Sir E. W. Watkin, Mr. Forbes, and other railway chairmen, Capt. Tyler said that the greatest danger of accident or mistake on the part of railway officials arises from the want of the most efficient appliances and arrived at the conclusion that accidents may best be avoided by the judicious selection and careful training of the men employed, especially engine drivers and signal men; secondly, by providing these men with the necessary apparatus for the proper performance of their duties; and, thirdly, by the maintenance of a high standard of discipline among the men so as to secure efficient working. From his personal experience of the present working of our railways, we should have thought that Captain Tyler was in a position to add, as the final conclusion to his deductions, that the railway Companies, so far as it was possible, were doing their best to accomplish all the foregoing results. We might even be permitted to doubt, if the railways had been under State control, whether so much progress towards efficient working, now exhibited, would have been shown. Great departments of State are proverbially slow movers.—*Herapath, May 23.*

MR. ASA WHITNEY.

Mr. Asa Whitney, the senior member of the firm of A. Whitney & Sons, car wheel manufacturers, died June 4, aged 83 years, at his residence, No. 249 North Eighteenth street. Mr. Whitney was born in New England and went to New York State early in life, where he was engaged as engineer on several of the railroads and canals in that State. Subsequently he came to Philadelphia and was for a time a partner of the late M. W. Baldwin, the firm being Baldwin & Whitney. After the dissolution of his partnership with Mr. Baldwin he started the business of manufacturing car wheels on a new principle, that of annealing them after casting them in chill. In 1874 he established his works on Willow street, below Thirteenth, and soon removed to the location of the present extensive establishment, which now covers the entire block from Sixteenth to Seventeenth, and Callowhill street to Pennsylvania avenue, where from 200 to 250 wheels are made each day.

In 1859 Mr. Whitney was elected President of the Reading Railroad Company, the terminus of which was then at Schuylkill Haven. It did not at that time reach any of the coal mines, and Mr. Whitney inaugurated the plan of buying up the lateral roads by purchasing the Schuylkill Valley Railroad, thus laying the foundation of the system by which the Reading Railroad Company secured the coal trade of the Schuylkill region.

Mr. Whitney, was a man of strong character and analytical mind, and possessed a fund of quiet humor and anecdote, which rendered him a universal favorite. He leaves several children, one of his daughters being the wife of the Right Rev. Bishop Howe, of the Protestant Episcopal Church.—*Phila. Ledger.*

Northern Central Railway.

The Northern Central Railway Company have received official information of the successful negotiation in London, through the banking house of Drexel & Co., of this city, of a loan of £400,000, or $2,000 000, 6 per cent consolidated mortgage bonds, to bearer, in bonds of £200, or £1000 each. The rate at which the bonds are taken is 87½ per cent, the advances—£25 on allotment, £50 July 1st, £50 August 1st and £50 September 1st. The bidding for the loan on announcement was largely in excess of the amount offered. The principal of the bonds mature 1904, the interest periods are January and July, and the interest will be paid in gold at Baltimore or in sterling money at London, both principal and interest free from all State or Federal tax. The present issue of $2,000,000 is a part of a consolidated mortgage for $10,000,000, of which $6,000,000 is reserved to provide for the existing mortgage debt of the company. The proceeds of the money coming to hand through the loan just announced are understood to be for the payment of the existing floating debt, to be closely followed by a dividend on the stock, the situation of the company promising that desirable result. A meeting of the representatives of the stockholders of the company with a committee of the Directors of the Pennsylvania Railroad Company was held at the office of the latter named company, in this city, yesterday, with the view of comparing notes as to the future management of the Northern Central Railway, now in the control of the Pennsylvania Railroad Company. The meeting was entirely harmonious, and all agreed that the Northern Central is a most valuable property. Nothing, however, was said as to leasing the Northern Central road to the Pennsylvania Railroad Company. Mr. John H. Hutchinson, of this city, has been appointed on the committee representing the Northern Central Railway Company, in place of Mr. John Hulme, deceased.—*Phila. Ledger, June 12.*

The Pacific Railroads.

In the U. S. Senate, on the 16th inst., Mr. Bogy called up the House bill making additions to the 15th section of the act of July 2, 1864, amendatory of the act to aid in the construction of a railroad from the Missouri river to the Pacific Ocean.

The bill provides that any officer or agent of any company authorized to construct these roads or engaged in operating either of them who shall refuse to operate or use the road or telegraph under his control for all purposes of communication, travel and transportation so far as the public and Government are concerned as in one continuous line, or shall refuse in such operation and use to afford and secure to each of said roads equal advantages and facilities as to the rates or time of transportation, without any discrimination of any kind in favor of or adverse to the road or business of any or either of said companies, shall be deemed guilty of misdemeanor, and upon conviction thereof be fined not exceeding $1000, and be imprisoned not less than six months. The bill further provides that in case of failure or refusal of the Union Pacific Railroad, or either of said branches, to comply with the requirements of the act the party injured or the company aggrieved may bring action and be entitled to judgment for treble the amount of all excess of freight and fares collected by the defendant, and for treble the amount of damages sustained by the plaintiffs, by such failure or refusal, and for every violation of the act a new cause for action shall arise.

The bill further provides that the Denver Pacific Railroad Company shall be deemed part and an extension of the Kansas Pacific Railroad to the point of junction there with the Union Pacific Railroad at Cheyenne. The bill was then passed without amendments as it came from the House.

☞ The Boston *Journal* notices the arrival at Chelsea of the new ferry boat "City of Chelsea," which was built at the works of the Harlan & Hollingsworth Co., of Wilmington, Delaware. The boat is very plain and neat, and is most thoroughly built, her timbers being of oak. She is 165 feet long and 52 feet wide over all, and 12½ feet deep. The hull is of one half inch iron to the water line, and above that the iron is three-eighths of an inch thick. Her tonnage is 273 tons. She has a 38-inch cylinder engine with a 9 inch stroke. The boiler is 24 feet long, 9½ feet in diameter. She is thoroughly equipped with life preservers and boats according to law, and has a seating capacity of upward of 200. There is a smoking room, and the ladies' saloon is provided with toilet rooms. It is stated that the boat cost upward of $70,000.

☞ At a meeting of the directors of the Lake Superior and Mississippi Railroad, held at St. Paul, Min., on the 3d inst., the following officers were chosen; President and Land Commissioner, John P. Ilsley; Secretary and Treasurer of the Land Department, Thomas M. Davis; Assistant Secretary, S. W. Colton, Jr.; Attorney, James Smith, Jr.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

Columbus and Mineral Valley Railway.

At a meeting held in Columbus, Ohio, on the 9th inst., in the interest of the Columbus and Mineral Valley Railroad, Gen. Thomas Ewing of Lancaster, chairman of a committee previously appointed, reported a certificate of incorporation, proposing to build from Columbus, in Franklin county, to a point at or near the mouth of Sunday creek, in Athens county, passing through Licking, Fairfield and Perry counties, and making the capital stock $300,000.

No survey has been made, of course, under the auspices of the Columbus and Mineral Valley company, but the two routes considered by the Columbus and Ferrara company are informally talked of—one of them by way of Reynoldsburg, and the other by way of Pickerington; one route striking the Atlantic and Lake Erie line at Pugh's, and the other tapping the same line between Bush's and Pleasantville. In either case the length of road to be built between here and the Atlantic and Lake Erie line will be about twenty-seven miles; the A. & L. E. line passes within fifteen miles of McConnelsville. The McConnelsville people, we understand, have already inaugurated the enterprise which is to connect them with the Atlantic and Lake Erie.

The certificate reported by Gen. Ewing was adopted, and was filed with the Secretary of State, after having been signed by the following persons: John W. Andrews, T. Leonard, Thomas Ewing, Fred. Michel, F. C. Sessions, John M. Pugh, F. B. Pond, D. W. C. Sawyer, R. F. Burt, A. C. Doney, T. W. Jones, James Taylor, John D. Nourse, G. G. Collins, Josiah Medbery, H. B. Haines, H. T. Hummel, J. J. Hausberg and David Pugh.

The corporators then held a meeting with R. F. Burt presiding, and Dr. Nourse acting as Secretary. Stock was subscribed to the amount of $30,100, and thereupon the stockholders, waiving the thirty days' notice by unanimous consent, proceeded to the election of the following named Board of Directors: John M. Pugh, P. Hess, R. C. Hoffman, T. Ewing Miller, R. F. Burt and T. Leonard, all of Columbus; Thomas Ewing, of Lancaster; A. M. Huston, of Zanesville; and James Taylor, of New Lexington.

The Board subsequently organized by electing John M. Pugh President, R. F. Burt Vice President, and Theodore Leonard Treasurer.—*Ohio State Journal*.

Crops and Business at the West.

The *Evening Post* says that a member of one of the oldest banking houses in this city has just returned from a tour of 4000 miles through New York, Ohio, Pennsylvania, Indiana, Illinois, Wisconsin, Iowa, Michigan and Minnesota, undertaken for the express purpose of learning the condition of the country by personal observation, for which he had special facilities. As the result of his travels and investigation, he reports that present indications promise the largest crops ever raised in the West. This applies not only to grain, but to all other staple products of that section. The farmers, who secured a good crop last year and obtained the cash for it, are now, he says, generally free from debt and in a most satisfactory condition. Stimulated by their success last season, they have planted a much larger area than ever before, and their labors have been seconded by unusually favorable weather. The crops are now so vigorous and far advanced that it is thought no subsequent changes of weather can seriously affect the harvest. He reports business in the Western cities as generally dull, but not nearly so dull as in New York. Both merchants and customers have, as a rule, been very cautious in their purchases, and the country is bare of goods. The country trade is growing very active, however, and the largest jobbing house in Chicago is doing a heavier business than ever before. Its members say that their collections in the country were never so good and that their trade this year will probably amount to $20,000,000. A large firm of pork packers and grain commission merchants, having houses in both Illinois and Indiana, expressed similar views, saying that in twenty years' experience they had never known such favorable prospect for the crops throughout the West. The prospects for the railroads and for business generally are said to be correspondingly favorable.

Montpelier and White River Railroad.

A letter to the Boston *Journal*, dated Montpelier, Vt., June 9, says:

An important meeting of Railroad Committees was held in this place to-day and very gratifying results were reached. The question under discussion had reference to friendly connections at this place between the Central Vermont Railroad and the Wells River Railroad, and the joint use of so much of the two lines as lies between Montpelier junction on the Central and the Coffee House junction on the Wells River Road, and the owning in common of the Central passenger house at this place. So far as the Committee of the Central road are concerned this action is final. On the part of the Wells River road the action of the Committee remains subject to the action of the directors. The deliberations of the Committees were entirely harmonious, and the results reached are received with favor by the people of Montpelier. As soon as an expression is made by the Wells River directors, if it is favorable, the next important step will be to begin the construction of the Barre road, or as it should be called, the Montpelier and White River road, a line chartered through the towns of Barre, Williamstown, East Brookfield, East Randolph, and East Bethel to the Central road at Royalton.

Lake Simcoe Junction Railway.

A meeting of the shareholders of this company was held in Toronto, Ca., on the 4th inst., Robert McCormick, Vice-President of the Provisional Board of Directors, presiding. The Managing Director, Mr. J. N. Blake, gave a satisfactory account of the progress made in the preliminary surveys of the line, and of the ascertained amount of produce and other resources of the district the road would traverse. A large sum has been raised in municipal bonuses towards the construction of the road, and the stock subscribed locally amounts to $1,200 per mile. The by-laws having been agreed to, a poll was opened for directors which resulted in the election of Messrs. R. McCormick, J. R. Bonchier, Jas. Anderson, Edmund Shuttleworth, W. Surmerfelt, Robert Royland, N. Graham, Allen Graham, and J. N. Blake. At a subsequent meeting of the Board Mr. J. N. Blake was elected President, and Mr. R. McCormick Vice President, of the Company.

Belfast and Moosehead Lake Railroad.

The Supreme Court, now holding a law term in Augusta, Me, has made a decision in the case of the Belfast and Moosehead Lake Railroad Company against the town of Unity. The suit was brought to recover $30,000, which, it was averred, had been subscribed by the town to the stock of the road. It appears that the decision was rendered on account of a fatal defect in the plaintiff's case. The town, by a two thirds vote, agreed to take $30,000 worth of stock to aid in building the road. At a subsequent town meeting, and before the directors of the company had accepted the doings of the town and before the road was located, the town, by a majority vote, rescinded its former action. The decision of the court turned on the point, as we understand, whether a majority of the voters of a town can reverse an act to the validity of which the law declares an affirmative vote of two thirds necessary. The court held that they could, which renders the Unity subscription nugatory. The decision was not expected by the company, and the board of directors, in their management of the affairs of the company, are sharply criticised by many, who believe that the town gets rid of paying its share of the cost of the road by a blunder on the part of the directors.

☞ The following communication from Messrs. Fisk & Hatch in regard to the counterfeits was received at the Stock Exchange on the 16th inst.:

"Counterfeit coupons from Central Pacific gold bonds series 'G,' of various numbers between 7,111 and 7,800, have been discovered. No counterfeit bonds of this series have come to the knowledge of the company, but it is presumed that the bonds from which the above coupons were cut are in circulation.

It is suggested that holders of bonds of series 'G' may present them at the office of the company, No. 9 Nassau street, for examination."

☞ Articles of association were filed at Trenton, N. J., on the 13th inst., under the General Railroad law, for the construction of a railroad from Mount Ephraim, Camden county, to the terminus of the Camden, Gloucester and Mount Ephriam Railway, a point in or near Blackwoodstown, in the same county. The road will be 6½ miles long, and the capital stock is $65,000.

☞ The Long Branch (N. J.) Horse Railroad Company have filed articles of association with the Secretary of State, at Trenton. The road is to run from Sea Bright to Long Branch, thence to Deal, and thence to Ocean Grove, in Monmouth County. The capital stock is $300,000, of which $30,000 has already been subscribed.

ENVELOPES.

SAMUEL RAYNOR & CO.
115 & 117 William Street, N Y.

Manufacture every style of Envelope, from the smallest drug size to the largest Official Size, and of any pattern, shape, or quality, including White or Blue Cloth Lined, Parchment and Manilla paper. Railroads, Express Companies, Banks, Insurance Companies, Brokers, Merchants and others supplied with every style that may be wanted. Samples given when requested.

RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh Rails**, and of any required weight and pattern.

PERKINS, LIVINGSTON, POST & Co.,
59 Liberty Street,
NEW YORK.

THE ILLINOIS CENTRAL RAILROAD COMpany offers par and a premium of one per cent. (101 per cent.), with accrued interest, for any of its construction mortgage bonds presented for prepayment prior to July 1, 1876, at its office in New York.

The outstanding balance of its Construction Mortgage Debt is about $3,000,000. These Bonds mature April 1, 1875.

L. V. F. RANDOLPH,
Assistant Treasurer.

American Railroad Journal.

Saturday, June 20, 1874.

Stock Exchange and Money Market.

The accumulation of Money at this centre is so largely in excess of all present business requirements that loan and discount rates continue exceptionally low to the leading borrowers, being generally 2@3 per cent on call and 4½@6 per cent per annum on the best mercantile credits. The banks have added moderately to their loan and discount averages, which would indicate some increase of demand for accommodation. But the wants of responsible borrowers have been very promptly provided for at the ruling figures. The City banks, in their last weekly statement were $809,100 higher on their deposits, and $1,316,500, on their loans and discounts, than the week before. The legal tender notes were reduced $939,800 and the specie reserve $2,461,000. The circulation was contracted $52,200. The U. S. Sub-Treasury at his port further increased its currency reserve, while also adding to its coin hoard. The U. S. Sub Treasury in this city closed the week with a currency balance of $48,893,079, against $47,937,079 the preceding week; and a coin hoard of $49,951,493, against $49,800,805 on the previous return. The City bank exchanges, during the week, were $876,646,468, or a daily average of $72,774,411. The customs revenue of the port, during the week, was $1,896,000, of which $1,724,279 were in coin certificates. The City banks reported their average of gold last week at $21,921,000, and their greenback average at $60,951,000. Their deposits stood at $232,722,400. The loan item was about $281,242,800. The circulation was $26,671,800.

The cash balances of the Treasury Department on Monday were: Currency, $11,492,177; special deposits of legal tender for redemption of certificates of deposit, $58,715,000; coin, $81,083,268; including coin certificates, $30,977,600.

The outstanding amount of legal tender notes is yet 382 millions; and of National bank circulation 248⅞ millions.

Government has received about 98½ millions from internal revenue, thus far in the current fiscal year.

Gold has been somewhat firmer in price, on, however, a very moderate movement, on all accounts. The speculative inquiry has been comparatively tame. The export call has been less urgent. The customs drain has been limited. The extremes of the price have been 110⅝@111⅜, closing at 111¼, as against 110¾ on Wednesday of the preceding week. The specie outflow, last week, was $1,528,981. The imports of specie at this port since Jan. 1, have been $2,384,826, against $1,814,137 same time last year. The customs demand for Gold last week averaged $316,000 a day. Foreign Exchange has been in more demand and quoted higher. Bankers' sixty day bills on London closed on Wednesday at $4 88⅛@$4 89; sight bills on London at $4 91@$4 91⅛ to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $6,888,578.

Government securities have been more sought after, especially toward the close, and prices have been quoted stronger. The demand has been mainly from investment buyers. U. S. sixes of 1881 closed on Wednesday of this week at 121⅛@122; U. S. Five-Twenties of 1862, 113¾@114¼; U. S. Five-Twenties of 1864 at 117@117½; U. S. Five-Twenties of 1865, 117@117¼; U. S. Five-Twenties of 1865 consolidated, 120@120⅛; U. S. Five-Twenties of 1867, 120⅛@121; U. S. Five-Twenties of 1868, 120⅛@120¾; U. S. Ten-forties at 114@114¼; U. S. Fives of 1881, (Funding Loan) 113¾@113⅞; Six per cent. currency Sixes from 114¾@115.

State and Railway bonds have been in fair request and generally held with firmness. Railway and miscellaneous share property has been moderately active, and, for a while, firmer in price, but closed decidedly heavy, lower and irregular.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $10,680,140, against $6,218,013 same week last year. The exports of domestic produce are $6,888,587, as against $6,571,935, last year. The exports of Gold and Silver, $1,787,926, as against $1,385,858 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $1,896,000, as against $1,864,254, same week last year.

General business has been fair for the season, but not remarkably active in any line. The ex-

port movement in Breadstuffs has been the most encouraging feature. Prices, however, have been quoted lower, in most instances. The Metal trade exhibits rather more steadiness as to values, but is without notable animation. Eglinton Pig Iron quoted at $34@$35. Glengarnock, $36@$37; Coltness, $39; No. 1 American Pig at $32@$34; No. 2 do. at $30; Forge, $26@$28; English Rails at $55 gold; American Rails at works, $56@$60; Old Rails, $36@$40 Wrought Scrap, $38@40. Ocean Freights have been fairly active, especially in the Grain line, with rates quoted firmer.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Central of New Jersey 1st mort. new, 108½; do. 7s, conv., 101¾; Chicago and Northwestern consol. gold bonds, 76; Burlington, Cedar Rapids and Minnesota 1st mort., 53; Chesapeake and Ohio 1st mort., coupon on, 52; New York Central 1st mort., 109; South Pacific R. Michigan and Ohio Railroad.

The Toledo *Blade* says that contracts for the construction of this road have been entered into with C. Howland, White & Co., of Columbus. The work will be commenced immediately at Grand Haven, on Lake Michigan, and proceed southward. The southern terminus of the road will be at Portsmouth, between which place and Grand Haven, a distance of 400 miles, almost an air-line can be obtained with easy grades. At Portsmouth the road will connect with the Chesapeake and Ohio, and on the line of its Michigan segment will penetrate some of the best pine and lumber districts of that State. The President of the road is James S. Gibbs, of Buffalo.

☞ Mr. H. Otterburg, who came to this country as the agent of the German bondholders of the Rockford, Rock Island and St. Louis Railroad, which lately defaulted in the payment of the interest on its bonds, has returned to this City from the West, where he had been to examine into the condition of the road and devise the best measures to be adopted in the interest of the bondholders. Mr. Otterburg states that before leaving St. Louis he instituted preliminary procedings to foreclose the mortgage on the road. The indebtedness of the company amounts to $9,000,000, nine-tenths of which is held in Germany.

☞ The Nashville *Banner* says that Tennessee "State bonds to the amount of $2,242,000 have been funded up to date, and old bonds are now pouring in steadily to be exchanged for those of the green tint. The amount of bonds on which the State will have to pay interest is a fraction less than $24,000,000. The amount due, and on which interest is paid by the respective lines, by solvent railroads, is $3,461,871 75. Up to date $110,000 of the July interest has been paid by the State treasurer. He is now paying the full July interest, it being cheaper for the State to do so than to pay the expressage on the money sent to New York, the commission for its payment there, and the expressage of the coupons to Nashville. The July interest will be paid without the borrowing of a cent."

☞ The officers of the Cairo Short Line Railroad, recently elected, are: President, Charles Butler; Vice President and Treasurer, Geo. W. Parker; Auditor, H. T. Nash; Secretary, E. F. Leonard; General Superintendent, W. G. Broughton.

New York Bridge Co.

The directors of the New York Bridge Company have elected Jeremiah P. Robinson president, O. P. Quintard secretary, and James H. Prentice treasurer. The resignation of William Marshall was accepted. Messrs. Stranahan, Vance, Kingsley and Hewitt were elected the executive committee, and Messrs Schroeder, A. H. Green and S. H. Wheeler the finance committee. The annual report of the executive committee shows that the total expense up to May 1, 1874, was $4,486,000. Engineer Roebling thinks it will take two years to finish the New York tower. The amended charter was referred to the executive committee with power to carry out its provisions.

It was resolved that a call be made for the payment of the tenth instalment on the capital stock of the company, payable on June 25. The executive committee were directed to resume work at once on the New York and Brooklyn towers and the Brooklyn anchorage.

☞ At a meeting of the stockholders of the Atchison, Topeka and Santa Fe Railroad company, held at Topeka, Kas., May 28th, the following gentlemen were elected Directors for the ensuing year: J. H. McKerson, H. Strong, G. Twitchell, F. H. Peabody, A. Spear, G. B. Wilbur, J. G. Burr, Geo. Opdyke, T. J. Peter, D. L. Larkin, B. P. Cheney and C. R. Halliday. The Directors elected J. Nickerson, President; W. H. Peabody, Vice President; C. W. Pierce, Secretary and Treasurer. Geo. H. Nettleton was reappointed General Superintendent, and Edward Wilbur Assistant Treasurer.

☞ The annual meeting of the Franklin Telegraph Company was held in Boston last week, Mr. John Duff, president in the chair. Mr. George B. Williamson, treasurer of the company, presented his annual report, which shows that the receipts for the year were $284,090 31; expenditures, $239,619 07; net profits, $44,471 24; liabilities, $10,195 16; assets, $20,093 95; net earnings for three years, $126,139 81. The route of the Franklin line is 1,332 miles in length. A majority of the capital stock of the company has been purchased by and is now owned by the Atlantic and Pacific Telegraph Company.

☞ The directors of the Wisconsin Central Railroad company, elected on the 4th inst., are Gardner Colby, A. H. Abbott, Charles L. Colby, and A. J. Banyon, of Boston, Mass.; George Reed and M. Wadleigh, of Wisconsin; E. B. Phillips, of Chicago, and E. Barney, of Dayton, O. The officers are: President, Gardner Colby; Vice President, Charles L. Colby; Secretary and Treasurer, A. H. Abbott.

☞ The Hazardville Powder Co. are experimenting upon a new form of gunpowder, recently adopted by the U. S. government for use in heavy cannon. The grains are polyhedral, the dies in which they are pressed being perfect dodecahedrons. In case the experiment proves satisfactory, the company is to be awarded a large contract for making the powder.

☞ The Senate bill appropriating $145,000 for the construction of a bridge across the Potomac river, near the Washington Navy Yard, passed the House of Representatives on the 15th inst.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending June 6, at 441,402 tons, and for the coal year 7,430,421 tons, against 7,570,381 tons to corresponding time last year, being a decrease of 139,959 tons. The bituminous tonnage for the week is 82,472 tons, and for the year 1,253,259 tons, against 1,241,460 tons to same time last year, giving a total of all kinds for the week of 523,874 tons, and for the year of 8,683,680 tons, against 8,811,590 tons to same time last year, being a decrease of 127,910 tons.

☞ The Harford County (Md.) *Democrat* says that the engineers selected by the consolidated railroad companies to complete the survey through the county are again at work. Last week they crossed the Little Gunpowder river near Guyton's mill, and are now in Harford. At the present writing they are near Water's mill and moving in the direction of Belair. It is reported that in addition to the survey they are locating the road preparatory to grading.

☞ The directors of the St. Louis, Alton and Terre Haute Railroad Company, chosen on the 1st inst., are: Anthony Thornton, Levi Davis, M. M. Dills and Geo. W. Parker. The officers are: Charles Butler, President; George W. Parker, vice president and treasurer; E. F. Leonard, secretary; W. G. Broughton, general superintendent; A. T. Nash, auditor.

☞ A company has been incorporated at Salt Lake city to build a railroad from Salt Lake to Coalville, thirty-five miles, which would give a more direct connection with the Union Pacific Railroad through five mining districts and coal fields.

☞ The directors of the Newark and South Orange (N. J.) Horse-car Railroad are: James B. Boylan, T. W. Lord, William H. McClare, L. Leob. Henry A. Page, W. A. Brewer, A. B. Baldwin, S. B. Sanders, and William H. Drummond.

COMMERCIAL WAREHOUSE CO.—CASH CAPITAL, $2,000,000—Office, 29 William street, corner Exchange place; warehouses, Atlantic Dock, Brooklyn. Cash advances made on first class securities on demand and time. Cash advances made on all kinds of merchandise stored in our own warehouses or consigned to us on favorable terms.

PAUL J. ARMOUR, President.
JOSE F. NAVARRO, Vice President.
JOHN BAIRD, Second Vice President.
FELICIANO LATASA, Third Vice President.

Paul J. Armour, Wm. D. Bowerman, C. H. Delamater, Jose F. Navarro, Feliciano Latasa, Juan J. Jova, John Baird, Thomas Murphy, Henry B. Hyde

WILLIAM TOBIN, Sup't of Warehouses.
JAMES CLYNE, Secretary.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Robt Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

Getting Rid of Switches and Turnouts.

An English inventor proposes to do away altogether with switches, turn-outs and crossings of other railways by making the up and down lines continuous from end to end, and providing apparatus at stations for lifting the train bodily from one track to another or to the lines of a railway running in another direction. Thus it is claimed any "accidental" misplacing of a train will be prevented. The train would only have to be lifted an inch or two from the track, and the hydraulic apparatus now in use would easily do the work. It is said that the operation would save much of the time now consumed in switching, and that, except for the first cost of lifting apparatus, it would not be any more expensive than the present method of switching trains from one track to another by means of switches too often misplaced. But the end desired by the English inventor has been obtained on some American railways for the last five or six years, without the use of any such cumbrous machinery. Several years ago the Whitton Patent Safety Railroad Switch was put on the main line of the Reading Railroad, and after practical trial for eighteen months was pronounced thoroughly satisfactory, and the right to use it on the entire line was purchased. By the use of this switch the continuity of the track is never disturbed, and the cars on the main track are perfectly protected, whether the switch is fastened right or wrong or whether it is not fastened at all, but left loose. The controlling principle of this switch is the use of a guard rail drawing the car wheels to a switch rail having an upward incline sufficient to carry the flange of the wheel over the main rail, and thus to put the car on the switch without breaking the main line.

Allegheny Valley Railroad.

At a meeting of the creditors of the Allegheny Valley Railroad Company, held in Pittsburg on the 16th inst., the President, Mr. John Scott, submitted a statement of the affairs of the company, showing a total floating debt of $6,863,856'45, which it was proposed to fund into a seven per cent income bond secured by mortgage or trust bond. The committee of five, to whom the report was referred, recommended creditors to renew their past due obligations, and also suggested that a six per cent gold bond be issued in order to represent the expenditures indicated, and that said bond be made good by indorsement of the Pennsylvania Railroad company, so that this indebtedness may ultimately become funded. Col. T. A. Scott, who was present, said he believed the company could pay seven per cent on its entire debt in three years. A permanent committee of five was appointed to confer with officers of the company, and also with officers of the Pennsylvania company. The meeting adjourned to meet on the 30th inst. The Pittsburg *Chronicle*, commenting upon the above, says:

We suppose but very few of the persons present at the meeting of the creditors of the Allegheny Valley Railroad were entirely prepared to hear such a statement as was made by the President. It was known that the company had been very backward in paying the salaries and wages of its employes; these had to struggle through the long and weary winter as best they could. The contractors on the extension had become clamorous for their money, and their laborers were in a state of rebellion. But that a floating debt of over six millions should be found by the very competent accountant, was a matter of most serious surprise to almost everybody in the room.

It throws a flood of light on the immediate cause of the railroad panic of last September, to read the statement of the new President of the Valley Railroad, that a "careful examination of the affairs of the company showed that the utmost confusion existed in the accounts relating to the financial affairs, and its debt was ascertainable only by investigation of a multitude of detached papers, statements and accounts; that the accounts of the construction of the Bennett's branch has not been entered in the books of the company, thus making it necessary to examine transactions in detail, extending over a period of five years, and tracing each separate transaction to its origin."

Fortunately, the property created by such a chaotic method, is extremely valuable. There is a line of finished road of over two hundred and fifty miles. A sanguine view of the business after it has come to a state of development, justifies an estimate of the receipt of twenty thousand dollars per mile per annum. But should there even be a loss of some portions of business, it may be reasonable to expect an annual revenue of at least $15,000 per mile, or a total of nearly four millions of dollars. With the same views it may be supposed that the running expenses of this railroad, with its favorable grades, (they are by far the best of all the roads that cross the Alleghenies) need not be much over fifty per cent, leaving a million and a half to pay interest on the bonded debt. This interest amounts to about twelve hundred thousand dollars. The total amount of floating indebtedness, outside of that owed to the Pennsylvania Railroad and for the Oil Creek road, which latter may be funded at the option of the company, amounts to about $3,800,000. This sum is due to a large number of creditors, laboring hands, boarding house keepers, merchants and manufacturers, who look, or are requested to look, to this margin of three hundred thousand dollars as the means from which payment is to be expected.

It will be seen that our figuring is somewhat different from that presented by Mr. John Scott yesterday. We do so simply to show that the Pennsylvania Railroad Company may readily accede to the request, as made by the creditors' committee, to endorse the income bonds. The property is good, and can be made exceedingly valuable by the great corporation over which Col. Scott now presides. It is of such a nature that it really ought to be an integral part of the Pennsylvania Railroad system.

☞ The earnings of the Philadelphia and Erie Railroad Company for May, 1874, were $290,382 22; the expenses, $224,493 15; and the net earnings, $65,889 07. In May, 1873, the net earnings were $13,395 32—showing an increase in May, 1874, of $52,493 75.

Pennsylvania Company.

At the annual meeting of this company held in Pittsburg on the 16th inst., Col. Thos. A. Scott presented the following report of the company's transactions for the year 1873, the most important features of which through the courtesy of Mr. W. H. Barnes, we are enabled to lay before our readers:

PITTSBURGH FORT WAYNE AND CHICAGO RAILWAY.

Earnings for year ending Dec. 31, 1873	$9,619 074 86
Expenses (63.3 per cent.)	6,097,041 99
Net earnings	$3,522,032 87
Rental, interest, &c.	2,617,177 24
Net profit for year ending Dec. 31, 1873	$904,855 13

NEW CASTLE AND BEAVER VALLEY RAILROAD.

Earnings	$351,089 48
Expenses (45.17 per cent)	158,574 75
Net earnings	$192,514 73
Rental and interest	140,435 79
Net profit	$52,078 94

LAWRENCE RAILROAD.

Earnings	$189 382 38
Expenses (59.86 per cent)	113,371 05
Net earnings	$76,011 33
Rental and interest	75,752 96
Net profit	$258 37

ERIE AND PITTSBURGH RAILROAD.

Earnings	$1,165,292 62
Expenses (58.4 per cent)	680,893 88
Net earnings	$484,398 74
Rental and interest	380,626 00
Net profit	$103,772 74

CLEVELAND AND PITTSBURGH RAILROAD.

Earnings	$3,671,735 25
Expenses	1,874,722 15
Net earnings	$1,797 013 10
Rental and interest	1,337,353 51
Net profit	$459,659 59

JEFFERSONVILLE, MADISON AND INDIANAPOLIS RAILROAD.

Earnings	$1,487,576 91
Expenses (69 per cent)	991,377 03
Net earnings	$446,199 88
Rental and interest	535,285 60
Deficit for the year	$89,085 72

There has been an aggregate expenditure for betterments on all these lines during the year, as follows:

Pittsburg, Fort Wayne and Chicago Railway	$1,685,686 00
Erie and Pittsburg Railroad	14,992 01
Cleveland and Pittsburg Railroad	672,372 91
Jeffersonville, Madison and Indianapolis Railroad	174,045 69
	$2,547,096 61
The final result to the Pennsylvania Company, after paying all expenses, rentals, interest, etc., shows a net profit of	$1,238,310 00
Out of which dividends have been paid on preferred and common stock	570,000 00
Leaving a balance of	$668,310 00

The lines are now amply supplied with facilities to meet not only present demands, but also a much increased volume of business, and the condition of the track and rolling stock will enable the business to be moved with economy and despatch.

On the Fort Wayne Road forty-nine per cent of the entire line was relaid with new rail, including six thousand tons of steel rail, and twenty-eight per cent of the ties were renewed.

On the Cleveland and Pittsburg Railroad thirty-five per cent of line was relaid with new iron.

In addition to the lines hereinbefore enumerated, and which are operated under leases, this company has also worked during the past year, on account of proprietary companies, the Indianapolis and Vincennes Road, the Ashtabula, Youngstown and Pittsburg Railroad, the Toledo, Tiffin and Eastern Railroad, and the completed portion of the Mansfield, Coldwater and Lake Michigan Railroad.

The Ashtabula line deserves special mention, as furnishing an additional outlet to the lakes, and thereby facilitating the movement of lumber, ore and coal. The harbor has been improved, so that vessels drawing fourteen feet of water can unload at the wharves of the company, and there is every prospect of the road developing a lucrative business. There was expended in the betterments on this line, in 1873, but a very small sum ($646).

The Toledo line forms a good connection with one of the largest grain depots of the West by an extremely favorable route, and the road has local advantages which should secure it a large traffic. Special attention is being paid to the increase of its tonnage, and with favorable results.—*Pittsburg Chronicle.*

German Railways.

RAISING OF GOODS' RATES.

It appears that M. de Bismark, hitherto a resolute opponent to any proposition for raising the goods' rates on the German railways, has at last succumbed to the teaching of the last year's working, and has sent in to the Federal Council a Memorandum stating that he sees no objection to a general raising of the goods' rates not exceeding an average increase of 20 per cent. Attached to this, is a report from the Railways' Department, showing the results of the working of 35 German railways during the last seven years, from 1867 to 1873, both inclusive.

In 1867, these 35 companies owned 11,375 kils., which had cost them 2,884,373,074 marcs, or 209,615 m. per kil. In 1873, their length of line had increased to 15,831 kils., and the capital cost to 3,762,685,160 m., or to 237,688 m. per kil. Thus in the seven years the mileage had increased by 39 per cent., and the kilometric cost by 13 per cent. Adding ten lines which had been opened in the interval, a total is arrived at of 18,479 kils., and 4,418,499,512 marcs, or 239,097 m. per kil.

With regard to the results of the working, the gross receipts of the 35 lines were:—In 1867, 326,018,947 m. (29,318 m. per kil.); in 1873, 561,189,677 m. (35,927 m. per kil.) The working expenses were:—In 1867, 157,008,410 m. (14,119 m. per kil.), or 48.1 per cent of the gross receipts; and in 1873, 333,901,760 m. (21,376 m. per kil.), or 59.5 per cent of the gross receipts. Consequently, the net receipts had fallen from 169,010,537 m. (15,199 m. per kil.), equal to 51.9 per cent of the gross receipts, or to 7.1 per cent of the capital cost, in 1867; down to 227,287,917 m. (14,551 m. per kil.) equal to only 40 5 per cent of the gross receipts, or to 6 per cent on the capital cost, in 1873. Taking into account the 10 newer lines, the gross receipts in 1873 from the whole 45 lines were 610,020,639 m. (33,483 m. per kil.); the working expenses 372,609,321 m. (20,452 m. per kil.), or 61.1 per cent of the gross receipts; and the net receipts, 237,411,318 m. (only 13,031 m. per kil.), or 5.4 per cent of the capital cost.

In the foregoing, the working expenses were restricted to those strictly such; if, however, renewals are included under this heading, the net receipts in 1873 on the 8 lines are reduced to 172,207,986 m. (11,024 m. per kil.), or 4.6 per cent of the capital expenditure; while upon the 45 lines, the net receipts will become 180,892,584 m. (9,929 m. per kil.), or but 4.1 per cent of the capital expenditure. So that, from 1867 to 1873 the kilometric gross receipt has increased, but the net receipt has diminished, the working expenses having increased about 25 per cent.

The report attributes this unsatisfactory result to the facts that in the 7 years enumerated, salaries have increased 25 per cent, workmen's wages about 50 per cent, and materials in general quite 100 per cent. The German Chancellor further declares that even should the goods rates be raised the full 20 per cent even this would by no means ensure that the average net return of the railways would be augmented from the 4.1 per cent at which it now stands to as much as 5.5 per cent. There seems, therefore, every likelihood that in spite of some strong opposition from a few lines, the proposed measure will be carried into effect; and there is every probability that Austria will at once follow suit, to be perhaps imitated by Belgium, and possibly by France. Will this movement ultimately affect us at all?

Boston, Concord and Montreal Railroad.

The earnings of this road for the years ending March 31, 1873 and 1874 were as follows:

	1873.	1874.
From passengers	$231,534 00	$236,020 44
" freight	417,596 35	424,576 11
" mails	10,256 01	15,231 88
" express	8,000 00	9,300 00
" miscellaneous	2,962 42	2,000 13
	$670,348 78	$687,128 56
Expenditures, viz:		
Maintenance of way	$178,908 20	$201,254 53
" motive power	148,171 20	129 447 88
Cost of working road	170,676 59	180,606 98
" management	15,568 23	16,275 17
Miscellaneous	25,309 68	23,097 14
	$538,633 90	$550,981 20
Net income	$131 714 88	$136,147 36
Bonds and cash on hand per last report		131,879 69
Interest received during the year		56,003 08
Oil on hand less than last year		888 94
For sales of consolidated mortgage bonds		966,400 00
Total		$1,340 819 07
Appropriated as follows:		
Paid coupons, back coupons, interest on over-due bonds, etc		$132,712 56
Paid preferred stock dividends		44,454 00
Engineer's department, wood and stock on hand more than last year		20,227 27
In hands of superintendent over last year		12,974 25
Purchase of White Mountains (N.H.) Railroad		800,000 00
Extension of same		650,000 00
Paid sundry expenses		7,400 02
Cash and bonds on hand		173,050 99
Total, as above		$1,340,819 07

Compared with the previous year, the gross earnings show an increase of $16,779 78; with an increase in expenses of $12,347 30—making an increase in net earnings of $4,432 48. The report says:

The foregoing statement shows the gross receipts and net earnings for the past year. The business for the first six months of the year was in excess of the corresponding time in the previous year, and the Directors flattered themselves that they should be able to show at the end of the year an

increase in receipts and earnings, but the monetary panic that came early in the Fall caused, for the time, almost a suspension of business, especially in upward freights; and light business throughout the Winter has left us with but a slight increase of earnings over the preceding year.

We feel that we are fortunate in being able to show a gain instead of a loss in earnings, in a year so disastrous for business.

We have made more than our usual additions and improvements this year, and they are in part as follows: We have laid 40,415 sleepers, and have put in 1,800 tons of new iron of 56 pounds weight, and taken out about 800 tons of light iron, and put on the Branch and Extension. This gives iron laid with fish-joints, from Concord to Littleton, and beyond, to a point near the Wing Road, in Bethlehem.

We have purchased two first-class locomotives, and rebuilt two in the shops, and made full repairs upon all others.

Have purchased one first-class monitor-top passenger car and one baggage and express car; built in shops thirty box and thirty-three flat cars, and one gonger, and rebuilt and repaired the others.

We have purchased the right to use the Miller Platform and Coupling on the road, and have put it on twenty passenger and baggage cars, and find that it adds much to the safety of the passengers, lessens the liability to damage, and has been used with entire success.

We have continued to build new fences, and have built fifty miles the past year.

Have built a new dwelling-house at East Concord for the gatekeeper at the bridge; have covered the new bridge at East Concord with iron, and completed the same, and charged in the accounts the $10,000 reserved from last year; have put an iron covering on the bridge at Ashland, built two new bridges at Tilton, one at Laconia, and one at Lake Village, and also repaired the Squam and Pemigewasset Bridges, re-covering the latter.

We have built five new wood sheds, which were much needed to cover and protect the wood from the weather.

The road-bed has been very much improved by running a ballasting train during three months of the past season, and is now in excellent condition.

The semi-annual dividends on the preferred stock have been paid, and charged in the accounts.

The branch road from Peirce's Bridge to the Twin Mountains was completed last July, and used for carrying passengers to the mountains, and the business proved as favorable as was expected.

The Directors have made arrangements to build and continue the road from Twin Mountains to the Fabyan Place, and expect to have it completed so as to be used for the transportation of passengers, by July 1st.

This branch will prove to be a great help to the mountain travel, as it leads into the centre of the mountain region, and will be the nearest point by railroad to the base of Mount Washington.

The road now extends from Concord to Northumberland one hundred and forty-five miles, with a branch from Wing Road to the Fabyan Place, of fifteen miles; in all, one hundred and sixty miles.

The building of the Extension and Branch has been expensive, but the benefits to result from their completion will amply remunerate for the outlay.

The road is now the longest in the State, and destined to be one of the most important to the people.

Up to this time, the cost of the extension, the Y at Woodsville, and the Branch, is about $1,100,000, of which amount $650,000 has been charged in the account this year, leaving about $450,000 to be settled and charged in, as fast as sales of the Consolidated Mortgage Bonds are effected.

We have completed the purchase of the White Mountains, N. H., Railroad, giving the stockholders of that company consolidated mortgage 6 per cent bonds in exchange for their stock, and the amount, $300,000, we have charged in the yearly accounts.

In addition to this issue of the consolidated bonds, we have sold $42,400 of the 6 per cent, and $624,000 of the 7 per cent bonds, making in all, $966,400, which will be seen by reference to the trial balance.

The directors have not had the success which they hoped for during the past year, for the completion of the proposed consolidation of the different classes of stock into one, though they have made efforts for that purpose.

The difficulty, however, has not arisen from objections to the plan by those stockholders who have been applied to on the subject, but from inability to reach many of them for the purpose of obtaining their signatures to the agreement. And although the holders of by far the greater portion of all the stock have become parties to the agreement, yet too large an amount of stock is still unrepresented to render it judicious to commence the change without further action by the corporation.

Therefore additional votes on the subject will be proposed for adoption by the stockholders at the approaching annual meeting, which will obviate existing difficulties, and enable the directors to proceed in carrying into effect the change which is desired.

We have been fortunate in operating the road, having had no accidents where the company was in fault.

The equipment of the road consists of 24 locomotives, 20 passenger cars, most of which are monitor top, and of approved construction, 2 drawing-room cars, 11 baggage cars, and 585 freight cars.

Miles run by passenger trains, 247,811; by freight trains, 211,094; by other trains, 64,457—total miles run, 523,362.

The total number of passengers carried during the year was 174,925½—equal to 10,495,530 carried one mile. Total number of tons of freight, 99,909½—equal to 5,994,540 tons carried one mile.

Government Regulation of Railways

The question whether railway companies in England may not be gradually treated more and more as ordinary branches of trade has been propounded by James Henry Mangles, in a recently published paper on the subject of interference or non interference with railway companies. It has been generally admitted in England that, although State interference in commercial matters generally is not to be encouraged, it may rightly come in to regulate the operations of railways. While in the United States the propriety of initiating a policy of interference in railways is being discussed, and has actually been undertaken in some of the Western States, in England, where the popular voice is in favor of State regulation, Mr. Mangles argues that the course hitherto pursued has been a failure. The extent to which regulation is carried there may be seen from the rules discussed in the report of the joint committee of both houses of Parliament on railway affairs, which are equal mileage rates; rates to be fixed according to cost of carriage, after adding a certain profit on capital; determination of terminal charges; immediate reduction of rates and fares; subsequent periodical revision of rates and fares; absolute limitation of dividend; reduction of rates after dividend has reached a certain per centage, so as to divide extra profit between the company and the public; classification of rates; publication of rates; consolidation; workmen's trains; arrangement of districts; construction of branch lines; interchange of traffic, through rates, and running powers; revision of fares for conveyance of troops; additional facilities to post offices; a railway tribunal. Here is regulation enough to satisfy the most ardent lover of government interference in railways. Mr. Mangles, however, quotes from eminent English authorities to show that railway companies cannot be regulated by the State. The substance of all this testimony may be summed up in the words of Captain Tyler; "I do not think that you can construct any department or erect any tribunal which shall be able to deal satisfactorily with the regulation and supervision of rates and workings of railways so long as they are in the hands of the companies."

He also argues that the excuse for interference, founded on the monopoly exercised by railroad corporations, does not apply in England, for there, he says, quoting the language of Mr. Crackwell, general manager of the London and Northwestern Railroad Company: "There is no monopoly of railroad traffic now." This Mr. Mangles would say of the whole of England, and if it be true, there would seem to be but little ground for State interference left in that country; and as far as the great competing trunk lines are concerned in the United States, the competition is sharp enough to indicate that nothing could be gained by interference here.

☞ The Martha's Vineyard Railroad Company was permanently organized at New Bedford, Mass., on the 20th inst. by the election of a board of directors, with Erastus P. Carpenter, of Foxboro, President; Joseph T. Pease, of Edgarton, Treasurer, and Henry Ripley, of New Bedford, Superintendent. The grading is more than half done, and the road will go into operation July 20.

☞ The last rail of the Berks county (Pa.) railroad, extending from Reading to Slatington, a distance of forty-five miles, was laid on the 18th inst. at Lynnport, Lehigh county, Pa., in the presence of a large excursion party of ladies and gentlemen. The new road was formally opened on the 20th.

Michigan Railroad Aid Law.

The Michigan Railroad Aid law has been declared constitutional by the Supreme Court of the United States. An issue before this Court was made up by the appeal of a person holding township bonds on which payment had been refused. The only question in the case was in regard to the constitutionality of the legislative act. Justice Swayne delivered the opinion of the Court. By way of clearing the ground, he reiterated the axiom of American jurisprudence, that a statute is not to be pronounced void unless its repugnance to the Constitution be clear; and defined the words in the Constitution securing "life, liberty, and property" to every citizen as having reference only to judicial proceedings. He then made the following distinct affirmation: that the credit of municipal corporations may be given in aid of persons, associations, or corporations, though the credit of the State may not; that a railroad corporation is not private in the sense of the constitutional prohibition; that the United States Supreme Court is not bound by the decision of the State Courts, when the questions involved belong to the domain of general jurisprudence; that the obligations of contracts cannot be impaired in any cases which may properly come before the Supreme Court for adjudication. The opinion, is thoughtful and strong. It will be of interest to persons advocating the repudiation of railroad aid bonds issued by towns in Illinois, Iowa, and other Western States, which are included within the scope of the opinion.

The Tax on Margins.

THE BANKERS AND BROKERS VICTORIOUS.

We give below the opinion delivered by Judge Woodruff, of the Circuit Court of the United States, in the case of Clark, Dodge & Company against Collector Bailey of the Internal Revenue Department. The principles involved in the case are of such vital importance that we deem it advisable to publish the opinion in full. It is as follows:

LUTHER C. CLARK, et al. vs. JOSHUA F. BAILEY, Collector, &c. FRANK WORK, et al., vs. JOSHUA F. BAILEY, Collector, &c.

WOODRUFF, Circuit J.:

1. I am of opinion that at the respective times when the taxes were imposed and collected for recovering back which the plaintiffs in the first above named action bring their action, they were bankers doing business as such within the definition given in the acts of Congress (13 Statutes at Large, 251, § 79; 14 ib. 116, sub. div. 1). Besides their business of purchasing stocks, advancing money therefor, and in the language of those engaged in such business, "carrying them on a margin," they had "a place of business whose credits were issued by the deposit of money * * subject to be paid upon draft, check or order."

Whether the mere business of buying, carrying and selling stocks for others on the deposit of money or property as a "margin" for their security would come within the definition in the statute describing bankers, and therefore whether the plaintiffs in the second above suit are or are not bankers, the conclusion I have formed on the point next to be stated renders it unnecessary to determine. They did no other business.

2. I am of the opinion that the terms of section 110 of the act of 1866 (13 Stat. at Large 277, 14 ib. 136) declaring that there shall be levied, collected and paid "a tax of one twenty-fourth of one per centum each month * * * upon the capital of any bank, association, company, or corporation, and on the capital employed by any person in the business of banking beyond the average amount invested in United States bonds," do not authorize nor justify the levy or collection of a tax of one twenty-fourth of one per centum upon money borrowed in the ordinary course of business by a copartnership firm engaged in the business of banking. The term "capital" in the statute has its ordinary signification as universally used in trade, commerce, manufacturing, and other specific business.

It is that stock in trade which, irrespective of particular transactions or dealings, constitutes the basis of credit, or the fund belonging to the person invested in the business. It is money or property appropriated to the purposes of the business of a person or firm, analogous to the capital in a corporation derived or derivable from the contribution of stockholders and denominated capital stock.

Under the act of 1864 there was some uncertainty in the application of the terms used when applied to a mere individual or firm. By the 110th section of that act (13 Statutes at Large, p. 277) the tax was directed to be levied each month "upon the average amount of the capital of any bank, association, company or corporation or person engaged in the business of banking beyond the amount invested in United States bonds." When a person was found engaged in the business of banking, it was not clear that, as he answered the description in the statutes, the tax was not to be levied on all of his capital however invested or employed. The same individual or firm might be engaged in the business of banking, and at the same time have capital employed in manufacturing or otherwise. In a comprehensive sense his or their capital would embrace all; and it might perhaps not be permitted to hold that the capital to be taxed was, under that statute, only such part of his capital as was employed in banking.

The act of 1866 removed this doubt. Where an individual or firm appropiated a portion of his or their capital to manufacturing, or other distinct business, and another portion to the business of banking, this statute of 1866 made a discrimination and confined the tax to the latter.

So it might often be true of an individual that, in reliance upon his known wealth, he commenced and carried on a large business as a banker, when the largest portion of that wealth was invested in real estate. In popular sense, such a man is called a "capitalist," defined to be "usually a man of large property which is or may be employed in business." Under the act of 1864, what was the capital of such a person? It was not easy to say; unless, by construction, it were held to mean, what the act of 1866 makes it mean, the capital employed in the business of banking; *i. e.* such portion of his wealth as he might either at the beginning or from time to time withdraw from other investment or other uses, and employ, either in the form of money or securities or property, for the carrying on of his business as a banker.

In the case of a copartnership, the meaning of the term capital is very closely analogous to the same term applied to a corporation. It is the capital stock, or stock in trade. It is the basis of the joint adventures. The contribution of the several copartners—a ground upon which, in general, distribution of profits proceeds in whole or in part—the plaintiffs in each of these cases are a copartnership firm, having a capital contributed, in money or property, to the use of the joint business. In a supposable case, such capital may not be limited to the original contribution, nor even to any definite sum named in articles of copartnership, but may include successive further contributions or advances by the partners for the purposes of such business. On that possible case it is, however, not material to dwell, as nothing in these cases raises such a question. It is suggested in order to avoid a different inference from what it is intended to hold. So also in a supposable case, the capital of a firm may consist in part or even in whole of money or property borrowed to be employed as capital, as the basis of the financial reputation and credit of a firm, and as between the lender and the creditors of the firm to be at the risk of the business. No doubt a member of a copartnership often borrows a portion and sometimes the whole of his contribution to the capital stock from personal friends. It may be lent for the very purpose of such contribution, and so become in every sense a part of the capital or stock in trade. No doubt all of the members of a copartnership, and even the firm in its joint capacity, may procure such special advances, to be placed, as between the lenders and the copartnership creditors, at the risk of the business, as the basis of copartnership credit, and to constitute the fund to which creditors may look as their security before the lender is permitted to withdraw it. This suggestion is also made in order to exclude the contrary inference, and not because any such state of facts exists in these cases. It is not according to the ordinary use of language, and, as I think, not according to any proper use of language, to say of a mercantile firm that every discount which they procure at bank is so much added to their capital. And yet if they buy goods with the proceeds, they use such proceeds in their business.

It would not satisfy the demands of common honesty, if a man, engaged in business of any kind, being asked the amount of capital employed in his business, should include in his reply all the sums which in the conduct of his business he had borrowed and had not yet repaid.

When the debts of a copartnership are paid, what remains is capital, or capital and profits, as the case may be.

The argument in support of the tax on money borrowed in the ordinary course of business, assumes that "capital employed by any person in the business" means precisely what "the money on property employed by any person in the business" would mean, and so it includes all money however derived.

This begs the whole question. It deprives the word capital from any distinctive meaning. It withdraws it from its intimate association with the other part of the sentence and the meaning of the same word capital there applied to an association or "company." It overlooks the consideration that no reason exists why a copartnership should pay this tax on borrowed money when an association or company (not necessarily incorporated) in any other form should not. It would give to the term "capital" a new and unusual meaning. It would make every bank discount an addition to capital. The statute does not so read. It would have been easy, very easy, to say so in terms, if Congress had so intended.

It is not an insignificant circumstance that in 1872, Congress expressly enacted that the words "capital employed" in said 110th section "shall not include money borrowed or received from day to day, in the usual course of business, from any person not a partner of or interested in the said bank, association or firm" (17 Statutes at Large 256). It is possible to say that this statute changed the law. But it seems to me that the language is better adapted to declare the construction and meaning of the law. It would have been easy and appropriate, if that alone was the design, to say that hereafter money so borrowed shall not be liable to the tax.

My opinion that the terms employed did not include money so borrowed renders it unnecessary to do more than say that this further enactment is not inconsistent with that view, and may well have been passed in order to remove any doubt theretofore entertained on the subject.

I have not overlooked the suggestion in behalf of the defendant that this construction of the statute enables persons having a very small capital to carry on a very large business of the kind now in question—buying stocks on commission, "carrying" them by borrowing thereon the amount required to pay for them, and selling them when directed by the customer and paying the loan without paying the specified tax on the money used for the purpose. This may be so. I do not know how large a capital may be necessary to the establishment of such a financial credit as will secure to a person or a firm a large patronage from stock dealers or speculators. But the answer is that the statute does not declare money borrowed for the purposes of the ordinary and daily conduct of the business taxable. Had it been intended to tax such money it was easy to

say so. If the evil urged required remedy it was easy to correct it, and it was for the Legislature to correct, and it is not for the courts to give a forced and unnatural meaning to language for that purpose.

The result of these considerations is that the tax levied and collected from these plaintiffs in both cases was illegal, and the necessary preliminary proceedings, protest, appeal, and suit in due season, having, as admitted, been taken by them, they are entitled to recover.

As to the firm of Clark, Dodge & Co., the plaintiffs in the first of the above named cases, I am of opinion that they were liable to the tax levied and collected each month upon the average amount of the deposit of money, subject to payment by check or draft. That they received such deposits in their business is distinctly proved, and the amounts are shown entirely distinct from moneys borrowed in the statements put in evidence. The circumstance that they allowed and paid their depositors interest at some agreed rate does not affect this question. The same is done in favor of depositors by very many duly incorporated banks in this city and elsewhere.

But securities or money left with either of the above plaintiffs as a pledge for their indemnity, to save them from loss in purchasing or selling stocks for the customer, are not of this character. They are not "moneys subject to payment by check or draft" in any just sense of those terms as applied to moneys deposited with bank or banker.

Turbular Locomotive and Car Axles.

Sometime since we referred to the fact that an invention had been perfected by Elbridge Wheeler, Esq., Philadelphia, of the American Tubular Iron and Steel Association, for the production of tubular shafting, car axles, bridge columns and a variety of uses where strength is required with lightness. By this process varying diameters in the same tubes are gained, and the large expense heretofore attending their manufacture has, in a great measure, been done away. While in Philadelphia we were shown the practical results of the experiments made by this invention as applied both to tubular iron and in the combination of iron and steel. During our visit the Pencoyd Iron works of Philadelphia turned out for the Association, on June 1, the first tubular axles for locomotives yet made. The result was entirely satisfactory, making an axle, 6½ inches in diameter, with a core, or center, of 3½ inches, that withstood repeated plows, of great weight. With a much lighter axle a greater strength was gained, and Mr. Wheeler feels confident that his process will become very general in the manufacture of axles and railroad iron.—*St. Louis Railway Register.*

The Trent Valley Canal.

MOVEMENTS FOR ITS CONSTRUCTION.

The scheme was first started in 1823 and its most active promoter was the late Sheriff Ruttan. This gentleman twice advocated it before the parliament of Upper Canada, and at last succeeded in getting an appropriation for a canal from Trenton to Sengog. But after the union between Upper and Lower Canada the work was stopped and the project left in a half completed condition. About 17 years since Mr. Tate was employed to re-survey and report upon the route, and he did his work well and faithfully. No action, however, was taken upon the report, and the matter dropped out of sight till last year, when Mr. Boyd, of Bobcaygeon, revived it and secured the services of the Hon. J. Cockburn to draft a bill and carry it through the House. Its passage through committee was most ably managed by Mr. Cockburn, assisted by Sheriff Hall and Mr. Bertram, of Peterborough, and subsequently it passed the House, and is now the law of the land. This charter is very comprehensive, and has many valuable powers, amongst others, the right to take the government works at a valuation and incorporate them as part and parcel of the enterprise.

It is not proposed at first to do more than build a barge canal. The boats will be loaded with 15,000 bushels of grain each, at the mouth of Severn river, on Georgian Bay, and be sent up the river by steam tugs into Lake Simco. From thence they will pass locks and cuttings into Balsam lake, thence into Cameron's lake, thence through locks into Sturgeon lake, Pidgeon lake Buckhorn lake, Stoney lake, Clear lake, to Peterboro; then down the Otonabee to Rice lake, and down the Trent to Bay Quinte. From Trenton steamers will take the barges in tow for Oswego, the Caughnawago Canal, or Montreal.

The saving in distances between the Straits of Mackinaw and the St. Lawrence would be about 300 miles. No less than 160 miles of the canal would be through the above lakes where the steamers could rush at full speed. That the canal will greatly expedite and cheapen the shipment from the west to the seaboard there can be no doubt. Railways cannot compete with water for the carrying trade, and even the Erie canal and the Welland will be left in the background owing to the Trent Valley canal being 300 miles shorter. Grain that now costs 22 cents per bushel from Chicago via the Erie to New York, will only cost 12 cents by the Trent Valley, thus:

	Cents.
From Chicago to Georgian bay	4
Towage, &c	2
Canal toll	2
From Trenton to Montreal or New York	4
Total	12

Then again there need be no expense for insurance from Georgian Bay to New York or Montreal. The route of the canal is for the greater part through still lakes and rivers of clear cold water, and at from 350 to 400 feet above Lake Ontario. There will be no storms to disturb or dampen the grain, and the cool atmosphere of the lakes will tend to preserve it in good order.

The cost of the canal is estimated at $5,000,000, and the last report in 1841 fixed it at $3,600,000.

The revenue is estimated at $4,500,000 gross, on a toll of 2 cents per bushel, for two hundred and twenty-five millions of bushels a year. Upon the whole we may congratulate our readers who are interested in the canal, upon the very favorable estimate of the provisional directors, and we have not the slightest doubt that so soon as the scheme is laid before the people of the West the money will be promptly subscribed, and the Trent Valley canal pushed through to rapid completion.—*Coburg (Ca.) Sentinel.*

Persevation of Telegraph Poles, Posts and Railway Sleepers.

In the course of a recent discussion before the Society of Telegraph Engineers, London, concerning the best methods of preventing decay in wooden telegraph poles, it was stated that an experience of several years with hop poles had show that, when their lower ends was simply boiled in an open vessel of creosote, the wood was greatly preserved from decay. The more perfect method of creosoting wood is to boil in creosote under a pressure of 120 lbs. to 150 lbs. per square inch. This involves expensive apparatus, but the wood thus treated will last indefinitely.

It was alleged that simply painting the bottoms of green poles with tar hastened decay, as the sap was sealed up at that point. When the poles were well dried, the application of tar was believed to be useful.

Attention was called to the process of Sigismund Beer, of New York city, which was considered to be an important one. It is certainly very simple, economical, and easily practiced. The wood is merely steeped in solution of borax. This salt is supposed to neutralize the decomposition of the vegetable matters in the wood, which are afterward washed out.

Mr. Von Treuenfield said that he had not been concerned with wooden posts in England, but he knew of tropical trees which would last, he should say, at least two hundred years without showing the slightest signs of decay. He had had occasion to take up poles which had been used in building, and which had been in the ground for over one hundred years without showing the least sign of decay or corrosion on the ground line. They were poles made of trees growing in the interior of South America, and which were called in the native language the *urunday* and the *curupay* trees. They were generally called by the English people iron wood. The wood was so hard that it was impossible to drive a nail into it. It would, perhaps, be an advantage if it could be brought to this country and used for telegraph poles. He should think that it would last for hundred of years. It might be worth while for some of our investigators to experiment with the iron wood with a view to its acclimation here.—*Lumberman's Gazette.*

Assessment of Capital Stock.

The Supreme Court of Illinois has rendered a decision in the case of Porter and others against the Rockport, Rock Island and St. Louis Railroad, which involves the question of the assessment by the Board of Equalization of the capital stock. The decision sustains the Board of Equalization, and is of great interest, as it virtually decides all similar cases brought before the Supreme Court. The decision concludes as follows:—

Even from the appellants' own showing it is difficult to conceive that this assessment does it injustice. The capital stock paid in is presumed to have been used in the corporate business, and this indebtedness could not have been created for other than corporate purposes. But, be this as it may, we are not convinced from the allegations in the bill, taken in connection with the accompanying exhibit, that the valuation of the appellees' property, as made by the Board of Equalization is so unjust or oppressive as to be sufficient evidence of fraud on the part of the Board to justify us in restraining the collection of the tax imposed upon it. Some further objections are urged on the ground that the corporators were not notified of the meeting of the Board of Equalization. The constitution does not provide that the Legislature shall require that persons or corporations whose property shall be assessed for taxation shall be notified of the assessment. But in the case of the Western Union Telegraph Company vs. Lieb, where the Board of Equalization assessed the capital stock, the Court held that the Board of Equalization is empowered to assess for taxation the capital stock of such corporations as are created by or under the laws of Illinois; and that the shares of stock in such corporations are not liable to be assessed for taxation, but that persons residing in this State, owning shares of stock in corporations created by the laws of other States, must be taxed only for the value of such shares; that the assessment for the taxation of the capital stock of the Western Union Telegraph Company, a foreign corporation, is unauthorized by law and void, and that the collection of the tax levied upon it must be enjoined in the various counties of the State.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending June 13, at 446,683 tons, and for the coal year 7,878,096 tons, against 8,022,152 tons to corresponding time last year, being a decrease of 144,056 tons. The bituminous tonnage for the week is 79,736 tons, and for the year 1,346,964 tons, against 1,267,546 tons to same time last year, giving a total of all kinds for the week of 526,419 tons, and for the year of 9,225,060 tons, against 9,289,698 tons to same time last year, being a decrease of 64,638 tons.

☞ Jacob B. Carpenter has been appointed receiver of the Poughkeepsie and Eastern Railroad.

Commerce of New York.

The foreign imports at New York for the month of May, 1873 and 1874, are officially stated as follows:

	1873.	1874.
Entered for consumpt'n.	$12,716,218	$13,394,964
Do. for warehousing	12,930,999	12,118,107
Free goods	8,772,153	9,902,831
Specie and bullion	196,821	1,054,630
Total entered at port...	$34,616,191	$36,470,532
Withdrawn fr. wareh'use	10,806,601	8,251,185

The foreign imports at New York for five months from January 1, were:

	1873.	1874.
Entered for consumpt'n.	$84,091,321	$77,210,542
Do. for warehousing...	61,036,656	54,087,098
Free goods	44,930,815	51,965,288
Specie and bullion.....	1,841,654	2,322,294
Total entered at port....	$191,900,446	$185,585,222
Withdrawn fr. wareh'se.	54,869,692	49,331,376

The foreign imports at New York for eleven months ending May 31, were:

	1873.	1874.
Six months.....	$199,326,050	$177,517,854
January.....	37,803,691	30,310,679
February	38,860,517	35,439,638
March	43,440,621	42,599,446
April	37,179,426	40,764,927
May	34,616,191	36,470,532
Total for 11 months...	$391,226,496	$363,103,076
Deduct specie	6,658,284	18,136,200
Total mdse.	$384,568,212	$344,966,876

The duties received at New York for eleven months from July 1, were:

	1873.	1874.
Six months.....	$64,398,092 93	$53,535,419 05
January.....	10,768,626 44	10,042,084 05
February.....	12,893,637 89	10,186,365 08
March..	12,101,274 64	10,793,792 81
April	9,826,491 32	9,696,770 71
May	8,862,528 88	8,369,597 45
Eleven months..	$118,840,651 60	$102,524,029 15

The exports from New York to foreign ports in the month of May, were:

	1873.	1874.
Domestic produce	$24,754,461	$22,781,958
Foreign free goods	222,853	196,911
Do. dutiable.....	1,275,712	812,868
Specie and bullion	2,943,583	11,865,511
Total exports	$29,196,609	$35,657,248
Do. exclusive of specie.	26,253,026	23,791,737

The exports from New York to foreign ports for five months from January 1, were:

	1873.	1874.
Domestic produce	$110,177,625	$109,890,359
Foreign free goods	1,149,604	898,834
Do. dutiable	3,717,326	3,394,317
Specie and bullion	21,163,288	22,511,708
Total exports	$136,207,843	$136,695,208
Do. exclusive of specie.	115,044,555	114,183,500

The exports (exclusive of specie) from New York to foreign ports for eleven months ending with May, were:

	1873.	1874.
Six months	$130,400,814	$160,757,524
January.....	20,050,550	28,455,638
February.....	21,189,002	20,725,611
March	21,982 209	22,909,218
April	25,619,768	28,301,296
May	26,253,026	23,791,737
Total produce	$245,445,369	$274,941,024
Add specie.....	56,007,431	43,352,085
Total exports.....	$301,452,800	$318,293,109

Chesapeake and Ohio Canal.

The annual meeting of the stockholders of this company was held at Annapolis, Md., on the 17th inst. A. C. Gorman, Esq., President, presented his report for the year ending December 31, 1873, together with statements showing receipts and disbursements from the treasury from January 1st to 31st of May, 1874.

The receipts from tolls, water rents, &c., amounted, during the fiscal year ending December 31, 1873, to $507,660 52, which is an increase in revenue, as compared with 1872, of $20,655 86. The net revenue of the year was $230,629 31, making the total balance applicable to the payment of overdue interest on preferred construction bonds principal and interest of repair bonds, and current expenses $303,054 50. The payment on account of the said overdue interest was $203,940, and interest and principal of repair bonds $2,712 88. The balance in the treasury January 1, 1874, was $92,577 54, and in the hands of disbursing officers and collectors $3,824 08.

The decrease of ordinary expenses from those of 1872 was $2,654 51, and the increase as compared with 1871 was $8,193 16. There are now of the repair bonds, all of which have been cancelled, (the principal having been $200,000,) only a few coupons outstanding, which will be paid if presented. Of the preferred construction bonds, the principal of which was $1,699,500, overdue coupons to the amount above stated, to July 1858, inclusive, were paid during the past year.

The board states that in pursuance of an order of the Circuit Court of Baltimore city, at the request of the company, there being a balance appropriated for the payment of overdue interest on hand of $119,409 08, proper notice was given for the payment of coupons maturing January, 1859, and on the 28th of January, 1874, all such coupons presented were paid.

In the meantime the equity suit instituted by W. W. Corcoran and others, which had been pending in the Circuit Court of the District of Columbia for interest on overdue coupons, was decided adverse to Corcoran, and nearly all the large holders presented their coupons, which were paid. Since this action on the part of the company the Supreme Court of the District of Columbia affirmed the decision of the lower court, and an appeal has been taken to the Supreme Court of the United States. The result of the action on the part of the company seems to demonstrate that quite a large number of these coupons, and possibly bonds, have been destroyed, as out of the appropriations made during the past three years there was a sufficient balance not claimed to pay one coupon, or $50,985. The total amount of coupons paid from January 1, 1873, to May 30, 1874, is $305,910.

In regard to the condition of the canal, the board refers to the injuries by floods last year, but states that these have been repaired, and the navigation has been more reliable this season, than ever, while the average carrying capacity of the boats has increased two tons each over that of last year. As has been frequently stated, increased wharf facilities are indispensable in Washington and Georgetown, which can be had by the improvement of the river front bordering on the canal. The increased tolls have already reimbursed the treasury for improvements made, and it cannot be doubted that if further facilities are offered the trade will continue to increase. In view of assurances that the navigation would be improved the coal companies have constructed a large number of new boats. The total number now engaged is 554, averaging 112 tons each, which is equivalent in a season of eight months of a carrying capacity of 1,500,000 tons.

The trade and expenses of the canal from January 1 to May 30, 1874, were, for coal tonnage, 201,773 tons, a decrease of 6,152 tons as compared with the same period of last year, (the decrease owing to the financial embarrassments of last year,) ordinary and extraordinary expenses, $87,929 87; improvements, &c. $23,143 35; receipts, $90,915 65. The total available balance in the treasury June, 1 was $50,201 04, which, with accruing revenues, will enable the company to appropriate during the present month $50,985 to pay the coupon on the preferred construction bonds for January, 1860.

The report speaks of the advantages to be derived from extending the canal to the Ohio, and also of penetrating beyond Cumberland twenty-six miles to the mines, and in reference to the proposed extension of the canal to the Patapsco says it cannot be supposed that the great city of Baltimore will long permit the immense trade of the canal to terminate at Georgetown and Alexandria.

The report was approved.

Col. Berret submitted a resolution that in view of the recommendation of the president and directors in their annual report for 1874 respecting increased wharf facilities at Georgetown and Washington, also the suggestions looking to the extension of the canal to the Ohio river and the city of Baltimore, a committee be appointed to examine the same and report to an adjourned meeting to be held in Baltimore on Tuesday, the 8th of September.

The resolution was adopted, and the chair appointed Colonel Berret, Colonel Woolford, and Treasurer Compton as said committee.

An election for directors was then held, which resulted in the choice of A. P. Gorman President, J. G. Berret, Michael Hannon, Daniel S. Biser, Gilmore Meredith, Greenbury M. Watkins and A. K. Stake.

On motion, the meeting adjourned, to meet at Annapolis on Tuesday, the 22d of September.

ENVELOPES.

SAMUEL RAYNOR & CO.
115 & 117 William Street, N Y.

Manufacture every style of Envelope, from the smallest drug size to the largest Official Size, and of any pattern, shape, or quality, including White or Blue Cloth Lined, Parchment and Manilla paper. Railroads, Express Companies, Banks, Insurance Companies, Brokers, Merchants and others supplied with every style that may be wanted. Samples given when requested.

RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh Rails**, and of any required weight and pattern.

PERKINS, LIVINGSTON, POST & Co.,
59 Liberty Street,
NEW YORK.

THE ILLINOIS CENTRAL RAILROAD COMpany offers par and a premium of one per cent. (101 per cent.), with accrued interest, for any of its construction mortgage bonds presented for prepayment prior to July 1, 1874, at its office in New York.

The outstanding balance of its Construction Mortgage Debt is about $3,000,000. These Bonds mature April 1, 1875.

L. V. F. RANDOLPH,
Assistant Treasurer.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, June 27, 1874.

Stock Exchange and Money Market.

Money has been abundant for all legitimate business purposes. The demand has been somewhat brisker, especially from speculative sources, but has been quite readily met, at the current quotations which have been 2@3 per cent to the leading borrowers on call, and 4½@6 per cent per annum on prime mercantile credits. The final passage of a compromise currency bill, definitely determining the legal tender circulation at the 382 millions now outstanding, and releasing a considerable portion of the reserves heretofore required, under the banking law, has tended to stimulate operations in the financial and commercial line, after an unusually prolonged period of dullness and prostration. The formal adjournment of Congress has also been deemed a source of great relief to the business public, as removing for the present, one element of uncertainty and disturbance. The City banks, last week, while adding $887,600 to their reserve of legal tender notes, reported a reduction in all the other more important averages, including $5,102,900 in the deposits, $2,175,300 in the loans and discounts, $1,986,800 in the specie, and $19,500 in the circulation. The loan and discount average, this week, is believed to be a rising one. The U. S. Sub-Treasury at his port further increased its currency reserve, while also adding to its coin hoard. The U. S. Sub-Treasury in this city closed the week with a currency balance of $51,114,249, against $48,809,079 the preceding week; and a coin hoard of $50,250,042, against $49,951,493 on the previous return. The City bank exchanges, during the week, were $401,927,485, or a daily average of $66,987,914. The customs revenue of the port, during the week, was $1,648,217, of which $1,538,217 were in coin certificates. The City banks reported their average of gold last week at $19,934,200, and their greenback average at $61,838,600. Their deposits stood at $227,619,500. The loan item was about $279,067,500. The circulation was $26,652,300.

The cash balances of the Treasury Department on Monday were: Currency, $13,827,485; special deposits of legal tender for redemption of certificates of deposit, $60,820,000; coin, $80,189,487; including coin certificates, $29,465,300.

The outstanding amount of legal tender notes is now definitely established by law at 382 millions; and of National bank circulation 350½ millions.

Government has received about 100¾ millions from internal revenue, thus far in the current fiscal year, which amount is slightly in excess of the later Treasury estimates. The aggregate for the whole year, which will end with the 30th inst., will probably reach 104 millions.

Gold has been more active, the speculative demand having been more confident, while the customs drain has been light, and the export movements, moderate. The price has been advanced rather sharply, on the speculative purchases, which have been stimulated by the currency legislation of Congress. The extremes of the price have been 110¾@112, closing at 111¾, as against 111¼ on Wednesday of the preceding week. The specie outflow, last week, was $1,721,156. The imports of specie at this port since Jan. 1, have been $2,384,826, against $1,814,137 same time last year. The customs demand for Gold last week averaged $285,833 a day. Foreign Exchange has been in moderate demand at rather easier prices. Bankers' sixty day bills on London closed on Wednesday at $4 87½@$4 88; sight bills on London at $4 90@$4 90½ to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $6,429,678.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,854,641, against $5,790,952 same week last year.

Government securities have been quite active, the investment demand having improved. Prices have been generally quoted higher. U. S. sixes of 1881 closed on Wednesday of this week at 122¼@122½; U. S. Five-Twenties of 1862, 114¼@114¾; U. S. Five-Twenties of 1864 at 117¼@117½; U. S. Five-Twenties of 1865, 118¼@118½; U. S. Five-Twenties of 1865 consolidated, 120¾@121; U. S. Five-Twenties of 1867, 121¼@121½; U. S. Five-Twenties of 1868, 121¼@121½; U. S. Ten-forties at 114⅝@114⅞; U. S. Fives of 1881, (Funding Loan) 114¼@114½; Six per cent. currency Sixes from 115@115½.

State and Railway bonds have been moderately active and generally held with confidence. Railway and miscellaneous share property has been in much better demand, and, toward the close, higher and generally buoyant in price.

General trade has been quite active in the Produce line, chiefly in Breadstuffs, Provisions, Cotton, Tobacco, and Wool. Prices, however, have been variable, closing more steadily. Foreign merchandise has been comparatively quiet; Coffee in exceptionally good demand and closing higher in price. There has been rather more animation in the Metal line, with a better inquiry noted for Pig Iron, which has been held with more firmness, in view of the favorable foreign reports. Eglinton Pig Iron quoted at $34@$35. Glengarnock, $36@$37; Coltness, $39; No. 1 American Pig at $32@$34; No. 2 do. at $30; Forge, $26@$28; English Rails at $55 gold; American Rails at works, $56@$60; Old Rails, $36@$40 Wrought Scrap, $38@40. Ocean Freights have been more active, and at the close, generally stronger as to rates.

At the auction sale of Scranton Coal, on Wednesday, 25,000 tons were disposed of at from $4,-57½@ $5 65 per ton.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Bankers' and Brokers' Tax.

We give elsewhere the decision of Judge Woodruff, in the suits brought in the U. S. Circuit Court by Messrs. Clark, Dodge & Co., Frank Work and others against ex-Collector Joshua F. Bailey to recover taxes paid by them under protest, the amounts sued for making a total of about $20,000. The tax exacted was 1-24th per cent. on all money deposited with the plaintiffs and liable to be withdrawn by drafts or checks, and the same tax on all money borrowed on margins for their own use. The plaintiffs contended that money so held by them did not come within the provisions of the law imposing the tax. Judge Woodruff gave judgment for plaintiffs. These two were test cases, and the result of the decision will be to draw some hundreds of thousands of dollars from the treasury.

☞ The locomotives of the Easton and Amboy (N. J.) Railroad have pushed their way from Bound Brook to New Market. In a few weeks the track will be laid to Metuchen, and thence to Perth Amboy, very little grading remaining to be done between Bound Brook and the Eastern terminus. Work is also being pushed rapidly at the docks on the Sound, showing an evident determination to open the road at the earliest possible moment.

Chesapeake and Delaware Canal.

The Chesapeake and Delaware Canal Company, which line suffered so severely by heavy rains in August last as to require $92,103 for repairs, declares no dividend for the year ending June 4, 1874. It will be recollected that the great reservoirs of the canal were broken by the flood, as well as the tow-path, basin and guards, and some 35 or 40 barges swept into the meadows near St. George's. The repairs were made and operations resumed 27th of September. The revenue for tolls was $278,600 70, which, with other receipts for the year, including a balance of $156,099 56, aggregated $441,905 58. The expenditures were $363,875 37, leaving a balance, after deducting five months' accrued interest, of $28,188 08. The amount of capital stock now outstanding is $1,881 050. The amount of funded debt is $1,998,683 12. The canal is now in better condition than before the break. The president is Andrew C. Gray, and the secretary, Henry V. Lesley.

Ashtabula, Youngstown and Pittsburg Railroad.

At the annual meeting of the Ashtabula, Youngstown and Pittsburgh Railroad Co., held at Ashtabula, Ohio, on the 3d inst., the following persons were elected Directors: H. Hubbard, Amos Fiske and H. L. Morrison, of Ashtabula; F. Harrington, of Rock Creek; Warren Packard, of Warren; R. F. Smith, of Cleveland; Caleb B. Vick, of Youngstown, and Wm. P. Shinn, Wm. Thaw, T. D. Messler, W. H. Barnes, Wm. Harbaugh, and Wm. McCreery, of Pittsburgh. On the 16th inst. the newly elected directors met at the office of the Pennsylvania Company and organized by the election of Wm. P. Shinn as President, and James R. Shaler, Secretary and Treasurer. A. F. Hubbard was chosen Assistant Treasurer in charge of the general office of the Company at Ashtabula. Previous to the meeting a visit had been paid Ashtabula by Col. Thos. A. Scott, G. B. Roberts and H. A. Johnston of the Pennsylvania Railroad Company, accompanied by Messrs. Wm. Thaw, J. N. McCullough and J. D. Layng, and made a careful inspection of the harbor. Great satisfaction was expressed at the prospects of the new road.

☞ We have much pleasure in recording the fact that the firm of Fisk & Hatch has issued a circular announcing that it is prepared to pay its creditors in full, with interest. This highly respectable firm suffered in the panic of last year, through no fault of its own, and it is a most satisfactory sign of the improved state of business that it is now able to meet all its obligations. The enterprise and honor of the house will commend it favorably to all its old patrons, and we hope to many new ones.—*N. Y. Times.*

☞ It is announced that the Louisville and Nashville Railroad Company have effected a sale abroad of £400,000 six per cent bonds at a price satisfactory to the company. The bonds negotiated are a first mortgage on the South and North Alabama Railroad, endorsed and guaranteed by the mother road.

☞ The Illinois Supreme Court has decided that the law of 1869, by which it was proposed to make the State responsible for all railroad aid bonds issued by cities, towns and counties, is unconstitutional.

Pennsylvania Company.

The officers of the Pennsylvania Company, elected at the annual meeting in Pittsburg on the 15th inst., are: President, Thomas A. Scott; First Vice President and General Manager, J. N. McCullough; Second Vice President, Wm. Thaw; Third Vice President, H. J. Jewett; Secretary and Treasurer, W. H. Barnes. By reference to the statement of the President, in another column, it will be seen that the aggregate gross earnings of all the roads operated by this company during the year ending December 31, 1873, were $16,434,151; the aggregate expenses, $9,915,980 85; and the aggregate net earnings, $6,518,170 15. From which deduct the aggregate amount of rent and interest paid, $5,086,581 10—leaving as net profit the sum of $1,431,589 05.

☞ The coal tonnage of the Chesapeake and Ohio Canal for May, 1874, was 114,566 tons, an increase of 8,905 tons over May, 1873. The gross revenue was $69,454, an increase of $6,741 over May, 1873. The balance, after paying May expenses, is set down at $84,349. Out of this large balance the directors have appropriated $50,988 to pay the June, 1860, coupon on the preferred construction bonds of the canal, and given notice that the same will be paid on and after the 30th inst., at the banking house of Alex. Brown & Sons, Baltimore, Md.

☞ At a meeting of the bondholders of the Selma, Marion and Memphis Railroad in this city on the 20th inst., it was resolved that the old bonds be surrendered and new ones issued. This, together with the subscriptions promised from Shelby county and other districts, is expected to enable the directors to complete the road and make it a paying concern. A committee was also appointed to notify the bondholders of the determination arrived at, and to obtain their consent to the arrangement.

☞ The Midland (Ca.) Railway Company have completed the change of their gauge from 5 ft. 6 in. to 4 ft. 8½ inches. It is now of uniform gauge with the Grand Trunk.

COMMERCIAL WAREHOUSE CO.—CASH CAPITAL, $2,000,000—Office, 29 William street, corner Exchange place; warehouses, Atlantic Dock, Brooklyn. Cash advances made on first class securities on demand and time. Cash advances made on all kinds of merchandise stored in our own warehouses or consigned to us on favorable terms.

JAMES CLYDE, Secretary.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,142 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler Gen. Gilmore, Gen. Newton, A. B. Muller, C. H. Haswell

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

New York, Saturday, July 4, 1874.

The Erie Railway.

There is a current rumor that President WATSON, of the Erie Railway Company, has intimated his unwillingness to have his name used for re-election to that office, alleging failing health as his reason for withdrawal from this responsible position. We sincerely hope the report is unfounded. The affairs and the personnel of this corporation have long and sadly needed remodeling; and it would be a public, as well as a private, misfortune if the change for the better once inaugurated, should be interrupted by needless changes of management. Messrs. Thos. A. Scott and H. J. Jewitt, long identified with the Pennsylvania lines, are mentioned as likely to enter the direction; and this, if true, foretokens a sort of amicable arrangement between these two powerful interests. President WATSON has been long enough at the head of the company to make his influence felt, and to begin much-needed reforms; but not long enough to complete them all. The Darwinian process of "natural selection" and its result "the survival of the fittest" demands time for its working out in the natural, as in the industrial world. Gradually, but certainly, a new and better class of officers and employees have been displacing those who have been a disgrace and a detriment to this important thoroughfare. It would be a pity if the Chief Executive Office of the company should go-a-begging. It demands the highest order of talent. If President WATSON's health is enfeebled, it would be far better for the company to give, or at least offer, him six months' exemption from duty, for recuperation, than to seek for his successor. We suspect that among the causes for his decision is a certain restiveness on the part of the English stockholders, who are anxious to either sell their shares, or receive dividends thereon, or perhaps both; and having these ends in view, they are oblivious to what is obvious enough to persons here, that this can only be done by patient reconstruction of the property and its servants, not by any legerdemain of book-keeping, or by "rigging" of the Stock Exchanges. The appointment of acountants in London to come hither and inspect the books, merely to silence the attacks of a bold and rich speculator, and his tool, an unfaithful employe, is an undignified proceeding and is an evidence of this unstable disposition. It is of little real consequence to the shareholders whether a quarter million of expenditures has been charged for repairs or for new construction, provided the money has been earned, and honestly expended in timely improvements. But in the present attitude of the Trunk lines of this country it is not within human power to bring the Erie Road up to its requirements, and to pay full dividends on its entire capital also—valuable as this great property undoubtedly is.

It is time the Foreign shareholders appreciated this situation. Among the principal things very desirable to improve the position of the Road, and to render more productive the large outlay already made, are the following: (1). A third rail should be laid between New York and Buffalo as soon as practicable; so as to give a through west connection on the (now) uniform gauge. In this way, by running separate through and local trains, both classes of rolling stock could be used until worn out or replaced. (2). As soon as possible thereafter the third rail should be extended from Hornellsville, over the Atlantic and Great Western, to Cleveland and Dayton. From the latter point to Cincinnati, 60 miles, the third rail is laid; there is also a piece on the Cleveland spur laid, and about 75 miles on the Erie main line, east of Elmira, is now in use. (3). While these things are in progress the contemplated shortening of the main trunk between Jersey City and Port Jervis should be carried to completion. (4.) The line to Buffalo should be deflected at Burns so as to follow the natural depression of the Genesee Valley to Avon and thence *via* Batavia and the existing line. This improvement has long been surveyed; it involves the construction of only six miles of new track, and would get rid of the heavy, undulating grades, and expensive bridge structures on both the Rochester and Buffalo Divisions, including the huge, but perishable, Portage Bridge, and would consolidate, for the most part, the traffic of these two feeders, and improve the grades without sacrifice of distance or time. (5.) The Erie Railway Company should be able to own and repair all its rolling stock; and at the same time abandon the manufacture of either cars or engines. It is impossible that the "United States Rolling Stock Company of London," should reap 12 per cent dividends without impoverishing, to a like extent, the Erie owners. (6.) And most important, now that a unity of interests has been established with the Atlantic and Great Western connections, and an independent entrance to Chicago will soon be effected *via* the Lake Shore and Michigan Southern Railway, the Erie Company should have a line of their own to Indianapolis and Saint Louis. For this purpose its owners should not relax their hold on their stock for a moment; neither on account of hostile demonstrations from without, nor internal treachery. They should acquire also the control, or if already acquired, keep the control, of the Cleveland, Columbus, Cincinnati and Indianapolis combination of lines. This line would not then be at the mercy of its rivals. It would be a strong system. The rest of the routes, as far as the Pacific roads, will naturally gravitate to them. To carry out these plans will require either fresh loans, at low rates of interest, or a sacrifice of

dividends for many years, until the property, by careful management, can be made to earn this large surplus. The latter is the wiser course; but either will answer. To do either, however, it is indispensable that the foreign capitalists should stand firm with our own shareholders, and support the administration as a unit.

Chicago, Rock Island and Pacific Railroad.

The income of this company for the years ending March 31, 1873 and 1874, were as follows:

	1873.	1874.
From passengers	$1,521,790 14	$1,669,570 62
" freight	1,597,982 01	5,003,001 07
" mails	90,751 24	149,044 61

From which deduct—		
Rent of Peoria and Bureau Valley Railroad	$125,000 00	
Interest on bonds	629,125 00	
Dividends April & Nov., 1873, 4 per ct. each	1,659,172 00	
		2,413,297 00
Leaving a balance of		$843,387 78
Add balance of income account April 1, 1873		4,589,683 20
Total, as in Balance Sheet		$5,433,070 98

Compared with the previous year, the gross income shows an increase of $476,523 32; with an increase in expenditures of $359,105 77—making an increase in the net income of $117,417 55. The balance after payment of rent, interest and dividends, is $29,265 45 less than at the close of the previous year. The report says:

The Chicago, Rock Island and Pacific Railroad Company own a line of railroad extending from Chicago to Council Bluffs, Iowa.

This line comprises what was formerly known as the Chicago and Rock Island Railroad, of Illinois, and the Mississippi and Missouri Railroad, of Iowa, the latter being only constructed to Kellogg, with a branch from Wilton to Washington, Iowa, when it became the property of the present consolidated company in 1866.

By the terms of consolidation the new company became the owners of over five hundred and fifty thousand acres of land in Iowa, originally granted to aid the construction of the Mississippi and Missouri Railroad, and since confirmed to the consolidated company by congressional and legislative action.

Over four hundred and fifty thousand acres yet remain unsold.

The company completed their main line to Council Bluffs in 1869; extended the Washington Branch to Sigourney, and aided the building of a Railroad from Des Moines to Indianola and Winterset; all of which were brought into use in the spring of 1872.

This company own and operate the following lines:

	miles.
Main Line—Chicago to Council Bluffs	500.71
Branch " Wilton to Sigourney	78.76
Branch " Des Moines to Indianola and Winterset	48.24
Branch " Bureau to Peoria	46.75
	674.46

The last named Branch was built by the Peoria and Bureau Valley Railroad Co., and control obtained by a perpetual lease made to the Chicago and Rock Island Railroad Company, at a rental of $125,000 per annum.

This company also operates the Chicago and South Western Railway, a line of Railroad extending from Washington, Iowa, to Leavenworth, Kansas, with a Branch reaching the Missouri River, opposite Atchison, Kansas, 300 miles in all.

Separate accounts are kept of the earnings and disbursements of the Chicago and South Western Road, and such accounts are not included in this report of the Chicago, Rock Island and Pacific Railroad Company.

LANDS.

The Land Commissioner reports sales of 24,537.57 acres, for the sum of $200,152 17, averaging nearly $8 25 per acre.

The sales of the past year, as compared with the previous one, shows an increase of 8,946 acres, realizing $73,373 74.

The policy of selling in small parcels to actual settlers, has been closely adhered to. Most of the purchases being half and quarter sections. Inquiry for, and sales of land, has been mostly confined to the territory lying within ten or twelve miles of the Railroad, and as much the largest portion of the lands owned by the company are from twelve to twenty-five miles from the road, it may be worthy the consideration of the Directors, whether a Branch Railroad, located and constructed to accommodate and enhance the value of the company's lands in Audubon and Shelby counties, might not prove a safe and profitable investment.

Taxes have been paid during the year on 464,400 acres of land, amounting to $50,526 67, averaging nearly 11 cents per acre.

After providing for all expenses of the Land Department, taxes, &c., $80,000 has been carried over to the sinking fund.

SINKING FUND.

OFFICE COMMISSIONERS OF SINKING FUND, CHICAGO, ROCK ISLAND & PACIFIC R.R. Co. New York, April 1st, 1874.

The Commissioners of the Sinking Fund respectfully report:

That since the date of their last annual report they have received from the following sources:

Balance on hand at date of last report	$870 26
Cash received from J. L. Drew, Land Commissioner	80,000 00
Interest on bonds and loans	20,709 43
Cash received from C. R. I. & P. R.R. Co	133 92
	$101,713 61
And they have purchased $70,000 of the mortgage bonds of the C. R. I. & P. R. R. Co. at a cost of	$70,246 87
And have cash in Corn Exchange Bank	31,466 74
	$101,713 61

The securities and cash now held by them, are as follows:

$303,000 in mortgage bonds of the C. R. I. & P. R. R. Co.

$24,000 in mortgage bonds of the Peoria, Pekin and Jacksonville R. R. Co.

$31,466 74 cash in Corn Exchange Bank.

The bonds of the C. R. I. and P. R. R. Co. purchased for this fund, have all been registered in the name of the Commissioners, and so mutilated that they cannot be issued again.

All of which is respectfully submitted.

HUGH RIDDLE,
F. H. TOWS,
Commissioners of Sinking Fund.

The gross earnings of the road during the year ending March 31, 1874, were $7,048,203 30; the operating expenses, $3,876,889 26; and the net earnings, $3,171,314 04. During the fiscal year ending March 31, 1873, the earnings were $6,419,231 26; the expenses $3,517,783 49; and the net earnings, $2,901,447 77—showing an increase in earnings during the past over the previous year of $628,972 04, in expenses of $359,105 77, and in net earnings of $269,866 27. The per centage of operating expenses in 1873-'74 was 52.47; including taxes and legal expenses, 55, against 54.8 in 1872-'73, 50 in 1871 '72, 56.5 in 1870-'71, and 57.66 in 1869 '70.

The number of passengers transported during the year was 1,088,906, of which, 1,075,691 were first class, 8,848 second class, and 4,367 emigrant. Of the total number, 40,968 were through and 1,047,943 way; 539,174½ going east, and 549,731½ west. Number of passengers carried one mile, 49,186,817; equivalent to carrying each passenger 45.17 miles. Average rate per passenger per mile, 3.394 cents, against 3.596 cents in 1872-'73, 3.617 in 1871-'72 3.840 in 1870 '71, and 4.59 in 1869 70. Average amount for each passenger, $1.53½. The per centage of receipts during the past year has been: from passenger earnings, 23.68; freight, 70.98; express, mails, etc., 5.34. The gross earnings per mile of road operated were $10,450 14; expenses, $5,747 57; net earnings, $4,702 57. Earnings for each mile run by passenger train, $1.75.

The amount of freight transported during the year was 2,798,766,659 lbs.—an increase over the previous year of 224,834,178 lbs. Freight carried one mile, 249,523,401 tons; equivalent to moving each ton 173 miles. Average rate per ton per mile, 2.07 cents, against 2.26 in 1872-'3, 2.49 in 1871-'72, 2.64 in 1870-'71, and 2.74 in 1869-'70. Earnings for each mile run by freight trains, $1.51.

There has been a very considerable increase in the number of passengers carried and tons of freight moved, as compared with the previous year, equal to 13¼ per cent; but owing to the lower rates obtained the increase of passenger

earnings is but 9.7 per cent, and of freight earnings 8.8 per cent.

A comparison of the earnings for the past five years exhibits the fact, that while the volume of business has steadily increased, the rate for such transportation has steadily decreased. While the freight moved has increased in quantity over 90 per cent, the average rate per ton has decreased fully 25 per cent; and if the rates that prevailed five years ago could have been obtained for the traffic of the past year the company would have received $2,160,862 more revenue.

A re adjustment of the rates of compensation for carrying the United States mail, as per act of Congress passed March 3d, 1873, has been obtained, by which the annual compensation received by the company for performing mail service has been increased from $94,286 to $141,645, the increase taking effect July 1st, 1873.

The expenditures on account of construction and equipment have been as follows:

Land and land damages	$15,804 67
New equipment	295,182 26
Grading, including masonry	85 399 17
New second track (16 miles)	159,858 66
Additional side tracks (10.84 miles)	88,816 82
New buildings and machinery	128,588 99
Excess in cost of steel over iron rails	186,752 37
Ballasting broken stone and gravel	21,822 26
Excess in cost of iron over wooden bridges	10,264 52
Chicago passenger depot	57,107 80
Rock Island bridge	247,140 57
New fencing	3,899 61
Indianola Branch Railroad	5,693 72
Winterset " "	6,958 19
Fort Leavenworth " "	582 08
South Chicago " "	55 755 65
Artesian well and water tank	1,826 05
Engineering, etc., etc.	9,074 66
	$1,380,027 55

The additions made to the equipment have been: 18 first class 34-ton locomotives, 6 passenger coaches, 89 stock and 99 platform cars, all constructed in the company's shops, except 49 platform cars.

Forty-five wooden bridges and trestles, principally in Iowa, have been replaced by permanent stone culverts and bridge abutments, requiring 10,700 cubic yards of masonry. The excess over what it would have cost to renew the same structures with wood has been charged to construction.

Sixteen miles of second track have been constructed and brought into use. Between Morris and Seneca 10¼ miles; between Colona and Port Byron Junction 5¾ miles.

The cost of grading, bridging, and superstructure averaging a fraction less than $10,000 per mile.

10.84 miles of additional side tracks have been constructed at an average cost of $8,200 per mile. About 4 miles were required in the new terminal yards at Rock Island and Stuart, and to reach New Foundry; the balance as turn outs at various points to accommodate the increasing traffic.

Prominent among the new buildings constructed are a foundry, 194 feet long by 80 wide, and a storehouse and pattern room, 82 by 86 feet, two stories high, both built of brick, with iron roof trusses, and covered with slate.

The foundry has been in successful operation since October, and will furnish all the iron and brass castings required for use on the road, including engine and car wheels.

A contract has been made for a term of years with a practical foundryman to make all castings by the ton. It is believed this will prove advantageous to the railroad company.

The change of line at Rock Island to accommodate the New Bridge over the Mississippi River made it necessary to re-arrange tracks for the reception and making up of freight trains. Additional land near the east end of New Bridge has been purchased, nearly three miles of side track laid, and an engine house of thirty stalls is now in course of erection; the entire foundation and ten stalls being complete at date of this report. The building is of brick, with slated roof, and will be fully completed early in the summer.

A new brick freight house, 200 by 80 feet, has been erected at Rock Island.

An engine house of sixteen stalls, built of brick, has been erected at Stuart.

Two new turn tables of approved pattern, have been put in at Rock Island and Stuart.

4,363 tons of steel rail have been laid, and the excess of cost over iron rails charged to construction account.

Of the amount charged to Rock Island bridge. $177,320 95 was paid to the United States Government as the company's proportion of the cost of superstructure, as per contract made in 1868, the balance was expended in filling and bridging the slough east of Island, removing piers of old bridge from channel, completing approaches, &c., &c.

The bridge has been in use more than a year. That portion over the main channel is under the control and supervision of the commandant of the Government post at Rock Island, and this company is relieved from all responsibility on account of detention or damage to boats in passing the draw.

A new truss bridge (combination of wood and iron) 618 feet long, has been built over Cedar river, near Moscow station.

The right of way has been obtained, and a Branch Railroad constructed from a point on the main line about ten miles west of Chicago to the Lake Harbor at South Chicago, 6.2 miles in length.

The growing importance of this new town, manifested in the various manufacturing enterprises started, the improvement of the harbor, the grading of streets, and erection of new buildings, give promise of a large business at no distant day.

Already several large deposits of lumber have been made on its docks. Iron works have been established; new and extensive mills projected; and the attention of the capitalist, as well as manufacturer, has been attracted to South Chicago, as likely soon to become one of the most important and busy of Chicago's many suburban towns. Believing the time will soon come when the possession of this Branch will prove of great value to the company, your managers felt justified in incurring the comparatively small outlay necessary to secure a permanent location to this promising suburb and its harbor.

The leading items of expenditures for repairs and renewals of track have been as follows:

309,832 ties	$103,283 70
$4{,}423\frac{746}{2240}$ gross tons Bessemer Steel Rails	563,029 80
$3{,}221\frac{480}{2240}$ gross tons new and re-rolled iron	214,680 72
164,767 lbs. railroad spikes	7,580 00
371,860 lbs. fish bars and bolts	16,709 01
30,403 rails have been cut and repaired in company's shops at cost of	26,348 26
